

MEWAR UNIVERSITY, GANGRAR, CHITTORGARH
4th Convocation, 27th April 2019

President

The Hon'ble Chairperson Dr. Ashok Kumar Gadiya, Mewar University, members of the Executive Council distinguished guests, Faculty, Staff, recipients of the degrees, eminent alumni, ladies and gentlemen present here at the 4th convocation . . . Namaskar!

It is my privilege to extend a cordial welcome to all of you on behalf of the Mewar University, Gangrar, Chittorgrah.

Hearty congratulations to the graduating students and their respective families and friends! Our alumni are our pride. They have made an outstanding contribution at both national and international levels. We wish them all the best!

Convocation is an important occasion of the university and for the students who are rewarded for their perseverance and patience, their diligence and devotion in obtaining the degrees as a mark of their success in acquiring a unique wealth called education. Education is the best wealth.

न चौर हार्यम न च राज हार्यम
न भ्रात्र भाज्यम न च भारकारी
व्यये कृते वर्धते नित्यम
विधा धनम सर्वे धनम प्रधानम II

In my view, convocation also marks the student's transition from an aquatic life of rather stable ecology to a terrestrial one which is characterized by ever-changing climatic conditions demanding more adaptability, more patience, more courage, more perseverance, and more intelligence. It is also his/her transition from a world of hypotheses to that of experience and experimentation, from one of assumptions to that of applications, from one of theory to that of practice.

The university is named after the land of sacrifice, devotion, and valour. The glorious history of Mewar tells us how its people sacrificed their lives in order to pay back to their motherland. The name of this university will continue to remind you of your responsibility towards your institution, society, and nation.

The courses of the University are approved by various Government Agencies like PCI, AICTE, NCTE,

This year UGC 12(B) & National Assessment & Accreditation Council (NAAC), which is a major milestone in the history of Mewar University. It was an intensive exercise in which every department of the University worked hard, day and night, and deliberated to make a difference in every sphere of university life.

Today, with the insights gained from this exercise we have rebuilt ourselves leaving behind our apparent weaknesses. Most important, we are determined to maintain the momentum of improvement in every sphere of university. On behalf of the University I place on record our deep appreciation to our colleagues, both teaching and nonteaching, for giving their best to the UGC 12(B) & NAAC process and for committing themselves in the endeavor to improve our institution.

Now I present before you a report of activities, academic and other accomplishments, during the last academic year by Mewar University. This year also we have marched ahead keeping in mind that in life there is **“No short cut to hard work and no gain without pains”**

Seminars, Conference & workshop were performed

University also have five world record in its credit.

(1 to 3 Feb. 2019)

Stuntyog-Tree

21 thousand paintings under art gallery.

21 times Surya -Namskar in one minute.

Portrait series of great personality of India

Yoga Marthan of KapalBhati 51 hrs.

1 to 3 April 2019, Gaziyabad.

The department of Training & Placement has been sending students to various Institutes/Industries for short term as well as six months Internship and further assisting them, in getting placed. Adopting a holistic approach the department is committed towards overall development of the students who are absorbed by recognized Industries like Infosys, Lucas TVS, CEAT Tyres, orient Glazers, IIFL, HCL, Keller India, Krishna Maruti etc... i.e. here placement position is very nice.

These achievements strengthen our credentials as a leader in modernizing higher education in India, imparting high quality and affordable education to a very large number of students, and producing accomplished academicians, policymakers, public servants and leaders who prove their mettle in their respective avenues. This is indeed a matter of immense pleasure for all of us. Even when we have achieved all these tasks we are humbled by what remains to be done. We are aware that we have more potential which needs to be taken forward. We have more responsibilities than what we have delivered is a fact that cannot be ignored. Society expects a lot from us, and we are obliged to respond to its rising expectations. We have a duty to continue to excel in the field

of higher education, to produce high quality research, to enhance our global ranking, and to give our best to nation building as well as the welfare of global society by virtue of our commitment to the principle of Vasudhaiva Kutumbakam, which has its origin in the Maha Upanishad.

We can realize our full potential and meet the rising expectations of society by providing a healthy academic environment, good governance, adherence to the rule of law, optimum utilization of resources, a development-friendly approach and positive thinking.

We continue to provide special assistance to students from the weaker sections of society. We organize free coaching classes to those needy students who want to appear in competitive exams for admission in the most popular courses for higher education.

Modern Youths are the electronically connected generation, living in digital world. Such youths are using multiple platforms like Facebook, YouTube, Twitter, Blogs, Websites etc. to share information. They prefer learning from internet over learning from prints. Internet enables them to be always connected to communicate and collaborate immediately if desired. They possess comprehensive characteristics like compassion, determination, thoughtfulness, responsibility etc. They like learning by

observation, visual experiences and practice instead of by reading and listening.

Now a day's students do not want only lectures but want the role of the teacher to be that of a facilitator. At this time, the teachers need to develop innovative teaching by using different forms of technology i.e. content and methods must be relevant to the new generation, responsive to their learning style and needs. Parents and teachers should have a practical approach. They must focus on critical thinking, knowledge of real life solutions, outdoor activities specially games, problem solving exercises, motivation for self and co-operative learning, so that they can contribute and involve in the various activities of family, society and the nation. Here at Mewar University we are trying to develop such environment for students.

On behalf of all the members of Mewar family, I express my gratitude to all the dignitaries for gracing this occasion with their benign presence and congratulate the students receiving degrees today and parents who are here with them. I also wish the passing out students very best in all their future endeavors.

Lastly, I thank you all for being part of this grand event of the university.

THANK YOU.

Jai Hind
