

**Mewar university**  
**Faculty of legal studies**

**PROGRAMME OUTCOMES**

**A. Bachelor of Arts and Bachelor of Law (BA.LLB.)**

**PO-1 Legal Knowledge:** To acquire & apply legal knowledge to the complex Socio-legal problems.

**PO-2. Professional Practice:** to make students eligible to practice in Courts, Industries, Companies as legal practitioner.

**PO-3. Professional Skills:** To possess professional skills required for legal practice such as Argument, Pleading, drafting, convincing etc.

**PO-4. Professional Ethics:** To understand and apply principles of professional ethics of legal profession.

**PO-5. Legal research & legal reasoning:** To develop legal research skills & legal reasoning and apply it during program & in Legal practice.

**PO-6. Self-reflection & lifelong learning:** To develop an attitude of self-reflection while learning & recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of changing legal contexts.

**PO-7. Self-employability:** To provide a platform of self-employability by developing professional skills in legal industry.

**PO-8. Leadership skills:** To develop leadership qualities amongst students

**PO- 9. Lifelong Learning:** To make awareness about Constitutional legislative & societal transformation in society & to develop clinical abilities.

**PO-10. Lawyering skills:** Every graduate will become skilled in legal research, written and oral communication, teamwork, advocacy, and problem-solving.

**Mewar university**  
**Faculty of legal studies**

**PROGRAMME OUTCOMES**

**B | Bachelor of Business Administration and Bachelor of Law (BBA.LLB)**

**PO-1 Legal Knowledge:** To acquire & apply legal knowledge to the complex Sociologic problems.

**PO-2 Professional Practice:** to make students eligible to practice in Courts, Industries, Companies as legal practitioner.

**PO-3 Professional Skills:** To possess professional skills required for legal practice such as Argument, Pleading, drafting, conveyancing etc

**PO- 4 Professional Ethics:** To understand and apply principles of professional ethics of legal profession.

**PO-5 Legal research & legal reasoning:** To develop legal research skills & legal reasoning and apply it during programme & in Legal practice.

**PO-6 Self-reflection & lifelong learning:** To develop an attitude of self-reflection while learning & recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of changing legal contexts.

**PO-7 Self-employability:** To provide a platform of self-employability by developing professional skills in legal industry.

**PO-8 Leadership skills:** To develop leadership qualities amongst students. Lifelong Learning: To make awareness about Constitutional legislative & societal transformation in society & to develop clinical abilities.

**PO-9 Lawyering skills:** Every graduate will become skilled in legal research, written and oral communication, teamwork, advocacy, and problem-solving.

**Mewar University**  
**Faculty of Legal studies**

**PROGRAMME OUTCOMES**

**C. Bachelor of Law (LL.B 3 years)**

1. **Legal Knowledge:** Graduates will demonstrate a strong foundation in key areas of law, including constitutional law, criminal law, contract law, and tort law, among others.
2. **Legal Research Skills:** Graduates will be proficient in conducting legal research, analyzing legal texts, and using relevant legal databases to find and interpret statutes, cases, and legal precedents.
3. **Critical Thinking:** Graduates will develop the ability to critically analyze complex legal issues, evaluate arguments, and make informed judgments based on legal principles and evidence.
4. **Legal Writing:** Graduates will possess effective legal writing skills, enabling them to draft legal documents, contracts, opinions, and arguments in a clear, coherent, and persuasive manner.
5. **Oral Communication:** Graduates will be able to present legal arguments and concepts orally with clarity and confidence, whether in a courtroom, client meeting, or academic setting.
6. **Ethical Awareness:** Graduates will understand the ethical principles and professional responsibilities that underpin the practice of law, demonstrating a commitment to integrity and ethical conduct.
7. **Advocacy Skills:** Graduates will develop the ability to advocate persuasively on behalf of clients in legal proceedings, negotiating settlements, and presenting cases in courtrooms.
8. **Legal Procedure:** Graduates will be familiar with legal procedures, including court processes, filing requirements, and administrative procedures relevant to different areas of law.

9. **Legal Technology:** Graduates will gain familiarity with the use of technology in the legal field, including electronic legal research, online case management, and digital document preparation.

10. **Collaborative Skills:** Graduates will be adept at working collaboratively with legal professionals, clients, and stakeholders, demonstrating effective teamwork and communication in various legal contexts.

*Supriya*

**Mewar university**  
**Faculty of legal studies**

**PROGRAMME OUTCOMES**

**D | One year PG Diploma in Cyber Laws**

**PO-1 Legal Knowledge:** Graduates will have a comprehensive understanding of core legal principles, concepts, theories, and doctrines. They will be familiar with various areas of law, including constitutional law, criminal law, contract law, tort law, administrative law, and other relevant fields.

**PO-2 Legal Research and Analysis:** Graduates will possess strong research skills and the ability to critically analyze legal issues. They will be proficient in conducting legal research, interpreting statutes and case law, and applying legal principles to real-world scenarios.

**PO-3 Legal Writing and Communication:** Graduates will be able to effectively communicate legal concepts and arguments through oral and written means. They will have the skills to draft legal documents, such as contracts, opinions, briefs, and memos, using proper legal terminology and persuasive writing techniques.

**PO- 4 Ethical and Professional Conduct:** Graduates will understand the importance of ethical behavior and professional responsibility within the legal profession. They will be familiar with legal ethics, client confidentiality, conflicts of interest, and the professional codes of conduct governing lawyers.

**PO-5 Legal Practice Skills:** Graduates will develop practical skills necessary for legal practice, such as legal interviewing, negotiation, advocacy, and legal drafting. They may also gain exposure to courtroom procedures, legal documentation, and legal technology tools used in legal practice.

**PO-6 Legal Awareness and Context:** Graduates will have a broad understanding of the legal system and its role within society. They will be aware of the social, economic, political, and cultural factors that influence the law and legal decision-making.

**PO-7 Specialization Knowledge:** Depending on the specialization chosen within the PG Diploma in Law program, graduates may acquire in-depth knowledge in specific areas of law, such as corporate law, intellectual property law, international law, human rights law, environmental law, or any other field based on the program's offerings.

**Mewar university**  
**Faculty of legal studies**

**PO-8 Professional Development:** Graduates will have the foundation for lifelong learning and professional development in the legal field. They will be prepared to pursue further legal education, such as a Master's degree or professional qualifications, and stay updated with changes in the law and legal practices.

*Subir*

**Mewar university**  
**Faculty of legal studies**

**PROGRAMME OUTCOMES**

**Master of Law (LL.M.)**

**PO-1 Legal knowledge:** Demonstrate exhaustive understanding of variety of substantive and procedural laws including various legislations and connected rules and regulations in the area of their specialization.

**PO-2 Analytical understanding:** To develop analytical understanding of the subject, theories and institutions in the area of specialization.

**PO-3 Investigate and solve complex problem:** To develop ability of the students to analyze the legal problems from scholarly and objective point of view and work towards finding solutions to the problems by application of laws and regulations.

**PO-4 Research and development:** Learn the art of doing doctrinal and empirical research which covers knowledge and implementation of various tools and techniques of research.

**PO-5 Problem analysis:** To interpret and analyze the legal and social problems and work towards finding solutions to the problems by application of laws and regulations.

**PO-6 Professional practice for society:** Develop the ability of analyzing the law in relation to contemporary developments at national and international level.

**PO-7 Teaching methodology:** To get equipped with the knowledge of teaching methods through the subject on Teaching Pedagogy thereby enabling them to enter the teaching profession.

**PO-8 Ethics:** Apply ethical principles and commit to legal professional ethics, responsibilities and norms of the established legal practices.

**PO-9 Policy:** To train leaders in the area of law and policy making.

**Mewar University**  
**Faculty of Legal studies**

**PROGRAMME SPECIFIC OUTCOMES OF B.A LL.B**

- 1. Legal Analysis and Research:** Graduates of the BA. LL.B program will demonstrate the ability to critically analyze legal issues, statutes, and case law, applying appropriate research methods to gather relevant information. They will effectively identify legal principles, precedents, and relevant arguments to develop well-reasoned legal opinions and solutions.
  
- 2. Effective Communication and Advocacy:** Graduates will possess strong communication skills, enabling them to articulate complex legal concepts clearly and persuasively. They will be adept at drafting legal documents, including contracts, memos, and pleadings. Additionally, they will exhibit the skills necessary for effective oral advocacy, presenting legal arguments confidently in various settings such as moot courts, negotiations, and client consultations.
  
- 3. Ethical Practice and Professionalism:** BA. LL.B graduates will uphold high ethical standards and professionalism in their legal practice. They will demonstrate an understanding of legal ethics, confidentiality, and the responsibilities that come with representing clients. Graduates will also exhibit the ability to work collaboratively with diverse stakeholders, showing respect for the rule of law and the principles of justice in their interactions within the legal profession and broader society.

**Mewar University**  
**Faculty of Legal studies**

**PROGRAMME SPECIFIC OUTCOMES OF BB.A LL.B**

1. **Business-Law Integration:** Graduates of the BBA LL.B program will demonstrate a comprehensive understanding of how legal principles intersect with business practices. They will be able to analyze and navigate complex legal issues that arise in corporate environments, showing proficiency in areas such as contract law, corporate governance, intellectual property, and international trade.

2. **Strategic Problem Solving:** BBA LL.B graduates will possess the skills to strategically address legal challenges in the business world. They will be able to identify potential legal risks, assess their impact on business operations, and develop effective solutions that balance legal compliance with business objectives. This includes advising on regulatory compliance, risk management, and dispute resolution.

3. **Entrepreneurial Perspective:** Graduates will exhibit an entrepreneurial mindset, understanding how legal considerations shape business opportunities and innovation. They will be equipped to guide startups, small businesses, and new ventures through legal processes such as business formation, intellectual property protection, funding agreements, and commercial negotiations. Additionally, graduates will have the ability to analyze the legal implications of emerging technologies and business models.

**Mewar University**  
**Faculty of Legal studies**

**PROGRAMME SPECIFIC OUTCOMES OF LL.B (3yrs)**

1. **Legal Analysis and Reasoning:** Graduates will be able to critically analyze legal issues, identify relevant laws, regulations, and precedent, and apply logical reasoning to construct well-structured legal arguments in both written and oral forms.
  
2. **Effective Communication:** Graduates will demonstrate effective communication skills by presenting complex legal concepts and arguments clearly and persuasively to diverse audiences, including clients, peers, and stakeholders, using appropriate legal terminology.
  
3. **Ethical and Professional Judgment:** Graduates will exhibit a strong understanding of legal ethics and professional responsibilities. They will be capable of making informed ethical judgments and decisions in various legal contexts, while upholding the highest standards of integrity and professionalism.

*[Signature]*

**Mewar University**  
**Faculty of Legal studies**

**PROGRAMME SPECIFIC OUTCOMES OF LL.M**

1. **Advanced Legal Research:** Graduates will develop advanced skills in legal research methodologies, including qualitative and quantitative analysis, enabling them to conduct in-depth investigations, critically evaluate legal literature, and contribute to the development of legal scholarship.
2. **Specialized Legal Expertise:** Graduates will attain a deep understanding of their chosen area of specialization within the law, gaining expertise in complex legal concepts, regulations, and emerging issues. They will be equipped to provide specialized legal advice, contribute to policy formulation, and engage in cross-border legal practices.
3. **International and Comparative Perspective:** Graduates will acquire an international and comparative perspective on legal systems, enabling them to analyze legal issues in a global context, navigate cross-border legal challenges, and appreciate the diverse cultural and jurisdictional influences that shape the practice of law worldwide.

**Mewar University**  
**Faculty of Legal studies**

**PROGRAMME SPECIFIC OUTCOMES OF ONE YEAR PG DIPLOMA IN  
CYBER LAW**

1. **Legal Expertise in Cyber Regulations:** Graduates will possess a comprehensive understanding of cyber laws, regulations, and policies, enabling them to interpret and apply legal frameworks related to cybersecurity, data protection, digital transactions, and online privacy.
  
2. **Effective Cybersecurity Advocacy:** Graduates will be equipped to provide expert legal advice and representation in cyber-related cases. They will develop skills to advocate for clients' interests in matters such as cybercrimes, intellectual property infringements, digital evidence, and jurisdictional issues.
  
3. **Risk Management and Compliance:** Graduates will have the ability to assess cyber legal risks faced by individuals, businesses, and organizations. They will be proficient in developing strategies for compliance with cyber laws, mitigating legal liabilities, and safeguarding digital assets in the evolving landscape of cyberspace.

## Course Outcomes of B.A LL.B

S. NO	Course Code	Course Title	Course Outcomes
<b>FIRST SEMESTER</b>			
1.	BALB-101	<b>FUNCTIONAL ENGLISH</b>	<p>CO-1: Develop effective written communication skills: Students will be able to demonstrate proficiency in written communication by producing well-structured and coherent legal documents, such as case briefs, legal memos, and client correspondence, using appropriate legal terminology and conventions.</p> <p>CO-2: Enhance oral communication and presentation skills: Students will be able to present legal arguments, engage in debates, and deliver persuasive oral presentations with clarity, confidence, and effective use of language, adapting their communication style to suit diverse audiences.</p> <p>CO-3: Acquire critical reading and analytical skills: Students will develop the ability to critically analyze and interpret legal texts, including statutes, case law, and legal opinions, to extract relevant information, identify key issues, and understand legal reasoning and precedents.</p> <p>CO-4: Cultivate effective legal research skills: Students will acquire proficiency in conducting comprehensive legal research using relevant legal databases, online resources, and libraries, to locate and evaluate primary and secondary legal sources, apply legal research methodologies, and effectively cite and reference legal authorities.</p> <p>CO-5: Foster intercultural and professional communication competence: Students will develop the ability to engage in effective intercultural communication and collaboration, demonstrating cultural sensitivity and adapting communication strategies to interact professionally with clients, colleagues, and stakeholders from diverse cultural and linguistic backgrounds.</p>
2.	BALB-102	<b>COMPUTER FOUNDATION COURSE</b>	<p>CO-1: Develop basic computer literacy: Students will acquire fundamental knowledge and skills in computer operation, including understanding computer hardware and software components, using operating systems, navigating file systems, and performing basic computer</p>

*[Signature]*

			<p>tasks such as word processing, spreadsheets, and presentations.</p> <p>CO-2: Analyse the role of technology in the legal field: Students will develop an understanding of how technology is utilized in the legal profession, including legal research databases, case management systems, e-discovery tools, and other legal software applications commonly used in law firms and legal departments.</p> <p>CO-3: Enhance legal research and information retrieval skills: Students will learn how to effectively utilize digital resources and online databases specific to legal research, such as LexisNexis, Westlaw, or other relevant platforms. They will develop skills in conducting efficient and comprehensive legal research, locating and analyzing legal authorities, and using citation tools.</p> <p>CO-4: Cultivate data management and security awareness: Students will gain knowledge of data management principles, including data organization, storage, and backup methods. They will also develop an understanding of data security and privacy concerns in the legal context, including ethical considerations related to client confidentiality and data protection laws.</p> <p>CO-5: Foster digital communication and collaboration skills: Students will learn to effectively utilize digital communication tools such as email, video conferencing, and collaborative platforms to enhance communication and collaboration within legal teams and with clients. They will also develop skills in producing professional digital documents, such as legal memos or client communications, using appropriate software applications.</p>
3.	BALB-103	<b>LAW OF CONTRACT-I</b>	<p>CO-1: identify the fundamental principles of contract law: Students will develop a comprehensive understanding of the essential elements of a contract, including offer and acceptance, consideration, intention to create legal relations, capacity, and legality. They will grasp the concepts of contract formation, interpretation, and enforceability.</p> <p>CO-2: Analyze and apply contract law principles to legal scenarios: Students will be able to analyze and apply contract law principles to hypothetical legal scenarios,</p>

*Signature*

			<p>identifying relevant legal issues, discussing potential contractual rights and obligations, and evaluating the legal consequences of breach or non-performance.</p> <p>CO-3: Evaluate and interpret contractual terms and conditions: Students will gain the ability to analyze, interpret, and evaluate the terms and conditions of a contract, including express and implied terms, conditions, warranties, and exclusions. They will be able to assess the enforceability and potential implications of various contractual provisions.</p> <p>CO-4: examine the remedies for breach of contract: Students will learn about the different remedies available for breach of contract, such as damages, specific performance, injunctions, and restitution. They will understand the principles governing the assessment of damages and the factors considered by the courts in awarding appropriate remedies.</p> <p>CO-5: Develop critical thinking and problem-solving skills in contract law: Students will enhance their critical thinking and problem-solving abilities by applying legal reasoning and analytical skills to complex contract law issues. They will be able to identify, analyze, and propose solutions to legal problems arising in contractual relationships, taking into account legal principles, case law, and relevant statutes.</p>
4.	BALB-104	<p><b>LAW OF TORT AND CONSUMER PROTECTION ACT, 1986</b></p>	<p>CO-1: Develop the fundamental principles of tort law: Students will develop a comprehensive understanding of the basic principles of tort law, including the concept of negligence, duty of care, causation, and remedies. They will grasp the elements necessary to establish a tortious liability and the principles governing compensation for personal injury, property damage, and other tortious claims.</p> <p>CO-2: Analyze and apply tort law principles to legal scenarios: Students will be able to analyze and apply tort law principles to hypothetical legal scenarios, identifying potential tortious acts, discussing liability issues, and evaluating the legal consequences of negligence,</p>

*Supriya*

			<p>nuisance, trespass, defamation, and other tortious actions.</p> <p>CO-3: Explore the scope and application of consumer protection laws: Students will gain knowledge of the Consumer Protection Act, 1986 and other relevant consumer protection laws. They will understand the rights and remedies available to consumers, the obligations of sellers and service providers, and the mechanisms for consumer dispute resolution, such as consumer forums, ombudsman, and alternative dispute resolution methods.</p> <p>CO-4: Evaluate and interpret consumer protection laws in practical contexts: Students will learn to evaluate and interpret consumer protection laws in practical contexts, such as analyzing unfair trade practices, misleading advertisements, defective products, and deficiency in services. They will understand the legal provisions and standards protecting consumer rights and the legal remedies available to consumers.</p> <p>CO-5: Develop critical thinking and problem-solving skills in tort and consumer protection law: Students will enhance their critical thinking and problem-solving abilities by applying legal reasoning and analytical skills to complex tort and consumer protection law issues. They will be able to identify, analyze, and propose solutions to legal problems arising from tortious acts and violations of consumer rights, considering legal principles, case law, and statutory provisions.</p>
5.	BALB-105	<b>ESSENTIALS OF SOCIOLOGY</b>	<p>CO-1: Apply key sociological concepts and theories: By the end of the course, students will be able to demonstrate an understanding of the fundamental concepts and theories in sociology, such as social structure, socialization, deviance, inequality, and social change.</p>

*Supriya*

			<p>CO-2: Analyze social phenomena and institutions: Students will develop the ability to critically analyze various social phenomena and institutions, including family, education, religion, economy, and politics, using sociological perspectives and methods.</p> <p>CO-3: Apply sociological perspectives to real-world issues: Students will be able to apply sociological theories and concepts to analyze and understand contemporary social issues, such as globalization, crime, social movements, gender inequality, and racial discrimination.</p> <p>CO-4: Evaluate social research and data: Students will acquire the skills to critically evaluate sociological research studies, including research design, data collection methods, and data analysis techniques. They will also learn to interpret and analyze sociological data to draw meaningful conclusions.</p> <p>CO-5: Develop a sociological imagination: Through the course, students will develop a sociological imagination, which is the ability to connect personal experiences with broader social structures and processes. They will be able to recognize the influence of social forces on individual lives and understand the interplay between individual agency and social constraints.</p>
6.	BALB-106	<b>BASIC PRINCIPLES OF POLITICAL SCIENCE AND GOVERNANCE</b>	<p>CO-1: Apply the foundational principles of political science: By the end of the course, students will have a solid understanding of the basic principles and concepts in political science, including power, authority, legitimacy, sovereignty, democracy, and governance.</p> <p>CO-2: Analyze political systems and institutions: Students will develop the ability to analyze different political systems and institutions, such as democratic and authoritarian regimes, legislative bodies, executive branches, and judicial systems. They will understand the</p>

*[Handwritten Signature]*

			<p>functions and dynamics of these institutions and their impact on governance.</p> <p>CO-3: Evaluate political ideologies and theories: Students will be able to evaluate various political ideologies and theories, such as liberalism, conservatism, socialism, and feminism. They will analyze the historical development of these ideologies and their implications for governance and public policy.</p> <p>CO-4: Apply political science concepts to real-world situations: Students will learn to apply political science concepts and theories to analyze and understand real-world political events and issues. They will be able to critically assess the functioning of political systems, policy-making processes, and the role of political actors, both at the domestic and international levels.</p> <p>CO-5: Develop critical thinking and research skills: Through the course, students will develop critical thinking and research skills necessary for the study of political science. They will learn how to critically analyze political texts and arguments, conduct research using appropriate methodologies, and effectively communicate their findings and ideas in oral and written forms.</p>
7.	BALB-107	<b>APPLIED MICRO ECONOMICS</b>	<p>CO-1: Apply the principles of microeconomics: By the end of the course, students will have a solid understanding of the fundamental principles of microeconomics, including supply and demand, market equilibrium, consumer behavior, production, costs, and market structures.</p> <p>CO-2: Analyze economic decision-making: Students will</p>

*Signature*

			<p>develop the ability to analyze individual and firm decision-making processes, including choices related to consumption, production, pricing, and resource allocation. They will understand the role of incentives, opportunity costs, and trade-offs in economic decision-making.</p> <p>CO-3: Evaluate market outcomes and policy implications: Students will be able to evaluate market outcomes and assess the impact of government policies on market efficiency and welfare. They will analyze the effects of price controls, taxes, subsidies, regulations, and other interventions on market equilibrium and economic efficiency.</p> <p>CO-4: Apply economic concepts to real-world situations: Students will learn to apply economic concepts and theories to analyze and understand real-world economic issues and challenges. They will be able to assess the economic implications of various events, such as technological advancements, environmental changes, labor markets, and income inequality.</p> <p>CO-5: Develop quantitative and analytical skills: Through the course, students will develop quantitative and analytical skills necessary for applied microeconomics. They will learn to interpret and analyze economic data, use mathematical models to solve economic problems, and make informed economic decisions based on data and analysis.</p>
--	--	--	--

## SECOND SEMESTER

8.	BALB-201	ENVIRONMENTAL STUDIES	<p>CO-1: Identify the interdependence of human beings and the environment: By the end of the course, students will have a comprehensive understanding of the interconnections between human activities and the natural environment. They will recognize the impact of</p>
----	----------	-----------------------	---

*Signature*

			<p>human actions on ecosystems, biodiversity, natural resources, and climate.</p> <p>CO-2: Analyze environmental challenges and their legal implications: Students will develop the ability to analyze various environmental challenges, such as pollution, deforestation, climate change, and resource depletion, and understand their legal and policy implications. They will explore national and international environmental laws and treaties.</p> <p>CO-3: Evaluate sustainable development principles and practices: Students will be able to evaluate principles and practices of sustainable development and their significance for environmental conservation. They will understand concepts such as environmental justice, conservation, renewable energy, waste management, and ecological footprint.</p> <p>CO-4: Apply environmental ethics and social responsibility: Students will learn to apply environmental ethics and recognize the social responsibility to protect and conserve the environment. They will be able to critically analyze ethical dilemmas related to environmental issues and propose responsible solutions.</p> <p>CO-5: Engage in environmental advocacy and policymaking: Through the course, students will develop the skills necessary for environmental advocacy and policymaking. They will be able to engage in discussions and debates on environmental issues, propose policy measures, and advocate for sustainable practices at individual, community, and societal levels.</p>
--	--	--	---

9.	BALB-202	LAW OF CONTRACT-II	<p>CO-1: Understand the fundamental principles of contract law: Students will develop a comprehensive understanding of the essential elements of a contract, including offer and acceptance, consideration, intention to create legal relations, capacity, and legality. They will grasp the concepts of contract formation, interpretation, and enforceability.</p> <p>CO-2: Analyze and apply contract law principles to legal scenarios: Students will be able to analyze and apply contract law principles to hypothetical legal scenarios, identifying relevant legal issues, discussing potential contractual rights and obligations, and evaluating the legal consequences of breach or non-performance.</p> <p>CO-3: Evaluate and interpret contractual terms and conditions: Students will gain the ability to analyze, interpret, and evaluate the terms and conditions of a contract, including express and implied terms, conditions, warranties, and exclusions. They will be able to assess the enforceability and potential implications of various contractual provisions.</p> <p>CO-4: Understand the remedies for breach of contract: Students will learn about the different remedies available for breach of contract, such as damages, specific performance, injunctions, and restitution. They will understand the principles governing the assessment of damages and the factors considered by the courts in awarding appropriate remedies.</p> <p>CO-5: Develop critical thinking and problem-solving skills in contract law: Students will enhance their critical thinking and problem-solving abilities by applying legal reasoning and analytical skills to complex contract law issues. They will be able to identify, analyze, and propose solutions to legal problems arising in contractual relationships, taking into account legal principles, case law, and relevant statutes.</p>
10.	BALB-203	LEGAL LANGUAGE	<p>CO1: Develop proficiency in legal terminology and language usage.</p> <p>CO2: Identify the structure and organization of legal documents.</p> <p>CO3: Analyze and interpret legal texts: Students will</p>

*Signature*

			<p>develop the skills to analyze and interpret various legal texts, including statutes, case law, contracts, and legal opinions. They will be able to identify key legal principles and concepts within these texts and extract relevant information.</p> <p>CO4: Draft and interpret legal documents: Students will learn how to draft and interpret legal documents, such as contracts, pleadings, and legal opinions. They will develop the ability to use precise and clear language, adhere to legal conventions, and convey legal arguments effectively.</p> <p>CO5: Apply legal language in oral and written communication: Students will be able to apply legal language in oral and written communication within the legal profession. They will develop the skills to articulate legal arguments, present legal opinions, and engage in legal discussions using appropriate legal terminology and language.</p>
11.	BALB-204	<b>THEORETICAL PERSPECTIVE OF SOCIOLOGY</b>	<p>CO1: Analyze the theoretical foundations of sociology.</p> <p>CO2: Apply theoretical perspectives to analyze social phenomena.</p> <p>CO3: Analyze major sociological theories: Students will gain a comprehensive understanding of major sociological theories, such as functionalism, conflict theory, symbolic interactionism, and feminist theory. They will be able to explain the core concepts and principles of each theory and understand their contributions to sociological analysis.</p> <p>CO4: Apply theoretical perspectives to analyze social issues: Students will develop the ability to apply theoretical perspectives to analyze and explain various social issues and phenomena, such as social inequality, deviance, socialization, globalization, and social change. They will critically analyze these issues from different</p>

*Signature*

			<p>theoretical lenses.</p> <p>CO5: Evaluate the strengths and limitations of sociological theories: Students will be able to evaluate the strengths and limitations of different sociological theories. They will critically assess the applicability and relevance of these theories to different social contexts and phenomena, considering their strengths in explaining certain aspects of society and their limitations in addressing other aspects.</p>
12.	BALB-205	<b>INDIAN GOVERNMENT AND POLITICS</b>	<p>CO1: Identify the constitutional framework of Indian government and politics: Students will gain a comprehensive understanding of the constitutional framework of the Indian government, including the structure and powers of the executive, legislature, and judiciary. They will grasp the principles of federalism, separation of powers, and the role of constitutional institutions in governance.</p> <p>CO2: Analyze the political institutions and processes in India: Students will develop the ability to analyze the functioning of key political institutions in India, such as the Parliament, political parties, electoral systems, and the bureaucracy. They will understand the dynamics of Indian elections, party systems, and policy-making processes.</p> <p>CO3: Evaluate the political economy of India: Students will be able to evaluate the political economy of India, examining the relationship between politics and economic development. They will analyze the role of the state in economic policy, the challenges of inclusive growth, and the impact of globalization on India's economy.</p> <p>CO4: Assess the dynamics of Indian federalism and regional politics: Students will gain an understanding of the dynamics of Indian federalism and regional politics. They will analyze the distribution of powers between the central and state governments, the challenges of regional disparities, and the role of regional political parties in shaping Indian politics.</p> <p>CO5: Analyze contemporary issues and debates in Indian politics: Students will be able to analyze and critically assess contemporary issues and debates in Indian politics. They will examine topics such as social and political movements, identity politics, caste and gender issues, human rights, and the challenges of governance and development in a diverse and complex society like</p>

*Supriya*

			India.
13.		<b>LAW AND LITERATURE</b>	<p>CO1: Apply the interdisciplinary relationship between law and literature: Students will gain an understanding of the interdisciplinary nature of law and literature, exploring the ways in which literary works can illuminate legal concepts, principles, and societal issues.</p> <p>CO2: Analyze and interpret legal themes in literature: Students will develop the ability to analyze and interpret literary works that incorporate legal themes, such as justice, morality, human rights, social justice, and the nature of law itself. They will identify and critically evaluate the portrayal of legal issues and concepts within literary texts.</p> <p>CO3: Explore the social and cultural contexts of legal narratives: Students will examine how literature reflects and critiques the social and cultural contexts in which legal narratives are situated. They will explore the historical, political, and societal factors that shape legal systems and analyze how literature can provide insights into the lived experiences of individuals within these systems.</p> <p>CO4: Enhance critical thinking and legal reasoning skills: Through the study of law and literature, students will enhance their critical thinking and legal reasoning skills. They will develop the ability to analyze complex narratives, engage in close reading, identify underlying themes, and make connections between literary texts and legal principles.</p> <p>CO5: Engage in ethical and moral reflections: Students will engage in ethical and moral reflections by examining the ethical dilemmas and moral quandaries presented in literary works with legal themes. They will consider the role of literature in shaping ethical perspectives and enhancing their understanding of the intersection between law, justice, and morality.</p>

14.	BALB-206	MACRO ECONOMICS	<p>CO1: Identify the key concepts and principles of macroeconomics: Students will develop a solid understanding of the fundamental concepts and principles in macroeconomics, including aggregate demand and supply, national income accounting, inflation, unemployment, and economic growth.</p> <p>CO2: Analyze the determinants of macroeconomic variables: Students will gain the ability to analyze the determinants of key macroeconomic variables, such as consumption, investment, government spending, and exports. They will understand how changes in these variables impact overall economic activity and performance.</p> <p>CO3: Evaluate macroeconomic policies and their implications: Students will be able to evaluate different macroeconomic policies, such as fiscal policy, monetary policy, and trade policy. They will analyze the objectives, tools, and limitations of these policies and assess their impact on employment, inflation, and economic stability.</p> <p>CO4: Examine the role of institutions in macroeconomic outcomes: Students will gain an understanding of the role of institutions, such as central banks, government agencies, and international organizations, in shaping macroeconomic outcomes. They will analyze the functions and responsibilities of these institutions and their influence on monetary and fiscal policies.</p> <p>CO5: Apply macroeconomic analysis to real-world issues: Students will develop the ability to apply macroeconomic analysis to understand and analyze real-world economic issues and challenges. They will be able to assess the impact of global events, such as financial crises or changes in international trade, on national economies. They will also examine the interplay between macroeconomic policies and social outcomes, such as income inequality and poverty.</p>
-----	----------	--------------------	---

15.		<b>COURT INTERNSHIP</b>	<p>CO1: Gain practical exposure to the functioning of the court system: Students will gain firsthand experience and practical exposure to the functioning of the court system, including observing court proceedings, interacting with legal professionals, and understanding court procedures and protocols.</p> <p>CO2: Apply legal knowledge and skills in a real-world setting: Students will have the opportunity to apply the legal knowledge and skills they have acquired in the classroom to real-world scenarios. They will analyze legal issues, draft legal documents, conduct legal research, and assist in case preparation under the guidance of experienced legal professionals.</p> <p>CO3: Develop professionalism and ethical conduct: Students will develop professionalism and ethical conduct in the legal profession through their interactions with judges, lawyers, and other court staff. They will learn the importance of maintaining confidentiality, displaying professional demeanor, and adhering to ethical standards in their work.</p> <p>CO4: Enhance communication and advocacy skills: Students will enhance their communication and advocacy skills through courtroom observations, client interactions, and participation in legal proceedings. They will learn to effectively present legal arguments, communicate with clients, and engage in professional discussions with legal professionals.</p> <p>CO5: Reflect on the practical application of legal theory: Students will reflect on the practical application of legal theory in a real-world context. They will critically analyze and evaluate the gap between legal theory and practice, identify the challenges and limitations faced in the court system, and propose possible improvements or reforms based on their observations and experiences.</p>
	2 <sup>nd</sup> year 3 <sup>rd</sup> semester		

16.	BALB-301	APPLIED TECHNICAL COMMUNICATION	<p>CO1: Develop effective written communication skills: Students will develop the ability to communicate complex legal concepts and ideas effectively through written documents, such as legal memos, briefs, and reports. They will demonstrate proficiency in organizing information, structuring arguments, and using appropriate language and style for legal writing.</p> <p>CO2: Enhance oral communication and presentation skills: Students will enhance their oral communication and presentation skills, specifically in the context of legal discourse. They will learn to articulate legal arguments persuasively, engage in effective verbal communication with clients, colleagues, and other legal professionals, and deliver presentations with clarity and confidence.</p> <p>CO3: Apply the principles of legal document drafting: Students will understand the principles and techniques of legal document drafting, including contracts, agreements, and legal correspondence. They will develop the ability to draft clear, concise, and legally sound documents that accurately reflect the intentions and objectives of the parties involved.</p> <p>CO4: Communicate effectively in a legal context: Students will learn to communicate effectively in various legal contexts, such as negotiations, client interviews, and courtroom proceedings. They will acquire the skills to ask relevant questions, actively listen, and respond appropriately, taking into account the legal and ethical considerations.</p> <p>CO5: Apply technical communication skills to legal research and analysis: Students will apply technical communication skills to effectively communicate legal research findings and analysis. They will learn to present legal arguments, cite legal authorities</p>

			accurately, and synthesize complex legal information into clear and accessible formats, such as legal opinions and case summaries.
17.	BALB- 302	<b>LAW OF CONSTITUTION-I</b>	<p>CO1: Identify the constitutional framework: Students will gain a comprehensive understanding of the constitutional framework, including the fundamental principles, structure, and provisions of the constitution. They will be familiar with the historical context and evolution of constitutional law.</p> <p>CO2: Analyze constitutional provisions and their interpretation: Students will develop the ability to analyze and interpret constitutional provisions, including fundamental rights, separation of powers, federalism, and the role of constitutional institutions. They will understand the principles and doctrines guiding constitutional interpretation.</p> <p>CO3: Evaluate the relationship between the constitution and governance: Students will be able to evaluate the relationship between the constitution and governance. They will analyze the distribution of powers between different levels of government, the functioning of constitutional institutions, and the role of the constitution in ensuring the rule of law and protecting individual rights.</p> <p>CO4: Examine constitutional challenges and amendments: Students will examine constitutional challenges and amendments, including landmark constitutional cases and significant amendments. They will critically analyze the implications of these challenges and amendments on the interpretation and application of constitutional provisions.</p> <p>CO5: Apply constitutional principles to contemporary legal issues: Students will be able to apply constitutional principles to analyze and address contemporary legal issues. They will critically assess</p>

			the application of constitutional provisions to various socio-legal challenges, such as affirmative action, freedom of speech, right to privacy, and the protection of marginalized communities.
18.	BALB- 303	<b>LAW OF CRIME-I</b>	<p>CO1: Identify the fundamental concepts of criminal law: Students will gain a comprehensive understanding of the fundamental concepts of criminal law, including the elements of a crime, culpability, criminal liability, and the basic principles of criminal law.</p> <p>CO2: Analyze criminal offenses and their classifications: Students will develop the ability to analyze different types of criminal offenses, such as homicide, theft, assault, and sexual offenses. They will understand the elements of each offense, the gradation of offenses, and the relevant legal provisions.</p> <p>CO3: Evaluate the principles of criminal responsibility: Students will be able to evaluate the principles of criminal responsibility, including mens rea (mental state), actus reus (guilty act), causation, and defenses. They will analyze the principles governing the attribution of criminal liability and the relevance of intent, knowledge, and negligence in criminal cases.</p> <p>CO4: Examine the criminal justice system and its processes: Students will examine the criminal justice system and its processes, including investigation, arrest, bail, trial, and sentencing. They will gain an understanding of the roles and functions of key actors in the criminal justice system, such as police, prosecutors, defense attorneys, judges, and juries.</p> <p>CO5: Apply legal principles to analyze and solve criminal law issues: Students will apply legal principles and rules of criminal law to analyze and solve complex criminal law issues. They will develop critical thinking and problem-solving skills by analyzing hypothetical scenarios, identifying legal issues, and applying appropriate legal principles and rules to reach reasoned conclusions.</p>

19.	BALB- 304	<b>FAMILY LAW-I (HINDU LAW)</b>	<p>CO1: Apply the foundational principles of Hindu Law: Students will gain a comprehensive understanding of the foundational principles of Hindu Law, including sources of law, legal concepts, and historical development. They will familiarize themselves with the basic tenets of Hindu Law and its significance in Indian family law.</p> <p>CO2: Analyze the concept of marriage and its legal implications: Students will develop the ability to analyze the concept of marriage under Hindu Law, including its essential elements, types of marriage, and the legal rights and obligations that arise from the marital relationship. They will explore the legal framework governing marriage, divorce, and maintenance.</p> <p>CO3: Examine the rights and duties of spouses and family members: Students will examine the rights and duties of spouses and other family members under Hindu Law. They will analyze concepts such as stridhan (women's property rights), succession, adoption, and guardianship, and understand their significance within the context of family relationships.</p> <p>CO4: Evaluate the legal framework for maintenance and alimony: Students will evaluate the legal framework for maintenance and alimony under Hindu Law. They will understand the principles governing the determination of maintenance, the rights and obligations of parties involved, and the factors considered by the courts in determining the amount of maintenance.</p> <p>CO5: Apply legal principles to analyze and resolve family law issues: Students will apply legal principles and rules of Hindu Law to analyze and resolve complex family law issues. They will develop critical thinking and problem-solving skills by analyzing case studies, identifying legal issues, and applying appropriate legal provisions and precedents to reach reasoned conclusions in matters related to marriage, divorce, maintenance, and succession under Hindu Law.</p>
20.	BALB- 306	<b>INTERNATIONAL RELATIONS</b>	<p>CO1: Apply the theoretical foundations of international relations: Students will gain a comprehensive understanding of the theoretical foundations of international relations, including realism, liberalism,</p>

			<p>constructivism, and other major schools of thought. They will analyze the concepts of power, sovereignty, security, diplomacy, and globalization.</p> <p>CO2: Analyze the actors and institutions in international relations: Students will develop the ability to analyze the roles and interactions of different actors in the international system, such as states, international organizations, non-state actors, and multinational corporations. They will examine the functions and impact of key institutions, such as the United Nations, World Trade Organization, and regional organizations.</p> <p>CO3: Evaluate global issues and challenges: Students will evaluate major global issues and challenges, such as conflict and security, human rights, global governance, climate change, and economic inequality. They will analyze the causes, consequences, and possible solutions to these issues from an international relations perspective.</p> <p>CO4: Examine foreign policy and diplomacy: Students will examine the formulation and implementation of foreign policy by states, including decision-making processes, factors influencing foreign policy choices, and the role of diplomacy in interstate relations. They will understand the dynamics of bilateral and multilateral diplomacy in addressing global issues.</p> <p>CO5: Apply international relations theories to analyze real-world events: Students will apply international relations theories to analyze and interpret real-world events, such as international conflicts, negotiations, and cooperation. They will develop critical thinking skills to assess the complexities and dynamics of international relations and provide informed analysis and perspectives on global events.</p>
21.	BALB-305	<b>SOCIAL ORGANIZATIONS</b>	<p>CO1: Examine the diversity of social organizations in India: Students will gain an understanding of the diverse range of social organizations in India, including non-governmental organizations (NGOs), community-based organizations (CBOs), self-help groups (SHGs), civil society organizations, and grassroots movements. They will examine the different objectives, structures, and areas of focus of these</p>

		IN INDIA	<p>organizations.</p> <p>CO2: Analyze the role of social organizations in social welfare: Students will analyze the role of social organizations in promoting social welfare and development in India. They will explore how these organizations address various social issues such as poverty, education, healthcare, gender inequality, human rights, and environmental sustainability. They will examine the strategies, interventions, and impact of social organizations in bringing about positive social change.</p> <p>CO3: Evaluate the relationship between social organizations and the government: Students will evaluate the relationship between social organizations and the government in India. They will explore the collaborative and complementary roles played by social organizations and the government in addressing social challenges. They will analyze government policies, regulations, and funding mechanisms that impact the functioning of social organizations.</p> <p>CO4: Examine the challenges faced by social organizations: Students will examine the challenges faced by social organizations in India. They will explore issues such as funding constraints, legal and regulatory hurdles, capacity building, sustainability, and maintaining accountability and transparency. They will analyze the strategies employed by social organizations to overcome these challenges.</p> <p>CO5: Assess the impact and effectiveness of social organizations: Students will assess the impact and effectiveness of social organizations in India. They will critically evaluate the outcomes and achievements of different social organizations and their contributions to social development. They will analyze the strengths, weaknesses, and lessons learned from the work of social organizations in addressing social issues and promoting social justice in India.</p>
22.	BALB- 307		CO1: Apply the fundamentals of Indian economy:

*Subir*

		<p><b>INDIAN ECONOMY</b></p> <p>Students will gain a comprehensive understanding of the fundamentals of the Indian economy, including its structure, sectors, and key economic indicators. They will learn about concepts such as GDP, inflation, unemployment, fiscal and monetary policy, and the role of government in the economy.</p> <p>CO2: Analyze economic policies and reforms in India: Students will analyze the economic policies and reforms implemented in India. They will examine the liberalization, privatization, and globalization measures, as well as sector-specific policies and initiatives aimed at promoting economic growth, industrial development, and inclusive economic opportunities.</p> <p>CO3: Evaluate the role of government in the Indian economy: Students will evaluate the role of government in the Indian economy, including its functions, responsibilities, and interventions. They will analyze the government's role in regulating markets, promoting economic stability, addressing income inequalities, and providing public goods and services.</p> <p>CO4: Examine the challenges and opportunities in the Indian economy: Students will examine the challenges and opportunities in the Indian economy. They will analyze issues such as poverty, income disparities, unemployment, agricultural challenges, environmental sustainability, and regional disparities. They will explore strategies and policies to address these challenges and harness the opportunities for economic growth.</p> <p>CO5: Apply economic principles to analyze and solve real-world economic issues: Students will apply economic principles and tools to analyze and solve real-world economic issues in India. They will develop critical thinking and problem-solving skills by examining case studies, policy debates, and economic data. They will assess the economic impact of legal and regulatory frameworks and propose solutions to</p>

			address economic challenges within a legal context.
<b>2<sup>ND</sup> YEAR 4<sup>TH</sup> SEMESTER</b>			
24.	BALB-401	<b>LAW OF CONSTITUTION- II</b>	<p>CO1: Examine the constitutional framework of India: Students will gain an in-depth understanding of the constitutional framework of India, including the structure of government, separation of powers, and the distribution of powers between the Union and the states. They will analyze the various constitutional provisions and their significance in shaping the Indian legal system.</p> <p>CO2: Analyze fundamental rights and their interpretation: Students will develop the ability to analyze and interpret fundamental rights guaranteed under the Indian Constitution. They will examine landmark judgments related to fundamental rights, including freedom of speech and expression, right to equality, right to life and personal liberty, and the right to constitutional remedies. They will explore the evolving interpretation of these rights by the judiciary.</p> <p>CO3: Examine the principles of constitutional governance: Students will examine the principles of constitutional governance in India, such as the rule of law, judicial review, parliamentary sovereignty, and constitutional amendments. They will analyze the functioning of constitutional institutions, including the executive, legislature, and judiciary, and their interplay in upholding democratic principles.</p> <p>CO4: Evaluate the constitutional provisions for social justice: Students will evaluate the constitutional provisions for social justice in India. They will analyze the provisions related to reservation, affirmative action, and protection of the rights of marginalized communities, including Scheduled Castes, Scheduled Tribes, and Other Backward Classes. They will assess the impact and effectiveness of these provisions in achieving social equality and inclusiveness.</p>

			CO5: Apply constitutional principles to contemporary legal issues: Students will apply constitutional principles to analyze and address contemporary legal issues in India. They will analyze the constitutional implications of significant legal cases and controversies, such as constitutional challenges to legislation, constitutional amendments, and conflicts between fundamental rights. They will develop critical thinking skills to assess the constitutional validity of laws and propose legal arguments based on constitutional provisions.
25.	BALB-402	LAW OF CRIME-II	<p>CO1: Examine advanced concepts of criminal law: Students will gain an advanced understanding of complex concepts in criminal law, including criminal liability, mens rea, actus reus, causation, and defenses. They will analyze the nuances and intricacies of these concepts and their application in different criminal scenarios.</p> <p>CO2: Analyze specialized areas of criminal law: Students will develop the ability to analyze specialized areas of criminal law, such as white-collar crimes, cybercrimes, organized crimes, and crimes against women and children. They will examine the legal framework, principles, and challenges associated with these areas of criminal law.</p> <p>CO3: Evaluate emerging issues and developments in criminal law: Students will evaluate emerging issues and developments in criminal law, such as the intersection of technology and crime, the impact of globalization on criminal activities, and the evolving legal responses to new forms of criminal behavior. They will analyze relevant case law, legislation, and international conventions in these areas.</p> <p>CO4: Examine the criminal justice system and its reform: Students will examine the functioning of the criminal justice system and evaluate the need for reform. They will critically assess the roles and responsibilities of various stakeholders, including police, prosecutors, defense attorneys, judges, and</p>

			<p>correctional institutions. They will explore alternative dispute resolution mechanisms and initiatives for restorative justice.</p> <p>CO5: Apply advanced principles of criminal law to complex cases: Students will apply advanced principles of criminal law to analyze and solve complex cases. They will develop critical thinking and problem-solving skills by engaging in case studies, hypothetical scenarios, and legal research. They will analyze the elements of criminal offenses, assess evidence, evaluate legal arguments, and propose legal strategies in complex criminal cases.</p>
26.	BALB-403	<b>FAMILY LAW-II (MUSLIM LAW)</b>	<p>CO1 Apply the principles and sources of Muslim Law: Students will gain a comprehensive understanding of the principles and sources of Muslim Law. They will study the Quran, Hadith, and other Islamic legal texts to comprehend the foundations of Muslim personal law. They will analyze the role of customs, precedents, and judicial decisions in shaping Muslim Law.</p> <p>CO2: Analyze the legal framework of Muslim family law: Students will develop the ability to analyze the legal framework of Muslim family law, including marriage, divorce, maintenance, guardianship, and inheritance. They will examine the relevant provisions of the Muslim Personal Law (Shariat) Application Act, 1937, and explore the complexities and nuances of Muslim family law.</p> <p>CO3: Evaluate the rights and obligations of spouses under Muslim Law: Students will evaluate the rights and obligations of spouses under Muslim Law. They will examine the concept of marriage in Islam, its essential elements, and the legal implications of marriage. They will analyze the rights and duties of spouses, including the rights to maintenance, custody of children, and marital property.</p> <p>CO4: Examine contemporary issues and reforms in Muslim family law: Students will examine</p>

			<p>contemporary issues and ongoing reforms in Muslim family law. They will critically analyze debates surrounding topics such as triple talaq, polygamy, women's rights, and gender equality. They will evaluate recent judicial pronouncements, legislative reforms, and social movements aimed at addressing these issues.</p> <p>CO5: Apply legal principles to resolve practical issues in Muslim family law: Students will apply legal principles of Muslim family law to analyze and resolve practical issues. They will develop critical thinking and problem-solving skills by engaging in case studies and hypothetical scenarios related to marriage, divorce, maintenance, and inheritance under Muslim Law. They will propose legal arguments and solutions based on Islamic legal principles and precedents.</p>
27.		<b>COURT INTERNSHIP CORPORATE LEGAL TRAINING-II</b>	<p>CO1: Gain practical experience in a corporate legal setting: Students will have the opportunity to intern in a corporate legal department or law firm specializing in corporate law. They will gain practical exposure to the day-to-day operations, processes, and challenges faced in a corporate legal environment.</p> <p>CO2: Develop skills in legal research and analysis: Students will develop advanced skills in legal research and analysis specific to corporate law. They will learn how to conduct thorough research on corporate laws, regulations, and case precedents. They will analyze and interpret legal documents, contracts, and agreements relevant to corporate transactions.</p> <p>CO3: Analyze corporate governance and compliance: Students will gain a comprehensive understanding of corporate governance principles and compliance requirements. They will learn about the legal framework governing corporate entities, the roles and responsibilities of directors and officers, and the obligations of companies to comply with laws and regulations.</p> <p>CO4: Draft legal documents and contracts: Students will develop the ability to draft various legal</p>

			<p>documents and contracts commonly used in corporate transactions. They will learn to prepare agreements, memoranda, legal opinions, and other legal documents relevant to corporate law practice. They will understand the importance of precision, clarity, and adherence to legal requirements in drafting such documents.</p> <p>CO5: Gain insights into the practical aspects of corporate transactions: Students will gain insights into the practical aspects of corporate transactions, such as mergers and acquisitions, joint ventures, corporate financing, and corporate restructuring. They will understand the legal implications, processes, and challenges involved in these transactions, and the role of legal professionals in advising and facilitating such transactions.</p>
28.	BALB-404	<b>POLITICAL IDEOLOGIES</b>	<p>CO1: Apply the concepts and principles of political ideologies: Students will gain a comprehensive understanding of the concepts, principles, and historical development of various political ideologies, such as liberalism, conservatism, socialism, communism, feminism, and nationalism. They will explore the key ideas, values, and goals associated with each ideology.</p> <p>CO2: Analyze the key features and critiques of political ideologies: Students will develop the ability to analyze the key features, strengths, weaknesses, and critiques of different political ideologies. They will critically evaluate the ideological perspectives on issues such as governance, individual rights, economic systems, social justice, and the role of the state. They will understand the historical and contextual factors that shaped these ideologies.</p> <p>CO3: Compare and contrast political ideologies: Students will compare and contrast different political ideologies to identify their similarities, differences, and areas of overlap. They will examine how these</p>

*Signature*

			<p>ideologies address common societal challenges and propose alternative visions for governance and social order. They will analyze the ideological spectrum and the positions of various political movements within it.</p> <p>CO4: Evaluate the impact of political ideologies on legal and policy frameworks: Students will evaluate the impact of political ideologies on legal and policy frameworks. They will analyze how different ideologies influence the formulation and implementation of laws, regulations, and public policies. They will examine case studies and real-world examples to understand how political ideologies shape legal and policy decisions.</p> <p>CO5: Apply political ideologies to contemporary legal and political issues: Students will apply their understanding of political ideologies to analyze and assess contemporary legal and political issues. They will develop critical thinking and problem-solving skills by examining case studies, policy debates, and legal controversies from the perspective of different ideologies. They will propose legal and policy solutions grounded in specific political ideologies.</p>
		<b>3<sup>RD</sup> YEAR 5<sup>TH</sup> SEMESTER</b>	
30.	BALB-501	<b>JURISPRUDENCE -I</b>	<p>CO1 Identify the nature and scope of jurisprudence: Students will gain a comprehensive understanding of the nature, scope, and significance of jurisprudence as a field of study. They will explore the different schools of thought within jurisprudence and their approaches to understanding law, legal systems, and legal reasoning.</p> <p>CO2: Analyze the theories of law: Students will analyze the major theories of law, including natural law, positivism, legal realism, legal formalism, and critical legal studies. They will critically evaluate the strengths, weaknesses, and implications of these theories in understanding the nature, purpose, and functions of law in society.</p>

*[Handwritten Signature]*

			<p>CO3: Examine the relationship between law and morality: Students will examine the complex relationship between law and morality. They will explore ethical theories and concepts and analyze their relevance to legal reasoning and decision-making. They will critically evaluate the role of moral values, principles, and societal norms in shaping legal systems and the interpretation of laws.</p> <p>CO4: Evaluate the concept of justice: Students will evaluate the concept of justice and its various dimensions. They will explore theories of distributive justice, corrective justice, and procedural justice. They will critically analyze the role of the judiciary in administering justice and the challenges of achieving fairness and equality in the legal system.</p> <p>CO5: Apply jurisprudential theories to legal analysis: Students will apply jurisprudential theories to analyze and interpret legal issues and cases. They will develop critical thinking and analytical skills by examining legal principles, doctrines, and precedents from different jurisprudential perspectives. They will engage in legal reasoning and argumentation to support their positions and propose legal solutions based on jurisprudential insights.</p>
31.	BALB-502	<b>CRIMINAL PROCEDURE CODE</b>	<p>CO1: Apply the structure and key provisions of the Criminal Procedure Code (CrPC): Students will gain a comprehensive understanding of the structure and organization of the CrPC. They will study the key provisions related to the investigation, arrest, bail, trial, and sentencing processes in criminal cases. They will analyze the procedural safeguards and the rights of accused persons as enshrined in the CrPC.</p> <p>CO2: Analyze the roles and responsibilities of various stakeholders in the criminal justice system: Students will analyze the roles and responsibilities of key stakeholders in the criminal justice system, including the police, prosecutors, defense attorneys, judges, and witnesses. They will examine the interplay between these stakeholders and the impact of their actions on</p>

*Subir*

			<p>the fairness and efficiency of the criminal justice process.</p> <p>CO3: Evaluate the procedures for investigation and evidence gathering: Students will evaluate the procedures for investigation and evidence gathering under the CrPC. They will study the powers and limitations of the police, rules of evidence, and the admissibility of different types of evidence. They will analyze case law and precedents related to the collection, preservation, and presentation of evidence in criminal cases.</p> <p>CO4: Examine the trial and adjudication processes: Students will examine the trial and adjudication processes under the CrPC. They will study the stages of the trial, including the framing of charges, examination of witnesses, cross-examination, and the pronouncement of judgments. They will analyze the principles of fair trial, the rights of the accused, and the procedures for challenging trial outcomes.</p> <p>CO5: Apply the CrPC to analyze and solve procedural issues in criminal cases: Students will apply the provisions of the CrPC to analyze and solve procedural issues in criminal cases. They will develop critical thinking and problem-solving skills by engaging in case studies, hypothetical scenarios, and legal research. They will analyze procedural challenges, propose legal arguments, and suggest appropriate legal remedies based on the provisions of the CrPC.</p>
32.	BALB-503	LABOUR LAW-I	<p>CO1: Identify the framework of labor laws: Students will gain a comprehensive understanding of the framework of labor laws in India. They will study the constitutional provisions, international conventions, and key legislation governing labor relations, including the Industrial Disputes Act, 1947, the Factories Act, 1948, and the Minimum Wages Act, 1948.</p> <p>CO2: Analyze the rights and obligations of workers and employers: Students will analyze the rights and</p>

			<p>obligations of workers and employers under labor laws. They will examine the provisions related to minimum wages, working hours, leave, health and safety, and social security. They will critically evaluate the balance between the rights of workers and the legitimate interests of employers.</p> <p>CO3: Examine the mechanisms for resolution of industrial disputes: Students will examine the mechanisms for the resolution of industrial disputes. They will study the processes of collective bargaining, conciliation, and arbitration. They will analyze the role of labor unions, employers' associations, and labor courts in resolving disputes and maintaining harmonious industrial relations.</p> <p>CO4: Evaluate the legal provisions for workplace safety and welfare: Students will evaluate the legal provisions for workplace safety and welfare. They will examine the requirements related to occupational health, safety standards, and welfare amenities for workers. They will analyze the obligations of employers in ensuring a safe and healthy work environment.</p> <p>CO5: Apply labor laws to practical scenarios: Students will apply labor laws to analyze and address practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world labor-related issues, such as unfair labor practices, industrial accidents, and employment termination. They will propose legal solutions and strategies based on the provisions of labor laws to protect the rights and interests of workers.</p>
33.	BALB-504	<b>LAW OF EVIDENCE</b>	<p>CO1: Apply the fundamental principles of the Law of Evidence: Students will gain a comprehensive understanding of the fundamental principles of the Law of Evidence. They will study the concept of evidence, relevance, admissibility, and burden of proof. They will explore the rules and standards that govern the presentation and evaluation of evidence in legal proceedings.</p>

			<p>CO2: Analyze the different types of evidence: Students will analyze the different types of evidence, including testimonial, documentary, real, and circumstantial evidence. They will examine the rules governing the admissibility and weight of each type of evidence. They will also study the principles and techniques of examining and cross-examining witnesses.</p> <p>CO3: Evaluate the rules of exclusionary evidence: Students will evaluate the rules of exclusionary evidence, such as hearsay, opinion, and privileged communications. They will understand the rationale behind these rules and their impact on the admissibility of evidence. They will analyze exceptions to these rules and their application in specific legal contexts.</p> <p>CO4: Examine the principles of credibility and corroboration: Students will examine the principles of credibility and corroboration of evidence. They will explore factors affecting the credibility of witnesses, including competency, demeanor, and bias. They will study the importance of corroborating evidence in establishing the truthfulness and reliability of the evidence presented.</p> <p>CO5: Apply the Law of Evidence to analyze and solve evidentiary issues: Students will apply the principles of the Law of Evidence to analyze and solve evidentiary issues in practical scenarios. They will develop critical thinking and analytical skills by engaging in case studies, hypothetical scenarios, and legal research. They will evaluate the admissibility and weight of evidence, assess the credibility of witnesses, and propose legal arguments based on the principles of the Law of Evidence.</p>
34.	BALB-505	<b>PUBLIC ADMINISTRATION</b>	<p>CO1: Identify the concepts and theories of public administration: Students will gain a comprehensive understanding of the concepts, theories, and principles of public administration. They will explore the</p>

			<p>evolution of public administration as a discipline and its relationship with governance, public policy, and the public sector. They will analyze the roles, functions, and responsibilities of public administrators in serving the public interest.</p> <p>CO2: Analyze the organizational and administrative structures: Students will analyze the organizational and administrative structures in public administration. They will study the principles of bureaucracy, public sector organizations, and their hierarchies, decision-making processes, and coordination mechanisms. They will evaluate the challenges and opportunities in managing public organizations effectively.</p> <p>CO3: Evaluate public policy development and implementation: Students will evaluate the process of public policy development and implementation. They will study the stages of policy formulation, implementation, and evaluation. They will analyze the role of public administrators in formulating and implementing policies, managing stakeholders, and addressing policy challenges in diverse socio-political contexts.</p> <p>CO4: Examine administrative ethics and accountability: Students will examine the principles of administrative ethics and accountability. They will study ethical dilemmas faced by public administrators, principles of transparency, integrity, and responsiveness in public service. They will explore mechanisms for ensuring accountability, including mechanisms for citizen engagement, oversight, and performance evaluation.</p> <p>CO5: Apply public administration concepts to real-world challenges: Students will apply the concepts and theories of public administration to analyze and propose solutions to real-world administrative challenges. They will develop critical thinking and problem-solving skills by engaging in case studies, policy analysis, and research projects. They will</p>

			propose innovative strategies for improving the efficiency, effectiveness, and responsiveness of public administration in addressing societal issues.
--	--	--	---

### THIRD YEAR SIXTH SEMESTER

35.	BALB-601	<b>JURISPRUDENCE -II</b>	<p>CO1: Explore advanced theories and concepts in jurisprudence: Students will explore advanced theories and concepts in jurisprudence, building upon their foundational knowledge. They will study philosophical theories of law, including natural law, legal positivism, legal realism, critical legal studies, and feminist jurisprudence. They will critically analyze and evaluate these theories in the context of contemporary legal and social issues.</p> <p>CO2: Examine the relationship between law and society: Students will examine the complex relationship between law and society from a jurisprudential perspective. They will explore the social, cultural, and historical factors that influence the development and interpretation of laws. They will critically analyze the impact of legal systems on social norms, values, and power structures.</p> <p>CO3: Analyze legal reasoning and interpretation: Students will analyze advanced techniques of legal reasoning and interpretation. They will study different approaches to statutory interpretation, such as textualism, purposivism, and contextualism. They will critically evaluate the role of precedent, judicial discretion, and legal principles in shaping legal decision-making.</p> <p>CO4: Evaluate contemporary debates in jurisprudence: Students will evaluate contemporary debates and issues in jurisprudence. They will analyze debates on topics such as judicial activism, constitutional interpretation, legal rights, and the intersection of law and technology. They will critically engage with different perspectives and contribute to these debates through rigorous analysis and argumentation.</p>
-----	----------	--------------------------	--

			<p>CO5: Apply jurisprudential theories to legal practice and reform: Students will apply jurisprudential theories to analyze and propose reforms in legal practice and systems. They will develop critical thinking and problem-solving skills by engaging in case studies, policy analysis, and legal research. They will propose innovative approaches to legal practice, legal education, and legal reform based on jurisprudential insights.</p>
36.	BALB- 602	LABOUR LAW-II	<p>CO1: Identify advanced concepts and principles in labor law: Students will gain an advanced understanding of the concepts and principles in labor law. They will study topics such as collective bargaining, trade unions, industrial disputes, labor standards, and social security. They will analyze the legal framework and its implications for the rights and protections of workers.</p> <p>CO2: Analyze the legal framework for collective bargaining and industrial relations: Students will analyze the legal framework governing collective bargaining and industrial relations. They will study the rights and obligations of employers, trade unions, and workers in the negotiation and administration of collective agreements. They will critically evaluate the mechanisms for resolving labor disputes and maintaining harmonious industrial relations.</p> <p>CO3: Evaluate the legal provisions for worker protection and welfare: Students will evaluate the legal provisions for worker protection and welfare. They will study laws related to occupational health and safety, working conditions, wages, hours of work, and social security. They will analyze the role of labor inspections, enforcement mechanisms, and the impact of labor laws on worker well-being.</p> <p>CO4: Examine the legal framework for employment termination and labor law compliance: Students will examine the legal framework governing employment termination and labor law compliance. They will study the grounds for termination, notice and severance</p>

			<p>requirements, and the remedies available for unfair dismissal. They will analyze the legal obligations of employers in maintaining compliance with labor laws.</p> <p>CO5: Apply labor laws to complex labor-related issues: Students will apply their knowledge of labor laws to analyze and propose solutions to complex labor-related issues. They will develop critical thinking and problem-solving skills by engaging in case studies, legal research, and policy analysis. They will evaluate legal compliance, propose strategies for effective labor relations, and address emerging challenges in the labor market.</p>
37.	BALB- 603	<b>PROPERTY LAW (TRANSFER OF PROPERTY ACT, 1882 AND LAW OF EASEMENT)</b>	<p>CO1: Apply the provisions of the Transfer of Property Act, 1882: Students will gain a comprehensive understanding of the provisions of the Transfer of Property Act, 1882. They will study the various modes of transfer of property, including sale, mortgage, lease, gift, and exchange. They will analyze the legal requirements, rights, and obligations associated with each mode of transfer.</p> <p>CO2: Analyze the legal requirements for a valid transfer of property: Students will analyze the legal requirements for a valid transfer of property under the Transfer of Property Act, 1882. They will study the concepts of ownership, possession, title, consideration, registration, and transferability. They will critically evaluate the legal formalities and restrictions associated with property transfers.</p> <p>CO3: Examine the law of easement: Students will examine the law of easement, which governs the rights and obligations associated with the use of another person's property. They will study the types of easements, the creation and termination of easements, and the rights and liabilities of the dominant and servient owners. They will analyze case law and precedents related to easement rights.</p> <p>CO4: Evaluate the legal remedies and protections for property rights: Students will evaluate the legal</p>

			<p>remedies and protections available for property rights under the Transfer of Property Act, 1882. They will study the rights of transferors, transferees, and third parties in case of disputes or breaches of property rights. They will analyze the legal mechanisms for resolving property-related conflicts.</p> <p>CO5: Apply property law principles to practical scenarios: Students will apply the principles of property law, including the Transfer of Property Act, 1882, and the law of easement, to analyze and solve practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world property-related issues, such as ownership disputes, land transactions, and easement conflicts. They will propose legal solutions and strategies based on the provisions of property law to protect property rights and ensure fair and equitable outcomes.</p>
38.	BALB- 604	ADMINISTRATIVE LAW	<p>CO1: analyse the principles and scope of administrative law: Students will gain a comprehensive understanding of the principles and scope of administrative law. They will study the legal framework governing administrative actions, including the principles of natural justice, fairness, reasonableness, and non-arbitrariness. They will analyze the relationship between administrative agencies, the executive branch, and the judiciary.</p> <p>CO2: Analyze the legal framework for administrative decision-making: Students will analyze the legal framework governing administrative decision-making. They will study the powers and functions of administrative agencies, the process of rulemaking, administrative discretion, and the duty to provide reasons for decisions. They will critically evaluate the mechanisms for review and appeal of administrative decisions.</p> <p>CO3: Evaluate the principles of judicial review: Students will evaluate the principles of judicial review of administrative actions. They will study the grounds</p>

*Signature*

			<p>for judicial review, including errors of law, procedural impropriety, irrationality, and proportionality. They will analyze the role of the judiciary in ensuring the legality and fairness of administrative actions.</p> <p>CO4: Examine the principles of administrative accountability: Students will examine the principles of administrative accountability. They will study mechanisms for holding administrative agencies accountable, such as ombudsman institutions, administrative tribunals, and public inquiries. They will analyze the role of transparency, accountability, and public participation in promoting good governance.</p> <p>CO5: Apply administrative law principles to practical scenarios: Students will apply administrative law principles to analyze and propose solutions to practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world administrative issues, such as administrative discretion, procedural fairness, and the protection of individual rights. They will propose legal strategies and recommendations to ensure the effective and accountable functioning of administrative agencies.</p>
39.	BALB- 605	<b>INDIAN POLITICAL THOUGHT</b>	<p>CO1: Analyze the evolution and development of Indian political thought: Students will analyze the evolution and development of Indian political thought from ancient times to the modern era. They will study the contributions of influential thinkers such as Kautilya, Mahatma Gandhi, Jawaharlal Nehru, and B.R. Ambedkar. They will critically evaluate the political ideas, philosophies, and ideologies that have shaped Indian political discourse.</p> <p>CO2: examine the key concepts and principles of Indian political thought: Students will gain a comprehensive understanding of the key concepts and principles of Indian political thought. They will study concepts such as dharma, karma, swaraj, nonviolence, secularism, and social justice. They will analyze the relevance and application of these concepts in the</p>

			<p>Indian political context.</p> <p>CO3: Evaluate the relationship between Indian political thought and governance: Students will evaluate the relationship between Indian political thought and the practice of governance. They will study the influence of Indian political thought on the formation of the Indian Constitution, the structure of government, and the functioning of political institutions. They will critically analyze the challenges and opportunities in implementing the ideals of Indian political thought in governance.</p> <p>CO4: Examine the contributions of diverse perspectives in Indian political thought: Students will examine the contributions of diverse perspectives in Indian political thought, including liberal, socialist, feminist, and environmentalist perspectives. They will analyze the debates and conflicts arising from these perspectives and their impact on shaping Indian political ideology and policy-making.</p> <p>CO5: Apply Indian political thought to contemporary political issues: Students will apply Indian political thought to analyze and propose solutions to contemporary political issues in India. They will develop critical thinking and problem-solving skills by engaging in case studies, policy analysis, and research projects. They will propose strategies for addressing challenges related to democracy, social inequality, cultural diversity, and sustainable development based on the insights of Indian political thought.</p>
40.	BALB-606	MOOT COURT	<p>CO1: Develop effective oral advocacy skills: Students will develop effective oral advocacy skills through participation in moot court exercises. They will learn how to construct persuasive legal arguments, present their case before a mock court, and engage in oral debates and rebuttals. They will enhance their ability to articulate legal principles, analyze case law, and respond to questions from judges.</p> <p>CO2: Enhance legal research and writing skills:</p>

		<p>Students will enhance their legal research and writing skills by preparing written submissions for moot court competitions. They will learn how to conduct thorough legal research, analyze relevant legal authorities, and present their arguments in a clear and logical manner. They will gain proficiency in drafting legal memoranda, briefs, and other written advocacy documents.</p> <p>CO3: Demonstrate knowledge of procedural rules and court etiquette: Students will demonstrate knowledge of procedural rules and court etiquette in the context of moot court proceedings. They will learn how to navigate court procedures, follow time limits, and adhere to professional and ethical standards. They will develop an understanding of courtroom decorum and the roles of judges, counsel, and witnesses.</p> <p>CO4: Apply substantive law to hypothetical legal scenarios: Students will apply substantive law to hypothetical legal scenarios presented in moot court competitions. They will analyze legal issues, identify relevant legal principles, and construct arguments based on statutes, case law, and legal doctrines. They will develop the ability to apply legal principles to specific fact patterns and develop persuasive legal strategies.</p> <p>CO5: Collaborate and engage in constructive critique: Students will collaborate with teammates and engage in constructive critique to improve their performance in moot court competitions. They will provide feedback to their peers, identify strengths and areas for improvement, and work collectively to enhance their advocacy skills. They will develop teamwork, communication, and professional skills necessary for effective collaboration in a legal setting.</p>
41.	<b>COURT INTERNSHIP CORPORATE LEGAL TRAINING-III</b>	<p>CO1: Gain practical experience in corporate legal matters: Students will gain practical experience in handling corporate legal matters through their court internship. They will have the opportunity to work on real-life cases and transactions related to corporate</p>

			<p>law, including contract drafting and negotiation, corporate governance, mergers and acquisitions, intellectual property, and compliance.</p> <p>CO2: develop the role and responsibilities of corporate lawyers: Students will develop a comprehensive understanding of the role and responsibilities of corporate lawyers in a professional setting. They will observe and participate in tasks such as legal research, drafting legal documents, analyzing contracts, conducting due diligence, and providing legal advice to corporate clients.</p> <p>CO3: Apply legal principles to corporate legal issues: Students will apply their knowledge of corporate law principles to analyze and solve complex legal issues that arise in corporate settings. They will develop critical thinking and problem-solving skills by examining practical scenarios, identifying legal risks, and proposing appropriate legal strategies to address them.</p> <p>CO4: Enhance professional skills and ethical conduct: Students will enhance their professional skills and ethical conduct through their court internship in a corporate legal setting. They will develop effective communication skills, time management, attention to detail, and the ability to work collaboratively in a team environment. They will also understand the importance of ethical conduct and professional responsibility in corporate legal practice.</p> <p>CO5: Reflect on the experience and identify areas for professional growth: Students will reflect on their court internship experience in corporate legal training and identify areas for their professional growth. They will evaluate their strengths and weaknesses, assess their performance, and set goals for continuous improvement. They will develop self-awareness and a commitment to lifelong learning and professional development in the field of corporate law.</p>

**4<sup>TH</sup> YEAR 7<sup>TH</sup> SEMESTER**

42.	BALB-701	<b>LEGAL METHOD AND LEGAL SYSTEM</b>	<p>CO1: evaluate the fundamental principles of legal method: Students will develop an understanding of the fundamental principles of legal method, including legal reasoning, interpretation, analysis, and problem-solving techniques. They will learn how to identify and apply legal rules, principles, and precedents to legal issues.</p> <p>CO2: Acquire research skills and legal writing techniques: Students will acquire research skills and legal writing techniques necessary for effective legal analysis and communication. They will learn how to conduct legal research using primary and secondary sources, critically analyze legal materials, and present their findings in a clear and concise manner through legal writing.</p> <p>CO3: Analyze the structure and operation of the legal system: Students will analyze the structure and operation of the legal system, including the roles and functions of various legal institutions, such as courts, legislative bodies, and administrative agencies. They will gain an understanding of the hierarchy of courts, jurisdictional principles, and the process of law-making.</p> <p>CO4: Evaluate the relationship between law and society: Students will evaluate the relationship between law and society, including the social, economic, and political factors that shape legal systems. They will critically analyze the impact of law on individuals and communities, and the role of law in promoting justice, equality, and social change.</p> <p>CO5: Apply legal method and understanding of the legal system to practical scenarios: Students will apply their knowledge of legal method and the legal system to analyze and propose solutions to practical legal scenarios. They will develop critical thinking and problem-solving skills by examining real-world legal</p>
43	BALB-702	<b>RAJASTHAN LAND LAWS</b>	

*Supriya*

			<p>issues and identifying legal rights, obligations, and remedies. They will propose legal strategies and recommendations based on their understanding of legal method and the functioning of the legal system.</p> <p>CO1: examine the key provisions of Rajasthan Land Laws: Students will develop a comprehensive understanding of the key provisions of Rajasthan Land Laws, including acts, regulations, and policies related to land ownership, land acquisition, land use planning, and land administration. They will study the Rajasthan Tenancy Act, Rajasthan Land Revenue Act, and other relevant legislation.</p> <p>CO2: Analyze the rights and responsibilities of landowners and tenants: Students will analyze the rights, duties, and responsibilities of landowners and tenants under Rajasthan Land Laws. They will examine the provisions related to agricultural tenancy, lease agreements, eviction, and compensation. They will understand the legal mechanisms for resolving disputes between landowners and tenants.</p> <p>CO3: Evaluate the process of land acquisition and compensation: Students will evaluate the process of land acquisition and the principles of compensation under Rajasthan Land Laws. They will study the procedures for acquiring land for public purposes, the determination of compensation, and the rights of landowners and affected parties. They will analyze the legal safeguards and limitations on the exercise of eminent domain.</p> <p>CO4: Examine land use planning and development regulations: Students will examine the land use planning and development regulations under Rajasthan Land Laws. They will study the provisions related to</p>
--	--	--	---

BALB-703		<p>zoning, land conversion, building permits, and environmental impact assessments. They will analyze the legal framework for promoting sustainable land use and development in Rajasthan.</p> <p>CO5: Apply Rajasthan Land Laws to practical scenarios: Students will apply the provisions of Rajasthan Land Laws to analyze and propose solutions to practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world land-related issues, such as land disputes, land use conflicts, and land development projects. They will propose legal strategies and recommendations based on the provisions of Rajasthan Land Laws to ensure equitable and sustainable land management in the state.</p>
	COMPANY LAW	<p>CO1: analyse the legal framework of company law: Students will develop a comprehensive understanding of the legal framework governing companies, including the Companies Act and related legislation. They will study the formation, incorporation, and types of companies, as well as the rights, duties, and liabilities of company directors, shareholders, and other stakeholders.</p> <p>CO2: Analyze corporate governance principles and practices: Students will analyze corporate governance principles and practices, including the roles and responsibilities of directors, board structures, and mechanisms for ensuring transparency and accountability in corporate decision-making. They will examine the legal framework for shareholder rights, minority protection, and disclosure requirements.</p> <p>CO3: Examine the regulation of company operations and management: Students will examine the regulation of company operations and management, including issues related to corporate contracts, financing, mergers and acquisitions, and corporate restructuring. They will study the legal mechanisms for protecting the interests of creditors, employees, and other stakeholders.</p>

			<p>CO4: Evaluate the legal framework for corporate compliance and enforcement: Students will evaluate the legal framework for corporate compliance and enforcement, including company audits, investigation and prosecution of corporate offenses, and regulatory oversight by authorities such as the Registrar of Companies and the Securities and Exchange Board of India (SEBI).</p> <p>CO5: Apply company law principles to practical scenarios: Students will apply company law principles to analyze and propose solutions to practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world corporate issues, such as corporate governance failures, shareholder disputes, and legal challenges in corporate transactions. They will propose legal strategies and recommendations to ensure compliance with company law and promote the effective functioning of companies.</p>
<b>BALB-704</b>	<b>CODE OF CIVIL PROCEDURE</b>		<p>CO1: identify the structure and key provisions of the Code of Civil Procedure (CPC): Students will develop a comprehensive understanding of the structure and key provisions of the Code of Civil Procedure. They will study the various stages of civil litigation, including jurisdiction, pleading, discovery, evidence, and judgments. They will become familiar with the terminology, procedural rules, and principles governing civil proceedings.</p> <p>CO2: Analyze the procedural aspects of civil litigation: Students will analyze the procedural aspects of civil litigation as outlined in the Code of Civil Procedure. They will examine the process of filing and responding to a civil suit, the methods of service of summons, the principles of pleadings, and the requirements for maintaining a civil action. They will understand the timelines, documentation, and formalities involved in civil proceedings.</p> <p>CO3: Apply the principles of jurisdiction and forum</p>

		<p>selection: Students will apply the principles of jurisdiction and forum selection as provided in the Code of Civil Procedure. They will learn to determine the appropriate court where a civil case should be filed based on jurisdictional rules and factors such as territorial jurisdiction, subject matter jurisdiction, and pecuniary jurisdiction. They will understand the significance of forum selection in civil litigation.</p> <p>CO4: Evaluate the process of evidence and trial: Students will evaluate the process of evidence and trial in civil proceedings as per the Code of Civil Procedure. They will study the rules governing the admissibility of evidence, the examination and cross-examination of witnesses, the role of experts, and the presentation of documents and exhibits. They will understand the procedures for conducting a civil trial, including arguments, rebuttals, and final judgment.</p> <p>CO5: Analyze alternative dispute resolution mechanisms: Students will analyze alternative dispute resolution mechanisms provided in the Code of Civil Procedure, such as mediation, arbitration, and conciliation. They will understand the advantages, limitations, and procedures involved in these mechanisms. They will be able to evaluate the appropriateness of alternative dispute resolution methods in different civil cases and propose effective dispute resolution strategies.</p>
BALB-705	<b>ELECTIVE II CRIMINOLOGY, PENOLOGY AND VICTIMOLOGY</b>	<p>CO1: examine the concepts and theories of criminology: Students will develop a comprehensive understanding of the concepts, theories, and perspectives of criminology. They will study the causes and explanations of criminal behavior, including biological, psychological, sociological, and environmental factors. They will analyze the different schools of thought in criminology, such as classical, positivist, and critical criminology.</p> <p>CO2: Examine the principles and practices of penology: Students will examine the principles and practices of penology, which encompass the study of</p>

		<p>punishment and rehabilitation of offenders. They will study various forms of punishment, including imprisonment, probation, and community-based corrections. They will analyze the goals, effectiveness, and ethical considerations of different penological approaches.</p> <p>CO3: Analyze the impact of crime on victims: Students will analyze the impact of crime on victims and understand the field of victimology. They will study the psychological, emotional, and physical effects of victimization, as well as the social and legal responses to victims. They will examine victim support services, victim rights, and strategies for promoting victim empowerment and justice.</p> <p>CO4: Evaluate crime prevention strategies and criminal justice policies: Students will evaluate crime prevention strategies and criminal justice policies aimed at reducing crime and enhancing public safety. They will study the concepts of deterrence, rehabilitation, retribution, and restorative justice. They will analyze the effectiveness and ethical implications of various crime prevention and intervention programs.</p> <p>CO5: Apply criminological theories and principles to practical scenarios: Students will apply criminological theories and principles to analyze and propose solutions to practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world crime-related issues, such as the causes of specific crimes, the evaluation of criminal justice policies, and the development of crime prevention initiatives. They will propose evidence-based strategies and recommendations to address criminological challenges and promote a just and safe society.</p>
	<b>BALB-706</b>	<p><b>MOOT COURT-II</b></p> <p>CO1: Enhance oral advocacy skills: Students will enhance their oral advocacy skills through participation in Moot Court-II. They will develop the ability to effectively present legal arguments, engage</p>

			<p>in persuasive communication, and respond to questions and challenges from the bench. They will practice oral presentation techniques, including voice modulation, clarity, and courtroom etiquette.</p> <p>CO2: Improve legal research and writing skills: Students will improve their legal research and writing skills by preparing written submissions for Moot Court-II. They will conduct in-depth legal research on the assigned case, analyze relevant precedents, statutes, and legal principles, and draft persuasive written arguments. They will develop the ability to structure legal arguments, cite authorities, and provide logical and well-reasoned legal analysis.</p> <p>CO3: Develop case analysis and critical thinking skills: Students will develop case analysis and critical thinking skills through the preparation and presentation of their case in Moot Court-II. They will analyze the assigned case from multiple perspectives, identify legal issues, and apply relevant laws and precedents to support their arguments. They will develop the ability to assess the strengths and weaknesses of their own case and anticipate counter-arguments.</p> <p>CO4: Enhance teamwork and collaborative skills: Students will enhance their teamwork and collaborative skills by working in teams to prepare for Moot Court-II. They will divide responsibilities, coordinate research and writing efforts, and engage in constructive discussions and debates to strengthen their arguments. They will learn to collaborate effectively with their peers and develop teamwork skills essential for success in a legal setting.</p> <p>CO5: Gain courtroom experience and professional demeanor: Students will gain valuable courtroom experience and develop a professional demeanor through their participation in Moot Court-II. They will have the opportunity to present their case before a mock court, gain confidence in public speaking, and</p>
--	--	--	--

		exhibit professionalism in their demeanor, attire, and conduct. They will learn to handle courtroom procedures, adhere to ethical standards, and demonstrate respect for the judicial process.
--	--	--

#### 4<sup>TH</sup> YEAR 8<sup>TH</sup> SEMESTER

	<b>PROFESSIONAL ETHICS</b>	<p>CO1: develop the principles of professional ethics: Students will develop an understanding of the principles and values that guide professional ethics in the legal profession. They will study the importance of integrity, honesty, confidentiality, and professionalism in the practice of law. They will explore the ethical responsibilities towards clients, colleagues, the court, and society.</p> <p>CO2: Analyze ethical dilemmas and decision-making: Students will analyze ethical dilemmas commonly faced by legal professionals and develop skills in ethical decision-making. They will study case studies and scenarios that present conflicting interests, confidentiality issues, conflicts of interest, and other ethical challenges. They will learn to identify and analyze the ethical dimensions of such situations and propose appropriate courses of action.</p> <p>CO3: Examine professional conduct rules and regulations: Students will examine the rules and regulations governing professional conduct in the legal profession. They will study the codes of conduct, disciplinary rules, and regulations established by professional bodies and legal authorities. They will understand the disciplinary processes and consequences for violations of professional ethics.</p> <p>CO4: Evaluate the role of lawyers as officers of the court: Students will evaluate the role of lawyers as officers of the court and the obligations they have towards the administration of justice. They will explore the principles of advocacy, fairness, and truthfulness in the courtroom. They will understand the ethical responsibilities in presenting evidence, cross-examining witnesses, and interacting with judges and</p>
<b>BALB-801</b>		

			<p>opposing counsel.</p> <p>CO5: Apply professional ethics to real-world legal scenarios: Students will apply the principles of professional ethics to analyze and propose solutions to real-world legal scenarios. They will develop critical thinking and problem-solving skills by examining ethical issues in legal practice, such as conflicts of interest, client confidentiality, professional responsibility, and the duty to uphold justice. They will propose ethical strategies and recommendations for navigating complex situations and upholding the highest standards of professional conduct.</p>
	BALB-802	<b>CORPORATE LAWS</b>	<p>CO1: evaluate the legal framework of corporate laws: Students will develop a comprehensive understanding of the legal framework governing corporate laws, including the Companies Act, Securities and Exchange Board of India (SEBI) regulations, and other relevant legislation. They will study the formation, incorporation, and types of companies, as well as the rights, duties, and liabilities of company directors, shareholders, and other stakeholders.</p> <p>CO2: Analyze corporate governance principles and practices: Students will analyze corporate governance principles and practices, including the roles and responsibilities of directors, board structures, and mechanisms for ensuring transparency and accountability in corporate decision-making. They will examine the legal framework for shareholder rights, minority protection, and disclosure requirements.</p> <p>CO3: Examine the regulation of corporate transactions: Students will examine the regulation of corporate transactions, including mergers and acquisitions, amalgamations, and corporate restructuring. They will study the legal procedures, requirements, and implications of these transactions, including the role of regulatory authorities such as the National Company Law Tribunal (NCLT).</p> <p>CO4: Evaluate the legal framework for securities and</p>

			<p>capital markets: Students will evaluate the legal framework for securities and capital markets, including the regulations governing public offerings, listing requirements, and insider trading. They will study the roles and responsibilities of market intermediaries and the legal mechanisms for investor protection.</p> <p>CO5: Apply corporate laws to practical scenarios: Students will apply the provisions of corporate laws to analyze and propose solutions to practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world corporate issues, such as corporate governance failures, shareholder disputes, and legal challenges in corporate transactions. They will propose legal strategies and recommendations to ensure compliance with corporate laws and promote the effective functioning of companies in the corporate sector.</p>
	<b>BALB-803</b>	<b>LAW OF TAXATION</b>	<p>CO1: identify the principles and concepts of taxation: Students will develop a comprehensive understanding of the principles and concepts underlying taxation. They will study the various types of taxes, such as income tax, goods and services tax (GST), corporate tax, and wealth tax. They will explore the principles of taxation, including equity, efficiency, simplicity, and administrability.</p> <p>CO2: Analyze the legal framework of taxation: Students will analyze the legal framework governing taxation, including the Income Tax Act, GST Act, and other relevant tax laws and regulations. They will study the provisions related to tax liability, assessment, exemptions, deductions, and penalties. They will understand the roles and powers of tax authorities and the procedures for filing tax returns and resolving tax disputes.</p> <p>CO3: Examine the tax implications for individuals and businesses: Students will examine the tax implications for individuals and businesses, including the computation of taxable income, tax planning</p>

			<p>strategies, and compliance requirements. They will study the provisions related to deductions, allowances, exemptions, and tax credits. They will analyze the tax implications of various business transactions, such as mergers, acquisitions, and international transactions.</p> <p>CO4: Evaluate the tax implications for investments and financial planning: Students will evaluate the tax implications for investments and financial planning. They will study the tax treatment of various investment instruments, such as stocks, bonds, mutual funds, and real estate. They will analyze the tax implications of retirement planning, insurance policies, and other financial decisions.</p> <p>CO5: Apply tax laws to practical scenarios: Students will apply the provisions of tax laws to analyze and propose solutions to practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world tax issues, such as tax planning for individuals and businesses, tax evasion and avoidance, and tax implications of specific transactions. They will propose tax-efficient strategies and recommendations to ensure compliance with tax laws and optimize tax liabilities.</p>
	BALB-804	INTELLECTUAL PROPERTY RIGHTS AND MANAGEMENT	<p>CO1: evaluate the basics of intellectual property rights (IPR): Students will develop a comprehensive understanding of the fundamentals of intellectual property rights, including copyright, trademarks, patents, and trade secrets. They will study the legal frameworks, principles, and objectives of IPR protection, and the international conventions and treaties governing intellectual property.</p> <p>CO2: Analyze the legal protection and enforcement of IPR: Students will analyze the legal mechanisms for the protection and enforcement of intellectual property rights. They will study the registration procedures, duration, and scope of protection for different types of intellectual property. They will understand the remedies available for infringement and the role of</p>

			<p>courts and administrative bodies in IPR enforcement.</p> <p>CO3: Examine the management of intellectual property: Students will examine the management of intellectual property, including licensing, technology transfer, and commercialization of IP assets. They will study the negotiation and drafting of IP agreements, the valuation of intellectual property, and the strategies for maximizing the value and commercial potential of IP assets.</p> <p>CO4: Evaluate the impact of IPR on innovation and creativity: Students will evaluate the impact of intellectual property rights on innovation, creativity, and economic development. They will explore the balance between promoting innovation through IP protection and ensuring access to knowledge and cultural expression. They will analyze the challenges and opportunities associated with the intersection of IPR and emerging technologies.</p> <p>CO5: Apply IPR principles to real-world scenarios: Students will apply the principles of intellectual property rights to analyze and propose solutions to real-world scenarios and case studies. They will develop critical thinking and problem-solving skills by examining issues such as IP infringement, licensing disputes, technology transfer agreements, and the ethical implications of IPR. They will propose strategies and recommendations for effective IP management, protection, and enforcement in different industries and sectors.</p>
	BALB-805	<b>ELECTIVE III MILITARY LAW</b>	<p>CO1: identify the legal framework of military law: Students will develop a comprehensive understanding of the legal framework governing military law, including the Armed Forces Act, Rules and Regulations, and other relevant legislation. They will study the structure, organization, and jurisdiction of military courts and the legal provisions that apply specifically to military personnel.</p> <p>CO2: Analyze the rights and responsibilities of</p>

			<p>military personnel: Students will analyze the rights and responsibilities of military personnel under military law. They will study the disciplinary code, rules of conduct, and ethical standards that govern military operations. They will understand the limitations on fundamental rights and freedoms for maintaining discipline and ensuring operational effectiveness.</p> <p>CO3: Examine military justice systems: Students will examine the military justice systems, including the procedures for investigation, trial, and punishment of military offenses. They will study the roles and powers of military judges, prosecutors, and defense counsels. They will understand the principles of due process, fair trial, and judicial review within the military justice system.</p> <p>CO4: Evaluate the law of armed conflict: Students will evaluate the law of armed conflict, including international humanitarian law (IHL) and its application to military operations. They will study the legal principles and rules that regulate the conduct of armed forces during armed conflicts, including the protection of civilians, prisoners of war, and cultural property.</p> <p>CO5: Apply military law principles to practical scenarios: Students will apply the provisions of military law to analyze and propose solutions to practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world military legal issues, such as military discipline, court-martial proceedings, and the legal challenges arising from military operations. They will propose legal strategies and recommendations to ensure compliance with military law and promote the effective functioning of military institutions.</p>

*Subin*

		<p><b>DRAFTING, PLEADING AND CONVEYANCING</b></p> <p>Students will develop a comprehensive understanding of the principles and techniques involved in drafting legal documents. They will study the structure and format of legal documents, the use of precise and clear language, and the incorporation of legal terms and clauses. They will learn how to identify and address the specific requirements and objectives of different types of legal documents.</p> <p>CO2: Analyze the process of pleading: Students will analyze the process of pleading in civil and criminal cases. They will study the different stages of pleading, including the filing of complaints, written statements, petitions, and written arguments. They will learn how to draft pleadings that effectively present the client's case, assert legal claims, and respond to opposing arguments.</p> <p>CO3: Examine the art of conveyancing: Students will examine the art of conveyancing, which involves the drafting and preparation of legal documents for the transfer of property rights. They will study the legal requirements and procedures for drafting deeds, contracts, agreements, and other documents related to the transfer of property. They will learn how to ensure the accuracy and completeness of conveyancing documents and address potential legal issues.</p> <p>CO4: Develop drafting and pleading skills: Students will develop their drafting and pleading skills through practical exercises and assignments. They will have opportunities to draft various legal documents, such as contracts, agreements, petitions, and written arguments. They will receive feedback and guidance to improve their drafting style, organization, and clarity of expression.</p> <p>CO5: Apply drafting, pleading, and conveyancing principles to real-world scenarios: Students will apply the principles of drafting, pleading, and conveyancing to analyze and propose solutions to real-world legal scenarios. They will develop critical thinking and</p>
--	--	--

*Signature*

			problem-solving skills by examining legal issues and drafting appropriate legal documents. They will learn to anticipate potential challenges and address the needs of clients effectively through their drafting, pleading, and conveyancing skills.
	BALB-904	<b>PUBLIC INTERNATIONAL LAW</b>	<p>CO1: analyse the nature and scope of public international law: Students will develop a comprehensive understanding of the nature, sources, and scope of public international law. They will study the principles and concepts that govern the relations between states and other international actors, including international organizations and individuals. They will explore the role of treaties, customary international law, and general principles in shaping the international legal framework.</p> <p>CO2: Analyze the subjects and institutions of international law: Students will analyze the subjects of international law, including states, international organizations, and individuals. They will study the legal personality, rights, and obligations of these subjects in international law. They will examine the role and functioning of international institutions, such as the United Nations, in the maintenance of international peace and security.</p> <p>CO3: Examine key areas of international law: Students will examine key areas of international law, including international human rights law, international humanitarian law, international criminal law, and international environmental law. They will study the legal principles, treaties, and mechanisms that govern these areas, and they will analyze the challenges and complexities involved in their implementation and enforcement.</p>

*Spring*

		<p>CO4: Evaluate the resolution of international disputes: Students will evaluate the mechanisms for the peaceful settlement of international disputes. They will study the role of international courts and tribunals, such as the International Court of Justice, in adjudicating disputes between states. They will also explore alternative dispute resolution methods, including negotiation, mediation, and arbitration.</p> <p>CO5: Apply international law principles to practical scenarios: Students will apply the principles of public international law to analyze and propose solutions to practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world international legal issues, such as territorial disputes, human rights violations, and conflicts between states. They will propose legal strategies and recommendations to promote compliance with international law and foster peaceful relations between states.</p>
	<b>ELECTIVE IV CYBER LAWS</b>	<p>CO1: identify the concepts and principles of cyber laws: Students will develop a comprehensive understanding of the concepts and principles of cyber laws. They will study the legal frameworks, national and international, governing cyberspace and the digital environment. They will explore the fundamental principles of cyber laws, such as jurisdiction, privacy, data protection, and cybercrime.</p> <p>CO2: Analyze the legal challenges in cyberspace: Students will analyze the legal challenges posed by cyberspace and emerging technologies. They will study the legal issues related to data breaches, hacking, identity theft, online defamation, intellectual property infringement, and other cybercrimes. They will examine the complexities of cross-border cybercrimes and the legal frameworks for international cooperation in combating cyber threats.</p> <p>CO3: Examine the regulatory mechanisms in cyber laws: Students will examine the regulatory</p>

*Signature*

			<p>mechanisms in cyber laws, both at the national and international levels. They will study the roles and responsibilities of governmental agencies, law enforcement, and international organizations in enforcing cyber laws and ensuring cybersecurity. They will explore the legal frameworks for digital rights, freedom of expression, and access to information in cyberspace.</p> <p>CO4: Evaluate the legal aspects of e-commerce and digital transactions: Students will evaluate the legal aspects of e-commerce and digital transactions. They will study the legal requirements for electronic contracts, digital signatures, online payment systems, and consumer protection in online transactions. They will explore the legal frameworks for intellectual property rights, copyright, and trademark issues in the digital environment.</p> <p>CO5: Apply cyber laws principles to practical scenarios: Students will apply the principles of cyber laws to analyze and propose solutions to practical scenarios and case studies. They will develop critical thinking and problem-solving skills by examining real-world cyber law issues, such as data breaches, cyber-attacks, and online fraud. They will propose legal strategies and recommendations to enhance cybersecurity, protect digital rights, and ensure compliance with cyber laws.</p>
--	--	--	--

	BALB-906	<p><b>MOOT COURT-IV</b></p> <p><b>CO1: Demonstrate advanced oral advocacy skills:</b> Students will demonstrate advanced skills in oral advocacy through participation in moot court simulations. They will develop the ability to effectively present legal arguments, engage in persuasive oral advocacy, and respond to opposing arguments. They will enhance their courtroom presence, poise, and delivery.</p> <p><b>CO2: Analyze and apply legal principles to moot court problems:</b> Students will analyze complex legal issues and apply relevant legal principles to moot court problems. They will conduct thorough legal research, identify applicable case law and statutes, and construct sound legal arguments. They will demonstrate a deep understanding of substantive law and its application in practical scenarios.</p> <p><b>CO3: Prepare written submissions:</b> Students will prepare well-reasoned and persuasive written submissions for moot court competitions. They will develop the skills to craft clear, concise, and logical legal arguments in written form. They will adhere to appropriate citation and formatting standards, ensuring accuracy and professionalism in their written work.</p> <p><b>CO4: Engage in legal analysis and critical thinking:</b> Students will engage in legal analysis and critical thinking during moot court exercises. They will evaluate and critique legal arguments presented by their peers and opposing teams. They will identify strengths and weaknesses in legal reasoning and propose effective counterarguments.</p> <p><b>CO5: Exhibit professionalism and ethical conduct:</b> Students will exhibit professionalism and ethical conduct throughout the moot court process. They will adhere to the rules and procedures of the moot court competition, demonstrate respect for colleagues and judges, and maintain integrity in their advocacy. They will uphold the ethical responsibilities and obligations of legal</p>

### **B.A LL.B 5<sup>TH</sup> YEAR 10<sup>TH</sup> SEMESTER**

There will be a six months Internship consisting VIVA VOCE,

Examinations and project submission:

1. CIVIL LAWS
2. CRIMINAL LAWS
3. PROJECT

## Course Outcomes of BBA LL.B

S.NO	Course Code	Course Title	Course Outcomes
<b>FIRST SEMESTER</b>			
1	BBLB-103	<b>INTRODUCTION TO MANAGEMENT</b>	<p>CO1: demonstrate the fundamentals of management: Students will develop an understanding of the basic principles, concepts, and functions of management. They will study the different management theories, approaches, and styles, and how they apply to various organizational contexts.</p> <p>CO2: Analyze the functions of management: Students will analyze the key functions of management, including planning, organizing, leading, and controlling. They will examine the processes involved in each function and understand their significance in achieving organizational goals and objectives.</p> <p>CO3: Examine organizational structures and design: Students will examine different types of organizational structures and design, such as functional, divisional, matrix, and network structures. They will understand the advantages and disadvantages of each structure and how they impact organizational effectiveness and efficiency.</p> <p>CO4: Develop effective leadership and communication skills: Students will develop effective leadership and communication skills necessary for managing individuals and teams. They will study different leadership styles and techniques, and learn how to communicate effectively, motivate employees, resolve conflicts, and promote teamwork.</p> <p>CO5: Apply management principles to practical situations: Students will apply management principles and concepts to practical situations and case studies. They</p>

			will develop critical thinking and problem-solving skills by analyzing real-world management challenges and proposing appropriate strategies and solutions.
2	BBLB-104	FUNDAMENTALS OF ACCOUNTANCY	<p>CO1: analyse the basic concepts and principles of accounting: Students will develop an understanding of the fundamental concepts and principles of accounting, including the accounting equation, double-entry bookkeeping, accrual basis of accounting, and the concept of matching expenses with revenues.</p> <p>CO2: Apply accounting techniques for recording and analyzing financial transactions: Students will learn how to record financial transactions using journals, ledgers, and trial balances. They will apply accounting techniques to analyze financial data and prepare financial statements such as the income statement, balance sheet, and cash flow statement.</p> <p>CO3: Interpret financial statements: Students will develop the skills to interpret financial statements and understand the information they provide about a company's financial performance and position. They will analyze financial ratios, such as profitability ratios, liquidity ratios, and solvency ratios, to evaluate a company's financial health.</p> <p>CO4: Apply accounting principles in decision-making: Students will learn how to use accounting information to make informed business decisions. They will apply cost accounting techniques to analyze the cost and profitability of products or services. They will also understand the relevance of budgeting and variance analysis in managerial decision-making.</p>

*Superior*

			<p>CO5: Comply with accounting regulations and standards: Students will understand the importance of complying with accounting regulations and standards. They will learn about the principles and guidelines set by accounting bodies, such as Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS), and how to prepare financial statements in accordance with these standards.</p> <p><b>SECOND SEMESTER</b></p>
3	BALB-201	ENVIRONMENTAL STUDIES	<p>CO1: demonstrate the basic concepts and principles of environmental studies: Students will develop an understanding of the basic concepts and principles of environmental studies, including ecosystems, biodiversity, natural resources, pollution, climate change, and sustainable development.</p> <p>CO2: Identify and analyze environmental issues and challenges: Students will be able to identify and analyze various environmental issues and challenges faced at local, regional, and global levels. They will explore the causes and consequences of environmental problems, such as air and water pollution, deforestation, habitat loss, and resource depletion.</p> <p>CO3: Evaluate the impact of human activities on the environment: Students will evaluate the impact of human activities on the environment and ecosystems. They will study the interrelationships between human actions, economic development, and environmental degradation. They will analyze the environmental implications of industrialization, urbanization, agriculture, and waste management.</p> <p>CO4: Examine sustainable solutions and</p>

*Supriya*

			<p>practices: Students will examine sustainable solutions and practices for environmental conservation and management. They will explore strategies for promoting renewable energy, waste reduction, recycling, conservation of biodiversity, and sustainable agriculture. They will analyze the role of government policies, international agreements, and public awareness in achieving sustainability.</p> <p>CO5: Foster environmental stewardship and ethical responsibility: Students will develop a sense of environmental stewardship and ethical responsibility towards the environment. They will understand the importance of promoting environmental justice, community participation, and responsible consumer choices. They will explore ways to engage in sustainable practices and advocate for environmental protection.</p>
4	BBALB-202	<b>INTRODUCTION TO MARKETING</b>	<p>CO1: identify the fundamental concepts of marketing: Students will develop an understanding of the basic concepts and principles of marketing, including the marketing mix (product, price, place, promotion), target market segmentation, consumer behavior, and marketing research.</p> <p>CO2: Analyze market opportunities and competition: Students will analyze market opportunities and competition by conducting market research, identifying target markets, and assessing customer needs and preferences. They will understand the importance of market analysis in developing effective marketing strategies.</p> <p>CO3: Develop marketing strategies and plans: Students will develop marketing strategies and plans to meet organizational objectives. They will learn how to identify marketing objectives, formulate marketing strategies, and develop action plans for product development, pricing, distribution, and</p>

			<p>promotion.</p> <p>CO4: Apply marketing tactics and tools: Students will apply marketing tactics and tools to execute marketing strategies effectively. They will learn about advertising, sales promotion, public relations, digital marketing, and other marketing communication techniques. They will develop skills in creating marketing campaigns and managing marketing channels.</p> <p>CO5: Evaluate marketing performance and make informed decisions: Students will learn how to measure and evaluate marketing performance using key performance indicators (KPIs) and marketing metrics. They will analyze marketing data to make informed decisions, adjust marketing strategies, and improve marketing effectiveness.</p>
5	BBALB-203	<b>BUSINESS ORGANISATION</b>	<p>CO1: analyse the different forms of business organizations: Students will develop an understanding of various forms of business organizations, including sole proprietorships, partnerships, corporations, and limited liability companies. They will explore the advantages, disadvantages, and legal requirements associated with each form.</p> <p>CO2: Analyze the factors influencing choice of business organization: Students will analyze the factors that influence the choice of a particular business organization. They will consider factors such as liability protection, taxation, capital requirements, management structure, and ownership rights in determining the most suitable form of organization for a given business.</p> <p>CO3: Comprehend the legal and regulatory framework for business organizations: Students will comprehend the legal and regulatory framework governing business organizations. They will study company law, partnership law, and relevant statutes and regulations</p>

*Signature*

			<p>related to business registration, governance, and compliance.</p> <p>CO4: Evaluate the implications of business organization decisions: Students will evaluate the implications of business organization decisions on various aspects of the business, such as ownership, control, financing, and liability. They will understand how different organizational structures affect the rights and responsibilities of stakeholders.</p> <p>CO5: examine the process of business formation and dissolution: Students will understand the process of forming a business organization, including registration, documentation, and compliance with legal requirements. They will also learn about the procedures and implications of business dissolution or transformation.</p>
6	BBALB-204	<b>BUSINESS ENVIRONMENT</b>	<p>CO1: evaluate the concept of business environment: Students will develop an understanding of the business environment and its components, including the internal and external factors that influence business operations. They will explore the dynamic nature of the business environment and its impact on organizational decision-making.</p> <p>CO2: Analyze the economic environment: Students will analyze the economic factors that shape the business environment, such as economic systems, market conditions, inflation, interest rates, and fiscal and monetary policies. They will understand how these factors impact business performance and decision-making.</p> <p>CO3: Evaluate the political and legal environment: Students will evaluate the political and legal factors that affect businesses, including government policies, regulations, trade laws, intellectual property rights, and political stability. They will understand the importance of complying with legal</p>

*Subir*

			<p>requirements and adapting to political changes.</p> <p>CO4: Assess the socio-cultural environment: Students will assess the socio-cultural factors that influence business operations, such as cultural values, social norms, consumer behavior, demographic trends, and ethical considerations. They will understand the significance of aligning business strategies with societal expectations.</p> <p>CO5: Analyze the technological and competitive environment: Students will analyze the technological advancements and competitive forces that shape the business environment. They will explore the impact of technology on business models, innovation, digital transformation, and industry competition.</p>
		<b>3<sup>RD</sup> SEMESTER</b>	
<b>8</b>	<b>BBLB-302</b>	<b>INTRODUCTION TO HUMAN RESOURCE MANAGEMENT</b>	<p>CO1: identify the concept and importance of human resource management: Students will develop an understanding of the concept of human resource management (HRM) and its significance in organizations. They will learn about the role of HRM in managing human capital, attracting and retaining talent, and fostering employee engagement and productivity.</p> <p>CO2: Identify key HRM functions and activities: Students will identify and describe the key functions and activities of HRM, including recruitment and selection, training and development, performance management, compensation and benefits, employee relations, and HR planning. They will understand how these functions contribute to organizational success.</p> <p>CO3: Analyze HRM strategies and policies: Students will analyze HRM strategies and policies and their alignment with organizational goals and objectives. They will examine how HRM practices can support a diverse and</p>

*[Handwritten Signature]*

			<p>inclusive workforce, promote employee well-being, and ensure compliance with labor laws and regulations.</p> <p>CO4: Develop skills in HRM processes: Students will develop practical skills in various HRM processes, such as job analysis, job design, interviewing techniques, performance appraisal, and employee training and development. They will learn how to apply these processes effectively to enhance organizational performance and employee satisfaction.</p> <p>CO5: analyse the ethical and legal considerations in HRM: Students will understand the ethical and legal considerations in HRM, including equal employment opportunity, diversity and inclusion, privacy and confidentiality, and employee rights. They will explore ethical dilemmas in HRM decision-making and the importance of adhering to ethical and legal standards.</p>
--	--	--	---

#### FOURTH SEMESTER

9	BBLB-401	OPERATIONS MANAGEMENT	<p>CO1: determine the concept and scope of operations management: Students will develop an understanding of the concept and scope of operations management, including its role in managing the production and delivery of goods and services. They will explore the key elements of operations management, such as process design, capacity planning, inventory management, and quality control.</p> <p>CO2: Analyze operations strategy and competitive advantage: Students will analyze operations strategy and its impact on achieving competitive advantage. They will understand the importance of aligning operations with overall business goals, considering factors such as cost, quality, speed, flexibility, and innovation. They will explore different approaches to operations strategy, such as lean management, total quality management,</p>
---	----------	-----------------------	---

			<p>and supply chain management.</p> <p>CO3: Apply techniques for process design and improvement: Students will learn and apply techniques for process design and improvement. They will understand concepts such as process flow, process mapping, and process analysis to identify bottlenecks, inefficiencies, and opportunities for improvement. They will explore methodologies like Six Sigma and Lean Six Sigma for process optimization.</p> <p>CO4: demonstrate principles of supply chain management: Students will understand the principles of supply chain management and the importance of coordination and collaboration among different entities in the supply chain. They will explore topics such as supplier selection, procurement, logistics, distribution, and risk management. They will analyze strategies for achieving an efficient and responsive supply chain.</p> <p>CO5: Apply tools for operations planning and control: Students will learn and apply tools for operations planning and control. They will understand concepts such as forecasting, capacity planning, production scheduling, inventory management, and quality control. They will utilize tools like Gantt charts, material requirements planning (MRP), and quality control techniques to optimize operations efficiency and effectiveness.</p>
10	BBLB-402	<b>SERVICES MANAGEMENT</b>	<p>CO1: evaluate the nature and characteristics of services: Students will develop an understanding of the unique nature and characteristics of services compared to tangible products. They will learn about intangibility, inseparability, variability, and perishability as key attributes of services and their implications for service management.</p> <p>CO2: Analyze service design and development: Students will analyze the</p>

			<p>process of service design and development, including identifying customer needs, creating service concepts, designing service processes, and incorporating customer feedback. They will understand the importance of customer-centricity and service innovation in creating value for customers.</p> <p>CO3: Evaluate service quality and customer satisfaction: Students will learn how to evaluate service quality and measure customer satisfaction. They will understand the various dimensions of service quality, such as reliability, responsiveness, assurance, empathy, and tangibles. They will explore techniques for gathering and analyzing customer feedback to improve service performance.</p> <p>CO4: Develop service delivery strategies: Students will develop strategies for delivering services effectively and efficiently. They will learn about service delivery models, customer interaction processes, service recovery, and service operations management. They will explore approaches for managing service capacity, demand, and waiting times.</p> <p>CO5: identify service marketing and customer relationship management: Students will understand the principles of service marketing and customer relationship management (CRM). They will explore topics such as service branding, pricing strategies, service promotion, and customer loyalty. They will learn how to build strong customer relationships and enhance customer lifetime value.</p>
11	BBLB-403	PROJECT MANAGEMENT	<p>CO1: examine the principles and concepts of project management: Students will develop an understanding of the principles and concepts underlying project management. They will learn about project life cycles, project stakeholders, project objectives, and the</p>

*Spring*

			<p>role of project managers in planning, executing, and closing projects.</p> <p>CO2: Apply project management tools and techniques: Students will learn and apply various project management tools and techniques. They will understand the importance of project planning, scheduling, and budgeting. They will explore tools such as work breakdown structure (WBS), Gantt charts, critical path analysis, and risk assessment to effectively manage project scope, time, cost, and risks.</p> <p>CO3: Develop project plans and schedules: Students will develop project plans and schedules using appropriate tools and techniques. They will learn how to define project scope, set project objectives, create work packages, and estimate task durations. They will develop project schedules considering dependencies, resource availability, and critical paths.</p> <p>CO4: Manage project resources and teams: Students will learn how to manage project resources and teams effectively. They will understand the importance of resource allocation, team building, and conflict resolution in project success. They will explore techniques for motivating team members, monitoring progress, and ensuring project deliverables are met.</p> <p>CO5: Evaluate project performance and success: Students will learn how to evaluate project performance and determine project success. They will understand the importance of monitoring project progress, tracking key performance indicators (KPIs), and conducting project reviews. They will assess project outcomes against planned objectives and identify lessons learned for future projects.</p>
		<b>3<sup>RD</sup> YEAR 5<sup>TH</sup> SEMESTER</b>	

*Signature*

12	BBLB-501	<b>CORPORATE GOVERNANCE AND BUSINESS ETHICS</b>	<p>CO1: analyse the concept and importance of corporate governance: Students will develop an understanding of corporate governance and its significance in organizations. They will learn about the principles, structures, and mechanisms that promote transparency, accountability, and ethical behavior in corporate decision-making and management.</p> <p>CO2: Analyze corporate governance practices and frameworks: Students will analyze different corporate governance practices and frameworks. They will explore codes of conduct, corporate governance guidelines, and regulatory frameworks that govern corporate behavior and protect the interests of stakeholders. They will understand the role of boards of directors, shareholders, and other governance mechanisms.</p> <p>CO3: Evaluate ethical decision-making in business: Students will evaluate ethical decision-making in business contexts. They will learn ethical theories and principles and apply them to analyze and resolve ethical dilemmas in corporate settings. They will understand the importance of ethical behavior, integrity, and corporate social responsibility in building sustainable businesses.</p> <p>CO4: Assess corporate social responsibility (CSR): Students will assess the concept and practice of corporate social responsibility. They will explore how businesses can contribute positively to society through CSR initiatives, environmental sustainability, philanthropy, and responsible business practices. They will understand the ethical and business implications of CSR.</p> <p>CO5: examine the role of business ethics in organizational culture: Students will understand the role of business ethics in shaping organizational culture. They will</p>

*Signature*

			learn how ethical values and norms influence employee behaviour, decision-making, and stakeholder relationships. They will explore strategies for promoting an ethical culture and addressing ethical misconduct.
13	BBLB-502	FINANCIAL SERVICES	<p>CO1: demonstrate the scope and nature of financial services: Students will develop an understanding of the scope and nature of financial services. They will learn about the various types of financial institutions, products, and services available in the market, including banking, insurance, investment, and other financial intermediaries.</p> <p>CO2: Analyze financial markets and instruments: Students will analyze financial markets and instruments. They will learn about the functioning of stock markets, bond markets, foreign exchange markets, and other financial markets. They will explore different financial instruments, such as stocks, bonds, derivatives, and mutual funds, and their characteristics and uses.</p> <p>CO3: Evaluate risk management and financial planning: Students will evaluate risk management and financial planning techniques. They will learn about the concepts of risk and return, diversification, and portfolio management. They will understand the importance of financial planning, budgeting, and cash flow management for individuals and businesses.</p> <p>CO4: Understand regulatory frameworks and compliance: Students will understand the regulatory frameworks and compliance requirements in the financial services industry. They will explore laws and regulations related to banking, insurance, securities, and consumer protection. They will understand the role of regulatory bodies in maintaining market integrity and protecting investors'</p>

			<p>interests.</p> <p>CO5: Apply financial services principles to real-world scenarios: Students will apply financial services principles to real-world scenarios. They will analyze case studies, conduct financial analysis, and make informed financial decisions. They will develop skills in financial planning, risk assessment, investment analysis, and financial product selection.</p>
<b>THIRD YEAR SIXTH SEMESTER</b>			
15	BBLB-601	INDIAN FINANCIAL SYSTEM	<p>CO1: analyse the structure and components of the Indian financial system: Students will develop an understanding of the structure and components of the Indian financial system. They will learn about the roles and functions of various financial institutions, including commercial banks, non-banking financial companies, mutual funds, insurance companies, stock exchanges, and regulatory bodies.</p> <p>CO2: Analyze the regulatory framework of the Indian financial system: Students will analyze the regulatory framework governing the Indian financial system. They will learn about the roles and functions of regulatory bodies such as the Reserve Bank of India (RBI), Securities and Exchange Board of India (SEBI), Insurance Regulatory and Development Authority (IRDA), and other regulatory authorities. They will understand the regulations and policies that govern financial institutions and market participants.</p> <p>CO3: Evaluate the functioning of financial markets in India: Students will evaluate the functioning of financial markets in India. They will learn about the money market, capital market, foreign exchange market, and other financial markets in India. They will understand the role of these markets in mobilizing savings, facilitating investment, and</p>

*Signature*

			<p>promoting economic growth.</p> <p>CO4: evaluate financial products and services in the Indian context: Students will understand various financial products and services available in the Indian financial system. They will learn about banking products, investment instruments, insurance policies, and other financial services offered by different financial institutions. They will analyze the features, benefits, and risks associated with these products and services.</p> <p>CO5: Analyze the challenges and opportunities in the Indian financial system: Students will analyze the challenges and opportunities in the Indian financial system. They will explore issues such as financial inclusion, digital banking, fintech innovations, and financial stability. They will understand the importance of financial literacy, consumer protection, and ethical practices in the Indian financial system.</p>
16	BALB-602	<b>TEAM BUILDING AND LEADERSHIP</b>	<p>CO1: demonstrate the importance of team building and leadership: Students will develop an understanding of the importance of team building and leadership in organizations. They will learn about the benefits of effective teamwork and the role of leadership in guiding and inspiring teams to achieve common goals.</p> <p>CO2: Develop team building skills: Students will develop skills in building and managing teams. They will learn strategies for forming cohesive teams, establishing team norms, and fostering collaboration and communication. They will understand the dynamics of team development and how to handle conflicts and promote a positive team culture.</p> <p>CO3: analyse different leadership styles and approaches: Students will understand different leadership styles and approaches. They will explore various leadership theories and models, such as</p>

*Supriya*

			<p>transformational leadership, situational leadership, and servant leadership. They will analyze the strengths and limitations of different leadership styles and their impact on team performance.</p> <p>CO4: Enhance leadership skills: Students will enhance their leadership skills through self-reflection and experiential learning. They will develop skills in effective communication, decision-making, problem-solving, and motivating team members. They will learn how to adapt their leadership style to different situations and effectively lead diverse teams.</p> <p>CO5: Apply team building and leadership principles in real-world contexts: Students will apply team building and leadership principles in real-world contexts. They will engage in case studies, simulations, and group projects to practice their team building and leadership skills. They will analyze and reflect on their experiences to identify areas for improvement and further development.</p>
		<b>4<sup>TH</sup> YEAR 7<sup>TH</sup> SEMESTER</b>	
17	<b>BBLB-701</b>	<b>CUSTOMER RELATIONSHIP MANAGEMENT</b>	<p>CO1: evaluate the concept and importance of customer relationship management (CRM): Students will develop an understanding of CRM and its significance in organizations. They will learn about the principles, strategies, and technologies used to build and maintain strong customer relationships. They will understand the role of CRM in enhancing customer satisfaction, loyalty, and business performance.</p> <p>CO2: Analyze customer behavior and preferences: Students will analyze customer behavior and preferences to effectively manage customer relationships. They will learn about customer segmentation, profiling, and targeting techniques. They will explore</p>

*Signature*

			<p>methods for gathering and analyzing customer data, including surveys, focus groups, and data analytics, to understand customer needs and preferences.</p> <p>CO3: Develop strategies for customer acquisition and retention: Students will develop strategies for customer acquisition and retention. They will learn about lead generation, prospecting, and conversion techniques. They will explore customer retention strategies, such as loyalty programs, personalized communication, and effective complaint handling, to build long-term relationships with customers.</p> <p>CO4: Utilize CRM tools and technologies: Students will utilize CRM tools and technologies to manage customer relationships effectively. They will learn about customer databases, CRM software, and analytical tools for tracking customer interactions, managing sales pipelines, and measuring customer satisfaction. They will gain hands-on experience in using CRM systems for managing customer data and interactions.</p> <p>CO5: Evaluate the impact of CRM on business performance: Students will evaluate the impact of CRM on business performance. They will understand how CRM initiatives contribute to revenue growth, customer loyalty, and competitive advantage. They will analyze key performance indicators (KPIs) related to customer acquisition, retention, and satisfaction to assess the effectiveness of CRM strategies.</p>
18	BBLB-704	COMPANY LAW	<p>CO1: Identify the legal framework of company law: Students will develop an understanding of the legal framework governing companies. They will learn about the Companies Act, its provisions, and the regulatory authorities responsible for enforcing company law. They will understand the legal requirements for company formation, operations, and governance.</p> <p>CO2: Analyze the types and</p>

*[Signature]*

			<p>characteristics of companies: Students will analyze the different types of companies, including private companies, public companies, and non-profit companies. They will understand the characteristics, advantages, and limitations of each type of company. They will learn about the formation, management, and dissolution of companies.</p> <p>CO3: Evaluate corporate governance and shareholder rights: Students will evaluate the principles of corporate governance and the rights of shareholders in companies. They will learn about the roles and responsibilities of directors, the board of directors, and shareholders in corporate decision-making. They will understand the importance of transparency, accountability, and ethical behavior in corporate governance.</p> <p>CO4: Identify company contracts and transactions: Students will understand the legal aspects of company contracts and transactions. They will learn about the process of contracting, the legal requirements for valid contracts, and the consequences of breach of contract. They will explore specific types of company transactions, such as mergers, acquisitions, and share transfers.</p> <p>CO5: Apply company law principles to real-world scenarios: Students will apply company law principles to real-world scenarios. They will analyze case studies, review legal documents, and make informed legal decisions related to company formation, governance, contracts, and transactions. They will develop skills in legal research, analysis, and interpretation of company law.</p>
19		<b>INTERNATIONAL ENVIRONMENTAL LAW</b>	<p>CO1: Apply the principles and sources of international environmental law: Students will develop an understanding of the fundamental principles and sources of international environmental law. They</p>

		<p>will learn about principles such as the precautionary principle, sustainable development, and common but differentiated responsibilities. They will explore the sources of international environmental law, including treaties, conventions, customary law, and soft law instruments.</p> <p>CO2: Analyze the framework of international environmental governance: Students will analyze the framework of international environmental governance. They will learn about the roles and functions of international organizations and institutions involved in environmental protection, such as the United Nations Environment Programme (UNEP) and the Intergovernmental Panel on Climate Change (IPCC). They will understand the mechanisms for international cooperation, negotiation, and enforcement in environmental matters.</p> <p>CO3: Evaluate key international environmental treaties and agreements: Students will evaluate key international environmental treaties and agreements. They will study landmark agreements such as the United Nations Framework Convention on Climate Change (UNFCCC), the Convention on Biological Diversity (CBD), and the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal. They will analyze the objectives, provisions, and implementation of these treaties.</p> <p>CO4: Identify the relationship between international and national environmental law: Students will understand the relationship between international and national environmental law. They will explore the principles of treaty implementation and the role of domestic legislation in ensuring compliance with international environmental obligations. They will examine case studies to</p>
--	--	---

*Signature*

			<p>understand how international law influences national environmental policies and regulations.</p> <p>CO5: Apply international environmental law to real-world issues: Students will apply the principles and provisions of international environmental law to real-world issues and challenges. They will analyze case studies, participate in simulations, and engage in discussions to develop solutions for environmental problems at the global level. They will develop skills in legal research, analysis, and advocacy in the field of international environmental law.</p>
		<b>4<sup>TH</sup> YEAR 8<sup>TH</sup> SEMESTER</b>	
	<b>BBLB-801</b>	<b>PERFORMANCE APPRAISAL AND COMPENSATION</b>	<p>CO1: Apply the concept and importance of performance appraisal: Students will develop an understanding of the concept and significance of performance appraisal in organizations. They will learn about the purposes, benefits, and challenges associated with performance appraisal systems. They will understand how performance appraisal contributes to employee development, motivation, and organizational effectiveness.</p> <p>CO2: Analyze different methods and tools of performance appraisal: Students will analyze various methods and tools used in performance appraisal. They will learn about traditional methods such as rating scales, ranking, and forced distribution, as well as modern approaches like 360-degree feedback and performance management systems. They will understand the strengths, limitations, and applicability of each method.</p> <p>CO3: Evaluate the process of performance appraisal: Students will</p>

*Signature*

		<p>evaluate the process of performance appraisal from initiation to completion. They will learn about setting performance goals, conducting performance reviews, providing feedback, and documenting performance outcomes. They will understand the importance of fairness, objectivity, and confidentiality in the appraisal process.</p> <p>CO4: Design and implement effective compensation systems: Students will design and implement effective compensation systems based on performance appraisal outcomes. They will learn about different types of compensation, such as salary, incentives, and benefits. They will understand the principles of job evaluation, pay structures, and variable pay programs. They will explore the legal and ethical considerations in compensation management.</p> <p>CO5: Analyze the impact of performance appraisal and compensation on employee engagement and organizational performance: Students will analyze the impact of performance appraisal and compensation on employee engagement and organizational performance. They will understand the relationship between performance appraisal, compensation, and employee motivation. They will evaluate case studies and research findings to assess the effectiveness of performance appraisal and compensation systems in achieving organizational objectives.</p>
	<b>BBLB-803</b>	<p><b>Corporate Laws</b></p> <p>CO1: Identify the legal framework of corporate laws: Students will develop an understanding of the legal framework governing corporations. They will learn about the Companies Act and other</p>

			<p>relevant laws and regulations. They will understand the legal requirements for company formation, operations, governance, and compliance.</p> <p>CO2: Analyze the principles of corporate governance: Students will analyze the principles of corporate governance and their application in corporate decision-making. They will learn about the roles and responsibilities of directors, board committees, and shareholders in corporate governance. They will understand the importance of transparency, accountability, and ethical behavior in corporate governance practices.</p> <p>CO3: Evaluate legal aspects of corporate transactions: Students will evaluate the legal aspects of corporate transactions. They will learn about mergers and acquisitions, joint ventures, corporate restructuring, and securities regulations. They will understand the legal requirements and procedures for these transactions, including due diligence, drafting agreements, and regulatory filings.</p> <p>CO4: Analyze corporate compliance and legal risk management: Students will understand the importance of corporate compliance and legal risk management. They will learn about compliance programs, codes of conduct, and corporate social responsibility. They will explore methods for identifying, assessing, and mitigating legal risks in corporate operations.</p> <p>CO5: Apply corporate laws to real-world scenarios: Students will apply corporate laws to real-world scenarios. They will analyze case studies, review legal documents, and make informed legal</p>
--	--	--	--

			<p>decisions related to company formation, governance, transactions, and compliance. They will develop skills in legal research, analysis, and interpretation of corporate laws.</p>
	<b>BBLB-804</b>	<b>Law of Taxation</b>	<p>CO1: Apply the principles and concepts of taxation: Students will develop an understanding of the principles and concepts of taxation. They will learn about different types of taxes, tax structures, and tax systems. They will understand the role of taxation in revenue generation and economic development.</p> <p>CO2: Analyze the legal framework of taxation: Students will analyze the legal framework governing taxation. They will learn about the relevant tax laws, regulations, and administrative procedures. They will understand the tax obligations of individuals, businesses, and other entities.</p> <p>CO3: Evaluate the tax implications of business transactions: Students will evaluate the tax implications of business transactions. They will learn about taxable events, tax deductions, exemptions, and allowances. They will understand how to calculate and report taxes based on income, profits, or other relevant factors.</p> <p>CO4: Examine tax planning and compliance: Students will understand the importance of tax planning and compliance. They will learn about tax planning strategies, tax incentives, and tax optimization. They will explore the legal and ethical considerations in tax planning and compliance.</p> <p>CO5: Apply tax laws to real-world</p>

			scenarios: Students will apply tax laws to real-world scenarios. They will analyze case studies, review tax returns, and make informed tax decisions. They will develop skills in tax research, analysis, and interpretation of tax laws.
	<b>BBLB-805</b>	<b>Intellectual Property Rights and Management</b>	<p>CO1 Apply the concept and significance of intellectual property rights (IPR): Students will develop an understanding of the concept and significance of intellectual property rights. They will learn about different types of intellectual property, including patents, trademarks, copyrights, and trade secrets. They will understand the role of IPR in promoting innovation, creativity, and economic growth.</p> <p>CO2: Analyze the legal framework of intellectual property rights: Students will analyze the legal framework governing intellectual property rights. They will learn about national and international laws, treaties, and conventions related to IPR. They will understand the requirements and procedures for obtaining and protecting intellectual property.</p> <p>CO3: Evaluate the management and enforcement of intellectual property: Students will evaluate the management and enforcement of intellectual property. They will learn about licensing, technology transfer, and commercialization of intellectual property. They will understand the mechanisms for monitoring, enforcing, and resolving disputes related to IPR.</p> <p>CO4: Apply the ethical and social implications of intellectual property:</p>

*Signature*

			<p>Students will understand the ethical and social implications of intellectual property. They will explore issues such as access to knowledge, cultural diversity, and the balance between public and private interests. They will analyze case studies and debates related to IPR in different industries and contexts.</p> <p>CO5: Apply intellectual property rights principles to real-world scenarios: Students will apply intellectual property rights principles to real-world scenarios. They will analyze case studies, review intellectual property agreements, and make informed decisions related to the protection, management, and enforcement of intellectual property. They will develop skills in legal research, analysis, and interpretation of IPR laws.</p>
		<b>5<sup>TH</sup> YEAR 9<sup>TH</sup> SEMESTER</b>	
	<b>BBLB-901</b>	<b>INTERPRETATION OF STATUTES</b>	<p>CO1: examine the principles and objectives of statutory interpretation: Students will develop an understanding of the principles and objectives of statutory interpretation. They will learn the importance of interpreting statutes to ascertain legislative intent and apply the law correctly.</p> <p>CO2: Analyze different approaches and techniques of statutory interpretation: Students will analyze and evaluate different approaches and techniques of statutory interpretation, including the literal, purposive, and contextual approaches. They will understand the role of legislative history, judicial precedent, and statutory language in interpreting</p>

			<p>statutes.</p> <p>CO3: Apply statutory interpretation principles to legal cases: Students will apply statutory interpretation principles to analyze and interpret legal cases. They will develop the ability to identify and resolve ambiguities, conflicts, and gaps in legislation. They will use legal research skills to support their interpretations with relevant case law and statutory provisions.</p> <p>CO4: Evaluate the impact of statutory interpretation on legal outcomes: Students will evaluate the impact of statutory interpretation on legal outcomes. They will analyze how different interpretations of statutes can lead to different legal conclusions and implications. They will critically assess the role of judicial discretion and the potential for judicial activism in statutory interpretation.</p> <p>CO5: Develop effective communication and legal writing skills in statutory interpretation: Students will develop effective communication and legal writing skills in the context of statutory interpretation. They will learn to articulate their interpretations clearly, concisely, and persuasively in written and oral formats. They will demonstrate the ability to convey complex legal concepts and arguments related to statutory interpretation.</p>
	BBLB-902	HUMAN RIGHTS LAW	<p>CO1: Apply the concept and principles of human rights: Students will develop an understanding of the concept of human rights and the principles that underpin them. They will explore the universality, indivisibility, and interdependence of human rights, as well as the historical development of human rights frameworks.</p>

			<p>CO2: Analyze the legal framework for the protection of human rights: Students will analyze the legal framework at the national, regional, and international levels for the protection and promotion of human rights. They will study human rights treaties, conventions, and mechanisms established by international and regional organizations.</p> <p>CO3: Evaluate the implementation and enforcement of human rights: Students will evaluate the implementation and enforcement of human rights in different jurisdictions. They will examine the role of national governments, courts, and human rights institutions in upholding human rights standards and addressing violations.</p> <p>CO4: Analyze contemporary human rights issues and challenges: Students will analyze contemporary human rights issues and challenges. They will explore topics such as discrimination, gender equality, freedom of expression, right to privacy, refugee and migrant rights, and social and economic rights. They will critically examine the complexities and dilemmas in protecting and promoting human rights.</p> <p>CO5: Apply human rights principles to real-world situations: Students will apply human rights principles to real-world situations. They will develop the ability to identify human rights violations, analyze legal and ethical implications, and propose solutions to address human rights challenges. They will develop skills in legal research, advocacy, and human rights-based approaches to social justice.</p>
	<b>BBLB-903</b>	<b>DRAFTING, PLEADING AND CONVEYANCING</b>	<p>CO1: Develop skills in legal drafting: Students will develop skills in drafting various legal documents, including</p>

*Signature*

			<p>pleadings, contracts, agreements, and legal opinions. They will learn the appropriate structure, format, and language used in legal drafting.</p> <p>CO2: Examine the elements of effective pleading: Students will understand the essential elements of effective pleading, including clear and concise presentation of facts, identification of legal issues, and proper use of legal language. They will learn the importance of organizing and presenting information in a logical and persuasive manner.</p> <p>CO3: Demonstrate proficiency in drafting and filing legal documents: Students will demonstrate proficiency in drafting and filing legal documents. They will learn the procedural requirements for drafting and submitting various legal documents to courts, government agencies, and other relevant authorities.</p> <p>CO4: Develop skills in effective communication and persuasive writing: Students will develop skills in effective communication and persuasive writing in the context of legal drafting. They will learn to use language and arguments that are precise, coherent, and convincing. They will understand the importance of tailoring the language and tone of their documents to the intended audience.</p> <p>CO5: Analyze and apply legal principles in the drafting and conveyancing process: Students will analyze and apply legal principles in the drafting and conveyancing process. They will understand the importance of conducting legal research, interpreting statutes, and analyzing case law to ensure the accuracy and legality of their drafted documents. They will develop the ability to identify and address potential legal issues and</p>

			risks in drafting and conveyancing transactions.
	<b>BBLB-904</b>	<b>PUBLIC INTERNATIONAL LAW</b>	<p>CO1: Understand the nature and sources of public international law: Students will develop an understanding of the nature, scope, and sources of public international law. They will study the principles and concepts that govern relations between states, international organizations, and individuals in the international community.</p> <p>CO2: Analyze the principles and institutions of public international law: Students will analyze the foundational principles of public international law, such as sovereignty, state responsibility, diplomatic immunity, and the peaceful settlement of disputes. They will also examine the role and functioning of international institutions, including the United Nations, International Court of Justice, and regional organizations.</p> <p>CO3: Evaluate the legal framework for international peace and security: Students will evaluate the legal framework for maintaining international peace and security. They will study the prohibition of the use of force, the role of collective security, and the legal mechanisms for the prevention and resolution of armed conflicts. They will also explore the principles of humanitarian intervention and responsibility to protect.</p> <p>CO4: Analyze the legal aspects of international human rights and humanitarian law: Students will analyze the legal aspects of international human rights law and international humanitarian law. They will study the major human rights treaties, the role of international tribunals in enforcing human rights, and</p>

*Supriya*

			<p>the legal protections for victims of armed conflicts and other humanitarian crises.</p> <p>CO5: Apply international law principles to global issues: Students will apply international law principles to analyze and propose solutions to global issues. They will explore contemporary challenges such as climate change, terrorism, migration, and the regulation of international trade and investment. They will develop the ability to critically assess the role and effectiveness of international law in addressing these complex issues.</p>
	BBLB-905	<b>ELECTIVE IV CYBER LAWS</b>	<p>CO1: Apply the fundamentals of cyber laws: Students will develop an understanding of the fundamentals of cyber laws, including the legal principles and regulations governing cyberspace. They will learn about the legal frameworks, national and international legislations, and conventions related to cybercrime, cybersecurity, and data protection.</p> <p>CO2: Analyze legal issues in cyberspace: Students will analyze the legal issues arising in cyberspace, such as data privacy, intellectual property infringement, cybercrimes, online defamation, and jurisdictional challenges. They will explore the legal implications of emerging technologies, including artificial intelligence, blockchain, and Internet of Things (IoT).</p> <p>CO3: Evaluate the legal frameworks for cybercrime and cybersecurity: Students will evaluate the legal frameworks and mechanisms for addressing cybercrime and ensuring cybersecurity. They will study the legal provisions related to computer crimes, electronic evidence, hacking, identity theft, and data breaches.</p>

*Signature*

			<p>They will also examine the role of law enforcement agencies and international cooperation in combating cyber threats.</p> <p>CO4: Examine the legal aspects of e-commerce and digital transactions: Students will understand the legal aspects of e-commerce, digital transactions, and electronic contracts. They will learn about the legal validity of electronic signatures, electronic records, and online dispute resolution. They will explore the legal challenges and consumer protection issues in the digital marketplace.</p> <p>CO5: Apply cyber laws to real-world scenarios: Students will apply the principles of cyber laws to real-world scenarios. They will develop skills in legal analysis, research, and problem-solving to address legal challenges in cyberspace. They will understand the importance of compliance, risk management, and ethical considerations in the context of cyber laws.</p>
	BBLB-906	MOOT COURT IV	<p>CO1: Develop advanced advocacy skills: Students will further develop their advocacy skills through participation in moot court activities. They will refine their abilities to present oral arguments, engage in legal reasoning, and respond to questions from judges.</p> <p>CO2: Apply legal principles to simulated cases: Students will apply their knowledge of substantive law and legal procedures to analyze and argue simulated cases. They will research relevant legal precedents, prepare written submissions, and deliver oral arguments in a structured and persuasive manner.</p> <p>CO3: Enhance critical thinking and problem-solving abilities: Students will</p>

*Signature*

			<p>enhance their critical thinking and problem-solving abilities by identifying legal issues, evaluating evidence, and crafting arguments to support their position. They will develop the skills to analyze complex legal problems and propose practical and effective solutions.</p> <p>CO4: Refine legal research and writing skills: Students will refine their legal research and writing skills by conducting in-depth research on legal issues, drafting written submissions, and presenting legal arguments in a clear and coherent manner. They will learn to use legal authorities, statutes, and case law to support their arguments.</p> <p>CO5: Demonstrate professionalism and courtroom etiquette: Students will demonstrate professionalism and courtroom etiquette during moot court sessions. They will learn to conduct themselves with integrity, respect for the court, and adherence to professional ethics. They will develop skills in effective communication, teamwork, and collaboration with peers and judges.</p>

### **BB.A LL.B 5<sup>TH</sup> YEAR 10<sup>TH</sup> SEMESTER**

There will be a six months Internship consisting VIVA VOCE,

Examinations and project submission:

1. CIVIL LAWS
2. CRIMINAL LAWS
3. PROJECTS

*Subir*

**LL.B 3years**

S.NO	Course Code	Course Title	Course Outcomes
<b>FIRST SEMESTER</b>			
1	LLB-10	LAW OF CONTRACT I	<p>CO1: Apply the fundamental principles of contract law: Students will develop an understanding of the fundamental principles and concepts of contract law. They will learn the elements of a valid contract, including offer, acceptance, consideration, intention to create legal relations, and capacity to contract.</p> <p>CO2: Analyze and interpret contract provisions: Students will analyze and interpret the provisions of a contract, including terms and conditions, rights and obligations of parties, and remedies for breach of contract. They will develop the ability to identify and interpret contractual terms and clauses, including express and implied terms.</p> <p>CO3: Apply contract law principles to real-world scenarios: Students will apply the principles of contract law to analyze and solve real-world scenarios and case studies. They will identify contractual issues, assess the legality and enforceability of contracts, and propose appropriate legal solutions.</p> <p>CO4: Draft and negotiate contracts: Students will develop skills in drafting and negotiating contracts. They will learn to prepare clear and comprehensive contracts that accurately reflect the intentions of the parties and provide adequate protections. They will also develop negotiation skills to effectively address contract terms and conditions.</p> <p>CO5: Apply the legal remedies for breach of contract: Students will understand the legal remedies available for breach of contract, including damages, specific</p>

*[Signature]*

			performance, and injunctions. They will analyze the factors that determine the appropriate remedy in different contractual situations and develop an understanding of the limitations and exceptions to contractual remedies.
2	LLB-103	<b>LAW OF TORT AND CONSUMER PROTECTION ACT,1986</b>	<p>CO1: Examine the principles and elements of tort law: Students will develop an understanding of the principles and elements of tort law. They will learn about the various types of torts, including negligence, nuisance, trespass, defamation, and strict liability. They will understand the elements required to establish liability in tort cases.</p> <p>CO2: Analyze and apply tort law principles to real-world situations: Students will analyze and apply the principles of tort law to real-world situations and case studies. They will identify potential tortious acts, assess the standard of care, and determine the existence of causation and damages. They will develop the ability to analyze and evaluate legal issues and provide appropriate legal advice.</p> <p>CO3: Examine the Consumer Protection Act, 1986: Students will develop an understanding of the Consumer Protection Act, 1986, and its provisions for protecting consumer rights and interests. They will study the rights and responsibilities of consumers, the role and powers of consumer forums, and the procedures for filing consumer complaints and seeking remedies.</p> <p>CO4: Analyze consumer disputes and provide legal solutions: Students will analyze consumer disputes and apply the provisions of the Consumer Protection Act, 1986, to provide legal</p>

*Supriya*

			<p>solutions. They will develop skills in identifying unfair trade practices, misleading advertisements, and product defects. They will learn to assist consumers in seeking compensation, refunds, or other appropriate remedies.</p> <p>CO5: identify the legal principles of compensation in tort and consumer cases: Students will understand the legal principles governing compensation in tort and consumer cases. They will study the factors considered in determining the quantum of damages and the different types of compensation available. They will develop the ability to assess and quantify damages in tort and consumer cases.</p>
3	LLB-102	CONSTITUTIONAL LAW OF INDIA	<p>CO1: Apply the framework and structure of the Indian Constitution: Students will develop a comprehensive understanding of the framework and structure of the Indian Constitution. They will study the Preamble, fundamental rights, directive principles of state policy, fundamental duties, and the organization and functioning of the government.</p> <p>CO2: Analyze and interpret constitutional provisions: Students will analyze and interpret various provisions of the Indian Constitution. They will study the interpretation of fundamental rights, separation of powers, federalism, judicial review, and the role of constitutional bodies such as the President, Parliament, and the judiciary.</p> <p>CO3: examine the principles of constitutional governance: Students will understand the principles of constitutional governance, including democracy, rule of law, and constitutional supremacy. They will</p>

*Signature*

			<p>analyze the concepts of constitutionalism, equality, liberty, and social justice as enshrined in the Indian Constitution.</p> <p>CO4: Evaluate landmark judgments and constitutional amendments: Students will evaluate landmark judgments of the Indian Supreme Court and important constitutional amendments. They will analyze the impact of these judgments and amendments on the interpretation and development of constitutional law in India.</p> <p>CO5: Apply constitutional principles to real-world scenarios: Students will apply the principles of constitutional law to real-world scenarios and case studies. They will analyze constitutional issues, assess the constitutionality of laws and government actions, and propose legal arguments based on constitutional provisions and precedents.</p>
4	LLB-104	<b>FAMILY LAW-I (HINDU LAW)</b>	<p>CO1: Demonstrate the basic principles of Hindu law: Students will develop an understanding of the basic principles of Hindu law. They will study the sources of Hindu law, including religious texts and statutory provisions, and understand the concept of Hindu joint family, coparcenary, and inheritance rights.</p> <p>CO2: Analyze and apply the provisions of Hindu law: Students will analyze and apply the provisions of Hindu law to various aspects of family relations. They will study topics such as marriage, divorce, adoption, guardianship, and maintenance, and develop the ability to interpret and apply the relevant legal principles.</p> <p>CO3: identify the rights and obligations of parties in Hindu law:</p>

*Subir*

			<p>Students will understand the rights and obligations of parties in Hindu law. They will study the rights and duties of spouses, parents, children, and other family members under Hindu law, and analyze the legal implications of various familial relationships.</p> <p>CO4: Analyze and resolve legal issues in Hindu family law: Students will analyze and resolve legal issues and disputes arising in the context of Hindu family law. They will develop skills in identifying legal issues, conducting legal research, and applying legal principles to provide legal advice and solutions.</p> <p>CO5: identify recent developments and reforms in Hindu family law: Students will be aware of recent developments and reforms in Hindu family law. They will study significant judicial decisions and legislative changes that have impacted the field of Hindu family law, and critically analyze their implications on the rights and status of individuals in Hindu families.</p>
5	LLB-105	LAW OF CRIME-I	<p>CO1: examine the basic concepts and elements of criminal law: Students will develop an understanding of the basic concepts and elements of criminal law. They will study the definition of a crime, the elements of criminal liability, and the principles of actus reus and mens rea.</p> <p>CO2: Analyze and apply the provisions of substantive criminal law: Students will analyze and apply the provisions of substantive criminal law to different categories of offenses. They will study topics such as homicide, theft, robbery, criminal trespass, and offenses against women and children, and develop the ability to interpret and apply the relevant</p>

*Signature*

			<p>legal provisions.</p> <p>CO3: demonstrate the criminal justice system: Students will understand the structure and functioning of the criminal justice system. They will study the roles of the police, prosecution, defense, and judiciary in the investigation, prosecution, and adjudication of criminal cases.</p> <p>CO4: Analyze and evaluate legal defenses and exceptions in criminal law: Students will analyze and evaluate the various legal defenses and exceptions available in criminal law. They will study defenses such as insanity, intoxication, mistake of fact, and self-defense, and understand the requirements and implications of these defenses.</p> <p>CO5: Analyze and resolve legal issues in criminal law: Students will analyze and resolve legal issues and dilemmas arising in the context of criminal law. They will develop skills in identifying legal issues, conducting legal research, and applying legal principles to provide legal advice and solutions in criminal cases.</p>
6	LLB-106	COMPETITION LAW	<p>CO1: evaluate the principles and objectives of competition law: Students will develop an understanding of the principles and objectives of competition law. They will study the importance of promoting fair competition, preventing anti-competitive practices, and ensuring consumer welfare in the marketplace.</p> <p>CO2: Analyze and apply the provisions of competition law: Students will analyze and apply the provisions of competition law to various business practices. They will study topics such as anti-competitive agreements, abuse of dominant</p>

*Signature*

			<p>form of intellectual property.</p> <p>CO2: Analyze and apply the principles of intellectual property law: Students will analyze and apply the principles of intellectual property law to various situations. They will study topics such as the requirements for copyright protection, trademark registration, patentability, and the enforcement of intellectual property rights.</p> <p>CO3: analyse the international framework for intellectual property protection: Students will understand the international framework for intellectual property protection, including treaties and agreements such as the Berne Convention, the Paris Convention, and the TRIPS Agreement. They will analyze the implications of international intellectual property laws on domestic legal systems.</p> <p>CO4: Evaluate intellectual property infringement and enforcement: Students will evaluate intellectual property infringement cases and analyze the enforcement mechanisms available to protect intellectual property rights. They will study the remedies and legal actions available to rights holders in cases of infringement, including civil litigation and administrative procedures.</p> <p>CO5: Analyze emerging issues and developments in intellectual property law: Students will analyze emerging issues and developments in the field of intellectual property law. They will study current debates and challenges related to digital piracy, technological advancements, biotechnology, and the intersection of intellectual property rights with other areas of law. They will critically assess the impact of</p>

		these developments on intellectual property protection and innovation.

## SECOND SEMESTER

9	LLB-201	<b>LAW OF CONTRACT-II</b> <p>CO1: determine advanced principles of contract law: Students will develop an understanding of advanced principles of contract law. They will study topics such as contractual capacity, privity of contract, discharge of contract, and remedies for breach of contract, and analyze their legal implications and applications.</p> <p>CO2: Analyze and interpret complex contractual provisions: Students will analyze and interpret complex contractual provisions found in commercial agreements. They will study clauses such as indemnity, limitation of liability, force majeure, and arbitration clauses, and develop the ability to analyze their legal implications and negotiate their terms.</p> <p>CO3: Apply statutory provisions to specialized contracts: Students will apply statutory provisions to specialized contracts. They will study contracts such as contracts for the sale of goods, contracts for the supply of services, contracts of bailment, and contracts of agency, and analyze the legal rights and obligations of the parties involved.</p> <p>CO4: Analyze and evaluate legal issues in contractual relationships: Students will analyze and evaluate legal issues and disputes arising in contractual relationships. They will develop skills in identifying legal issues, conducting legal research, and applying legal principles to provide legal advice and solutions in complex contract cases.</p> <p>CO5: identify recent developments</p>
---	---------	---

*Signature*

			and reforms in contract law: Students will be aware of recent developments and reforms in contract law. They will study significant judicial decisions and legislative changes that have impacted the field of contract law, and critically analyze their implications on contractual relationships and commercial transactions.
10	LLB-202	CONSTITUTIONAL LAW OF INDIA-II	<p>CO1: evaluate the fundamental rights and their interpretations: Students will develop an understanding of the fundamental rights guaranteed under the Indian Constitution and their interpretations by the judiciary. They will study landmark judgments related to the right to equality, right to freedom of speech and expression, right to life and personal liberty, and other fundamental rights.</p> <p>CO2: Analyze and apply constitutional provisions related to governance and administration: Students will analyze and apply constitutional provisions related to governance and administration in India. They will study topics such as the powers and functions of the President, Prime Minister, and Council of Ministers, as well as the principles of federalism, separation of powers, and judicial review.</p> <p>CO3: identify constitutional provisions and institutions for the protection of marginalized groups: Students will understand constitutional provisions and institutions for the protection of marginalized groups in India. They will study provisions related to reservations for Scheduled Castes, Scheduled Tribes, and Other Backward Classes, as well as constitutional safeguards for women, children, and minorities.</p> <p>CO4: Analyze and evaluate</p>

*Supriya*

			<p>constitutional amendments and judicial activism: Students will analyze and evaluate constitutional amendments and judicial activism in India. They will study significant amendments to the Constitution, their impact on governance and rights, and the role of the judiciary in interpreting and safeguarding the Constitution.</p> <p>CO5: Critically examine emerging issues in constitutional law: Students will critically examine emerging issues in constitutional law. They will study contemporary debates and challenges related to constitutional interpretation, right to privacy, freedom of religion, affirmative action, and constitutional reforms. They will analyze different perspectives and assess their implications on constitutional governance in India.</p>
11	LLB-203	FAMILY LAW-II (MUSLIM LAW)	<p>CO1: determine the principles and sources of Muslim personal law: Students will develop an understanding of the principles and sources of Muslim personal law. They will study the Quran, Hadith, and legal commentaries to comprehend the foundational principles and sources of Islamic law related to marriage, divorce, maintenance, and inheritance.</p> <p>CO2: Analyze and apply the provisions of Muslim personal law: Students will analyze and apply the provisions of Muslim personal law to various family law matters. They will study topics such as marriage, divorce, dower, custody, guardianship, maintenance, and inheritance under Muslim law, and develop the ability to interpret and apply these provisions in practical scenarios.</p> <p>CO3: evaluate the legal rights and</p>

*Signature*

			<p>obligations of spouses under Muslim law: Students will understand the legal rights and obligations of spouses under Muslim law. They will study the concept of marriage in Islam, the rights and duties of husbands and wives, the conditions and types of divorce, and the principles governing post-divorce maintenance and custody.</p> <p>CO4: Evaluate and analyze contemporary issues in Muslim family law: Students will evaluate and analyze contemporary issues and challenges in Muslim family law. They will study topics such as triple talaq, polygamy, the rights of women in marriage and divorce, and reforms in Muslim personal law. They will critically examine different perspectives and propose potential solutions to address these issues.</p> <p>CO5: Apply dispute resolution mechanisms in Muslim family law: Students will apply dispute resolution mechanisms in Muslim family law. They will study the procedures and practices of Islamic arbitration, mediation, and reconciliation in resolving family disputes under Muslim law. They will develop skills in negotiating, drafting settlement agreements, and providing legal advice in the context of Muslim family law.</p>
12	LLB-204	<b>PUBLIC INTERNATIONAL &amp; HUMAN RIGHTS</b>	<p>CO1: determine the principles and concepts of public international law: Students will develop an understanding of the principles and concepts of public international law. They will study topics such as the sources of international law, state sovereignty, diplomatic relations, international organizations, and the settlement of international disputes.</p> <p>CO2: Analyze and apply international</p>

*Sybil*

		<p>legal instruments and treaties: Students will analyze and apply international legal instruments and treaties in the context of public international law. They will study treaties such as the United Nations Charter, human rights conventions, and environmental agreements, and analyze their provisions and implications on state behavior and international relations.</p> <p>CO3: analyse the protection and promotion of human rights: Students will understand the protection and promotion of human rights at the international level. They will study international human rights instruments, such as the Universal Declaration of Human Rights and international human rights treaties, and analyze the mechanisms and institutions for the protection and enforcement of human rights.</p> <p>CO4: Evaluate and analyze contemporary issues in public international law: Students will evaluate and analyze contemporary issues and challenges in public international law. They will study topics such as international humanitarian law, the responsibility to protect, international criminal law, and the role of international organizations in addressing global challenges. They will critically examine different perspectives and propose potential solutions to these issues.</p> <p>CO5: Apply principles of public international law to real-world scenarios: Students will apply principles of public international law to real-world scenarios. They will analyze case studies and hypothetical situations involving state-state relations, human rights violations, and</p>

			cross-border disputes, and apply the relevant principles of public international law to propose legal solutions and responses.
13	LLB-205	<b>INFORMATION TECHNOLOGY LAW(including media &amp; law) CYBER LAW</b>	<p>CO1: analyse the legal framework governing information technology and cyber law: Students will develop an understanding of the legal framework governing information technology and cyber law. They will study the applicable laws, regulations, and international conventions related to cybersecurity, data protection, electronic transactions, intellectual property rights, and freedom of expression in the digital realm.</p> <p>CO2: Analyze and apply legal principles to information technology and cyber law issues: Students will analyze and apply legal principles to various information technology and cyber law issues. They will study topics such as cybercrimes, privacy breaches, online defamation, digital copyright infringement, cyber contracts, and liability of internet service providers. They will develop the ability to interpret and apply relevant laws and regulations to practical scenarios.</p> <p>CO3: identify the legal challenges in the media and entertainment industry: Students will understand the legal challenges in the media and entertainment industry, particularly in the digital era. They will study topics such as media regulation, intellectual property rights in media content, online platforms and intermediaries, freedom of speech and expression, and media ethics. They will analyze the legal implications and conflicts arising in the media and entertainment sector.</p> <p>CO4: Evaluate and analyze emerging issues in information technology and</p>

*Supriya*

			<p>cyber law: Students will evaluate and analyze emerging issues and challenges in information technology and cyber law. They will study topics such as data privacy, artificial intelligence, blockchain technology, cloud computing, social media regulation, and the legal implications of emerging technologies. They will critically examine different perspectives and propose legal solutions to address these issues.</p> <p>CO5: Apply legal principles to mitigate cyber risks and ensure compliance: Students will apply legal principles to mitigate cyber risks and ensure compliance with information technology and cyber law requirements. They will study cybersecurity best practices, incident response, risk management, and legal compliance frameworks. They will develop skills to advise organizations on legal and regulatory compliance in the digital realm and propose measures to enhance cybersecurity.</p>
14	LLB-206A	<b>INDIAN LEGAL &amp; CONSTITUTIONAL HISTORY/EQUITY</b>	<p>CO1: determine the historical development of Indian legal and constitutional systems: Students will develop an understanding of the historical development of Indian legal and constitutional systems. They will study the ancient legal systems, the impact of colonialism on Indian law, and the evolution of the Indian constitution. They will gain insights into the historical context that shaped the current legal and constitutional framework in India.</p> <p>CO2: Analyze and interpret key legal and constitutional developments in Indian history: Students will analyze and interpret key legal and constitutional developments in Indian history. They will study landmark cases, constitutional amendments, and legislative reforms that have shaped</p>

		<p>the Indian legal system. They will develop the ability to critically analyze legal texts and understand the social, political, and cultural factors that influenced legal and constitutional decisions.</p> <p>CO3: analyse the principles and concepts of equity in Indian law: Students will understand the principles and concepts of equity in Indian law. They will study the historical development of equity, equitable remedies, and principles of fairness and justice in legal proceedings. They will explore the application of equitable principles in specific areas of law, such as property, trusts, and injunctions.</p> <p>CO4: Evaluate and analyze the impact of historical legal and constitutional developments: Students will evaluate and analyze the impact of historical legal and constitutional developments on the Indian legal system. They will examine the consequences of significant legal and constitutional decisions on individual rights, social justice, and governance. They will critically assess the strengths and weaknesses of the legal system in addressing societal needs and aspirations.</p> <p>CO5: Apply historical knowledge to contemporary legal and constitutional issues: Students will apply their knowledge of Indian legal and constitutional history to contemporary legal and constitutional issues. They will analyze current debates and challenges in the legal system and assess their historical roots. They will develop the ability to draw connections between historical developments and contemporary legal and constitutional practices, and propose legal reforms that address</p>
--	--	--

			present-day concerns.
15	LLB-207	PROFESSIONAL ETHICS, ACCOUNTABILITY FOR TRUST LAW	<p>CO1: analyse the principles and values of professional ethics: Students will develop an understanding of the principles and values of professional ethics. They will study ethical theories, codes of conduct, and professional responsibilities in various fields such as law, business, and public administration. They will gain insights into the ethical obligations and expectations placed on professionals in maintaining integrity, honesty, and accountability.</p> <p>CO2: Analyze and apply ethical frameworks to real-world scenarios: Students will analyze and apply ethical frameworks to real-world scenarios. They will examine case studies and hypothetical situations that present ethical dilemmas and conflicts of interest. They will develop critical thinking skills to evaluate the ethical dimensions of complex situations and make informed decisions based on ethical principles.</p> <p>CO3: evaluate the concept of accountability and trust in professional contexts: Students will understand the concept of accountability and trust in professional contexts. They will explore the importance of accountability in upholding ethical standards and maintaining public trust. They will study mechanisms for accountability, such as regulatory bodies, professional standards, and legal frameworks, and examine the role of trust in professional relationships and transactions.</p> <p>CO4: Evaluate and analyze ethical challenges and dilemmas in professional practice: Students will evaluate and analyze ethical</p>

*Signature*

		<p>challenges and dilemmas that arise in professional practice. They will examine issues such as conflicts of interest, client confidentiality, whistleblowing, and ethical decision-making in complex organizational settings. They will develop the ability to identify ethical issues, assess their implications, and propose ethical solutions.</p> <p>CO5: Apply ethical principles and accountability measures in professional practice: Students will apply ethical principles and accountability measures in their professional practice. They will develop skills to navigate ethical challenges, make ethical decisions, and demonstrate accountability in their work. They will understand the importance of maintaining professional integrity and upholding ethical standards to build trust and credibility in their respective fields.</p>
	<b>LAWYERS AND BAR BENCH RELATIONSHIP</b>	<p>CO1: identify the roles and responsibilities of lawyers and the judiciary: Students will develop an understanding of the roles and responsibilities of lawyers and the judiciary in the legal system. They will study the functions of lawyers as advocates, legal advisors, and officers of the court. They will also examine the role of judges in administering justice, interpreting the law, and maintaining the independence and integrity of the judiciary.</p> <p>CO2: Analyze the dynamics of the relationship between lawyers and the bench: Students will analyze the dynamics of the relationship between lawyers and the bench. They will</p>

			<p>study the principles of professional conduct and courtroom etiquette that govern interactions between lawyers and judges. They will explore the factors that influence effective communication, mutual respect, and cooperation between lawyers and the bench.</p> <p>CO3: Understand the importance of professionalism and ethics in the lawyer-bench relationship: Students will understand the importance of professionalism and ethics in fostering a positive lawyer-bench relationship. They will study the ethical obligations of lawyers towards the court, including honesty, integrity, and respect for the judiciary. They will also explore the ethical responsibilities of judges in maintaining impartiality, fairness, and respect for the legal profession.</p> <p>CO4: Evaluate the impact of the lawyer-bench relationship on the administration of justice: Students will evaluate the impact of the lawyer-bench relationship on the administration of justice. They will examine the effects of effective collaboration, clear communication, and professional conduct on the efficiency and fairness of legal proceedings. They will also analyze the potential challenges and conflicts that may arise in the lawyer-bench relationship and propose strategies to address them.</p> <p>CO5: Develop effective advocacy skills and professional demeanor: Students will develop effective advocacy skills and cultivate a professional demeanor in their interactions with the bench. They will</p>

### THIRD SEMESTER

16	LLB-301	JURISPRUDENCE-I	<p>CO1: determine the nature and scope of jurisprudence: Students will develop an understanding of the nature and scope of jurisprudence as a field of study. They will explore the various branches of jurisprudence, such as analytical jurisprudence, sociological jurisprudence, and natural law theory. They will gain insights into the theoretical foundations and conceptual frameworks that underpin legal systems and legal reasoning.</p> <p>CO2: Analyze and critique key jurisprudential theories: Students will analyze and critique key jurisprudential theories and approaches. They will study prominent legal theorists and their contributions to the understanding of law and legal systems. They will critically evaluate the strengths and weaknesses of different jurisprudential perspectives and assess their relevance to contemporary legal issues.</p> <p>CO3: demonstrate the relationship between law and morality: Students will understand the complex relationship between law and morality. They will examine the</p>
----	---------	-----------------	---

*Supriya*

			<p>theories of legal positivism, natural law, and legal realism in exploring the moral dimensions of law. They will analyze ethical dilemmas and conflicts that arise in legal practice and consider the role of moral reasoning in shaping legal outcomes.</p> <p>CO4: Apply jurisprudential theories to legal analysis and interpretation: Students will apply jurisprudential theories to legal analysis and interpretation. They will develop the ability to apply different jurisprudential perspectives in analyzing legal cases, statutes, and legal doctrines. They will critically assess the implications of various jurisprudential theories on legal reasoning, judicial decision-making, and the development of legal principles.</p> <p>CO5: Evaluate the relevance of jurisprudential theories in contemporary legal discourse: Students will evaluate the relevance of jurisprudential theories in contemporary legal discourse. They will examine how jurisprudential theories inform debates on legal issues such as human rights, social justice, and the role of the judiciary. They will critically analyze the impact of jurisprudential perspectives on the evolution of legal principles and the formulation of public policy.</p>
17	LLB-302	CRIMINAL PROCEDURE CODE	<p>CO1: evaluate the structure and principles of criminal procedure: Students will develop an understanding of the structure and principles of criminal procedure as governed by the Criminal Procedure Code (CrPC). They will study the procedural safeguards, rights of the accused, and the stages of the criminal justice process, including investigation, arrest, bail, trial, and</p>

		<p>sentencing.</p> <p>CO2: Analyze the roles and responsibilities of key actors in the criminal justice system: Students will analyze the roles and responsibilities of key actors in the criminal justice system, including police, prosecutors, defense attorneys, judges, and witnesses. They will examine the powers and limitations of these actors in ensuring fair and effective criminal proceedings.</p> <p>CO3: Evaluate the procedural rights and protections of the accused: Students will evaluate the procedural rights and protections of the accused as enshrined in the CrPC. They will study concepts such as presumption of innocence, right to legal representation, right against self-incrimination, and the prohibition of double jeopardy. They will critically assess the balance between the rights of the accused and the societal interest in crime prevention and punishment.</p> <p>CO4: identify the process of investigation and evidence gathering: Students will understand the process of investigation and evidence gathering in criminal cases. They will study the powers and limitations of the police in conducting investigations, the admissibility of different types of evidence, and the rules of evidence under the CrPC. They will analyze the importance of procedural fairness and the reliability of evidence in ensuring justice.</p> <p>CO5: Analyze the challenges and reforms in criminal procedure: Students will analyze the challenges and reforms in criminal procedure. They will examine issues such as delay in trials, plea bargaining, alternative dispute resolution</p>
--	--	--

*Signature*

			mechanisms, and the use of technology in criminal proceedings. They will critically assess the need for reforms to enhance the efficiency, fairness, and accessibility of the criminal justice system.
18	LLB-304	ADMINISTRATIVE LAW	<p>CO1: analyse the nature and scope of administrative law: Students will develop an understanding of administrative law as a branch of law that governs the activities and decisions of administrative agencies. They will explore the sources of administrative law, the principles of administrative law, and the relationship between administrative law and constitutional law.</p> <p>CO2: Analyze the functions and powers of administrative agencies: Students will analyze the functions and powers of administrative agencies at the national, state, and local levels. They will study the delegation of powers, rule-making, adjudication, and enforcement powers of administrative agencies. They will critically assess the role of administrative agencies in implementing and enforcing laws and regulations.</p> <p>CO3: Evaluate the principles of procedural fairness and natural justice in administrative decision-making: Students will evaluate the principles of procedural fairness and natural justice in administrative decision-making. They will study concepts such as the right to be heard, the duty to give reasons, and the right to appeal administrative decisions. They will critically analyze the balance between administrative efficiency and the protection of individual rights.</p> <p>CO4: Analyze the judicial review of administrative actions: Students will analyze the judicial review of administrative actions by the courts. They will study the grounds for judicial review, such as ultra vires,</p>

		<p>irrationality, procedural impropriety, and illegality. They will critically assess the role of the judiciary in reviewing administrative actions and ensuring accountability and legality.</p> <p>CO5: Evaluate the challenges and reforms in administrative law: Students will evaluate the challenges and reforms in administrative law. They will examine issues such as bureaucratic discretion, administrative accountability, and the need for transparency and citizen participation in administrative decision-making. They will critically assess the need for reforms to enhance the efficiency, effectiveness, and legitimacy of administrative agencies.</p>

*Superior*

19	LLB-304	COMPANY LAW	<p>CO1: examine the legal framework and principles of company law: Students will develop an understanding of the legal framework and principles that govern the formation, organization, and functioning of companies. They will study the Companies Act and other relevant laws and regulations, and explore the concept of corporate personality, types of companies, and the roles and responsibilities of different stakeholders.</p> <p>CO2: Analyze the process of company formation and registration: Students will analyze the process of company formation and registration, including the requirements, procedures, and legal documentation involved. They will study the concept of limited liability, the memorandum and articles of association, and the rights and obligations of shareholders and directors in the company structure.</p> <p>CO3: identify the internal organization and governance of companies: Students will understand the internal organization and governance of companies. They will study the powers and duties of directors, shareholders' meetings, decision-making processes, and the role of company secretaries. They will analyze corporate governance principles and mechanisms to ensure transparency, accountability, and ethical behavior within companies.</p> <p>CO4: Analyze the legal framework for corporate finance and transactions: Students will analyze the legal framework for corporate finance and transactions. They will study the rules and regulations related to capital raising, share issuance, loans, mergers and acquisitions, and other corporate</p>
----	---------	-------------	---

*Signature*

			<p>transactions. They will explore the rights and protections of investors and the disclosure requirements for public companies.</p> <p>CO5: Evaluate the legal remedies and enforcement mechanisms in company law: Students will evaluate the legal remedies and enforcement mechanisms available in company law. They will study the concept of corporate liability, minority shareholder protections, and the remedies for corporate wrongdoing. They will critically assess the role of regulators and courts in enforcing company law and ensuring compliance with corporate governance standards.</p>
	<b>LLB-305</b>	<b>LAW OF TAXATION</b>	<p>CO1: identify the basic principles and concepts of taxation: Students will develop an understanding of the basic principles and concepts of taxation, including the different types of taxes, tax jurisdictions, taxable events, and the legal framework governing</p>

*Supriya*

		<p>taxation.</p> <p>CO2: Analyze the provisions of tax laws and regulations: Students will analyze the provisions of tax laws and regulations applicable in the jurisdiction. They will study the Income Tax Act, Goods and Services Tax (GST) Act, and other relevant tax laws, and examine the legal requirements, procedures, and compliance obligations imposed on taxpayers.</p> <p>CO3: Evaluate the taxation of various entities and individuals: Students will evaluate the taxation of various entities and individuals, including individuals, partnerships, corporations, and other legal entities. They will study the determination of taxable income, deductions, exemptions, and tax planning strategies to minimize tax liabilities.</p> <p>CO4: analyse the tax administration and enforcement mechanisms: Students will understand the tax administration and enforcement mechanisms implemented by tax authorities. They will study the procedures for tax assessment, filing of tax returns, audits, appeals, and dispute resolution mechanisms. They will analyze the powers and responsibilities of tax authorities and the rights and obligations of taxpayers.</p> <p>CO5: Analyze the impact of taxation on the economy and society: Students will analyze the impact of taxation on the economy and society. They will study the principles of tax equity, efficiency, and economic incentives. They will critically assess the role of taxation in promoting economic development, addressing income inequality, and achieving social</p>

			objectives.
	<b>LLB-306</b>	<b>BANKING LAW</b>	<p>CO1: examine the legal framework governing banking institutions: Students will develop an understanding of the legal framework governing banking institutions, including the laws, regulations, and supervisory authorities that oversee the banking sector. They will study the Banking Regulation Act, Reserve Bank of India Act, and other relevant laws related to banking operations.</p> <p>CO2: Analyze the rights and obligations of banks and customers: Students will analyze the rights and obligations of banks and their customers. They will study topics such as the opening and closing of bank accounts, deposit and withdrawal transactions, lending and borrowing, payment systems, and electronic banking. They will explore the legal protections and remedies available to both banks and customers.</p> <p>CO3: evaluate the regulatory requirements for banking operations: Students will understand the regulatory requirements for banking operations. They will study topics such as prudential norms, capital adequacy, risk management, anti-money laundering measures, and customer due diligence. They will analyze the role of regulatory authorities in ensuring the stability and integrity of the banking system.</p> <p>CO4: Evaluate the legal aspects of banking transactions: Students will evaluate the legal aspects of banking transactions. They will study topics such as negotiable instruments, letters of credit, guarantees, and other forms of credit facilities. They will analyze the legal rights, obligations, and</p>

*Signature*

			<p>liabilities of the parties involved in these transactions.</p> <p>CO5: Analyze the legal framework for resolution of banking disputes: Students will analyze the legal framework for the resolution of banking disputes. They will study mechanisms such as arbitration, alternative dispute resolution, and the role of banking ombudsman. They will critically assess the effectiveness of these mechanisms in resolving banking-related disputes.</p>
	<b>LLB-307-A/LLB-307-B</b>	<b>INTERPRETATION/LEGAL LANGUAGE</b>	<p>CO1: determine the principles and methods of legal interpretation: Students will develop an understanding of the principles and methods of legal interpretation. They will study different approaches to interpreting statutes, contracts, and legal documents, including textual, purposive, and contextual interpretation. They will analyze the role of legislative intent, precedent, and legal reasoning in interpreting the law.</p> <p>CO2: Apply legal language and terminology accurately: Students will apply legal language and terminology accurately in written and oral communication. They will develop the skills to effectively draft legal documents, such as contracts, pleadings, and legal opinions, using precise and concise language. They will also develop the ability to interpret and analyze legal texts and cases using appropriate legal terminology.</p> <p>CO3: Interpret legal provisions and case law: Students will interpret legal provisions and case law to understand their meaning and implications. They will learn to identify relevant legal principles, rules, and precedents and</p>

*S. Jeyaraj*

			<p>apply them to specific factual scenarios. They will develop the skills to analyze and critically evaluate legal arguments and reasoning.</p> <p>CO4: Communicate legal concepts and arguments effectively: Students will communicate legal concepts and arguments effectively to various audiences. They will develop oral advocacy skills, including the ability to present legal arguments in a clear, organized, and persuasive manner. They will also develop strong written communication skills, including the ability to draft legal memoranda and opinions that effectively convey legal analysis and conclusions.</p> <p>CO5: Analyze the impact of language on legal interpretation and communication: Students will analyze the impact of language on legal interpretation and communication. They will study the role of ambiguity, vagueness, and linguistic nuances in legal texts. They will also examine the challenges and ethical considerations related to translating legal concepts across different languages and cultures.</p>
		<b>MOOT COURT</b>	<p>CO1: Develop practical skills in legal research: Students will develop practical skills in conducting legal research relevant to moot court cases. They will learn how to locate and analyze legal authorities, including statutes, case law, and secondary sources, to support their arguments and positions in the moot court proceedings.</p> <p>CO2: Develop oral advocacy skills: Students will develop oral advocacy skills necessary for participating in moot court competitions. They will learn how to present legal arguments, respond to questions from judges, and</p>

*Supriya*

		<p>effectively communicate their positions in a clear, organized, and persuasive manner. They will also learn courtroom etiquette and professional demeanor.</p> <p>CO3: Enhance critical thinking and analytical skills: Students will enhance their critical thinking and analytical skills through the preparation and presentation of moot court cases. They will learn how to analyze legal issues, identify relevant facts and legal principles, and construct logical and coherent arguments to support their positions.</p> <p>CO4: Improve legal writing and drafting skills: Students will improve their legal writing and drafting skills by preparing written submissions, memoranda, and other documents required for moot court competitions. They will learn how to structure their arguments, cite legal authorities accurately, and present their legal analysis in a clear and persuasive manner.</p> <p>CO5: Develop teamwork and collaboration skills: Students will develop teamwork and collaboration skills through participation in moot court competitions. They will work in teams to prepare and present their cases, learn to delegate responsibilities, and effectively collaborate with their teammates to achieve the best possible outcome in the moot court proceedings.</p>
<b>FOURTH SEMESTER</b>		

20	LLB-401	PROPERTY LAW & EASEMENT	<p>CO1: examine the principles and concepts of property law: Students will develop an understanding of the principles and concepts of property law, including the different types of property rights, ownership, possession, and transfer of property. They will learn about the various legal doctrines and rules that govern property rights and the ways in which property is protected under the law.</p> <p>CO2: Analyze and apply the laws relating to property transactions: Students will analyze and apply the laws relating to property transactions, including the sale, lease, mortgage, and transfer of property. They will learn about the legal requirements and procedures involved in property transactions, including drafting and interpreting contracts, conducting due diligence, and registering property documents.</p> <p>CO3: identify the legal framework of easements: Students will gain an understanding of the legal framework of easements, including the nature, creation, and termination of easements. They will learn about the different types of easements, such as right of way, right to light, and right to support, and how they can impact property rights and land use.</p> <p>CO4: Analyze and resolve legal issues related to property disputes: Students will develop the skills to analyze and resolve legal issues related to property disputes. They will learn how to identify and interpret relevant laws and regulations, apply legal principles to specific factual scenarios, and develop strategies for resolving property disputes through negotiation, mediation, or litigation.</p> <p>CO5: develop the role of property law</p>
----	---------	-------------------------	--

*Signature*

			<p>in societal development and economic activities: Students will understand the role of property law in societal development and economic activities. They will explore the economic implications of property rights, the impact of property law on investment and development, and the role of property law in promoting social welfare and environmental sustainability.</p>
LLB-402	<b>LAW OF EVIDENCE</b>		<p>CO1: analyse the principles and concepts of property law: Students will develop an understanding of the principles and concepts of property law, including the different types of property rights, ownership, possession, and transfer of property. They will learn about the various legal doctrines and rules that govern property rights and the ways in which property is protected under the law.</p> <p>CO2: Analyze and apply the laws relating to property transactions: Students will analyze and apply the laws relating to property transactions, including the sale, lease, mortgage, and transfer of property. They will learn about the legal requirements and procedures involved in property transactions, including drafting and interpreting contracts, conducting due diligence, and registering property documents.</p> <p>CO3: examine the legal framework of easements: Students will gain an understanding of the legal framework of easements, including the nature, creation, and termination of easements. They will learn about the different types of easements, such as right of way, right to light, and right to support, and how they can impact</p>

*Signature*

			<p>property rights and land use.</p> <p>CO4: Analyze and resolve legal issues related to property disputes: Students will develop the skills to analyze and resolve legal issues related to property disputes. They will learn how to identify and interpret relevant laws and regulations, apply legal principles to specific factual scenarios, and develop strategies for resolving property disputes through negotiation, mediation, or litigation.</p> <p>CO5: identify the role of property law in societal development and economic activities: Students will understand the role of property law in societal development and economic activities. They will explore the economic implications of property rights, the impact of property law on investment and development, and the role of property law in promoting social welfare and environmental sustainability.</p>
	LLB-403	<b>ENVIRONMENTAL LAW</b>	<p>CO1: identify the principles and concepts of environmental law: Students will develop an understanding of the principles and concepts of environmental law, including the legal frameworks and regulatory mechanisms for environmental protection. They will learn about the sources of environmental law, the roles of international and domestic laws, and the principles of sustainable development and environmental justice.</p> <p>CO2: Analyze and apply environmental laws and regulations: Students will analyze and apply</p>

*Signature*

		<p>environmental laws and regulations in various contexts. They will learn about the legal provisions related to environmental pollution, conservation of natural resources, biodiversity, waste management, and climate change. They will develop skills to interpret and apply these laws to real-world environmental issues.</p> <p>CO3: Assess the impact of environmental law on society and ecosystems: Students will learn to assess the impact of environmental law on society and ecosystems. They will understand the interplay between environmental laws, social justice, and human rights. They will explore the role of environmental regulations in promoting sustainable development, mitigating environmental harm, and preserving ecological balance.</p> <p>CO4: Evaluate environmental compliance and enforcement mechanisms: Students will develop the skills to evaluate environmental compliance and enforcement mechanisms. They will learn about the roles and responsibilities of regulatory agencies, the processes for monitoring and enforcement, and the penalties and remedies for non-compliance. They will understand the importance of compliance with environmental laws for maintaining ecological integrity and public health.</p> <p>CO5: Analyze emerging issues in environmental law and policy: Students will analyze emerging issues in environmental law and policy. They will explore contemporary environmental challenges, such as climate change, pollution, deforestation, and resource depletion.</p>
--	--	--

*Signature*

			<p>They will develop critical thinking skills to analyze and propose legal solutions to address these challenges and promote sustainable environmental practices.</p>
	LLB-404	LABOUR AND INDUSTRIAL LAW	<p>CO1: identify the principles and frameworks of labour and industrial law: Students will develop a comprehensive understanding of the principles and frameworks of labour and industrial law. They will learn about the legal rights and obligations of employers and employees, the role of collective bargaining and trade unions, and the regulations governing employment relationships.</p> <p>CO2: Analyze and apply labour laws and regulations: Students will analyze and apply labour laws and regulations in various employment contexts. They will learn about the legal provisions related to employment contracts, working conditions, wages, hours of work, leave entitlements, and workplace safety. They will develop the skills to interpret and apply these laws to address practical employment issues.</p> <p>CO3: Evaluate labour dispute resolution mechanisms: Students will learn to evaluate labour dispute resolution mechanisms, including negotiation, mediation, conciliation, and arbitration. They will understand the processes and procedures involved in resolving labour disputes and the role of administrative bodies and courts in adjudicating labour-related</p>

*Signature*

			<p>matters.</p> <p>CO4: Understand the legal framework for industrial relations: Students will gain an understanding of the legal framework for industrial relations. They will learn about the regulations governing collective bargaining, strikes, lockouts, and industrial action. They will also explore the legal provisions related to employee welfare, social security, and labour standards.</p> <p>CO5: Analyze emerging issues in labour and industrial law: Students will analyze emerging issues and trends in labour and industrial law. They will explore contemporary challenges such as gig economy employment, non-standard work arrangements, discrimination and equal opportunity, and the impact of technology on the workplace. They will develop critical thinking skills to analyze and propose legal solutions to address these evolving issues.</p>
	LLB-405	<b>CRIMINOLOGY, PENOLOGY AND VICTIMOLOGY</b>	<p>CO1: analyse the theories and concepts of criminology: Students will develop an understanding of the theories and concepts of criminology, including the causes and explanations of crime, patterns of criminal behavior, and the role of social, psychological, and environmental factors. They will learn about different schools of thought in criminology and their application in understanding criminal behavior.</p> <p>CO2: Analyze the principles and practices of penology: Students will analyze the principles and practices of penology, focusing on the punishment</p>

*Subir*

		<p>and rehabilitation of offenders. They will learn about different forms of punishment, including incarceration, probation, and community-based alternatives. They will explore the goals of punishment and the effectiveness of different correctional approaches.</p> <p>CO3: Study victimology and victim rights: Students will study victimology and the rights of victims of crime. They will learn about the experiences and needs of crime victims, the impact of victimization on individuals and communities, and the legal protections and support systems available for victims. They will examine the role of restorative justice and victim compensation programs.</p> <p>CO4: Analyze the criminal justice system: Students will analyze the functioning of the criminal justice system, including the investigation, prosecution, and adjudication of criminal cases. They will learn about the roles and responsibilities of different actors in the criminal justice system, such as the police, prosecutors, defense attorneys, judges, and correctional officials. They will evaluate the fairness and effectiveness of the criminal justice system.</p> <p>CO5: Evaluate policies and practices in criminology and penology: Students will evaluate policies and practices in criminology and penology. They will critically analyze the impact of criminal justice policies, such as sentencing guidelines, rehabilitation programs, and crime prevention strategies. They will explore the ethical and social implications of these policies and propose evidence-based</p>

*Supriya*

			reforms.
	LLB-406	<b>LAND LAWS(including revenue and ceiling law)</b>	<p>CO1: evaluate the legal framework of land laws: Students will develop an understanding of the legal framework governing land laws, including the relevant legislation, regulations, and case law. They will learn about the different types of land ownership, rights, and interests, as well as the principles and concepts underlying land laws.</p> <p>CO2: Analyze the principles and provisions of revenue laws: Students will analyze the principles and provisions of revenue laws related to land. They will study the procedures for land acquisition, land records management, land revenue assessment, and collection of land revenue. They will also examine the rights and obligations of landowners, tenants, and other stakeholders under revenue laws.</p> <p>CO3: Study the provisions and implications of ceiling laws: Students will study the provisions and implications of ceiling laws that aim to regulate the ownership and possession of land. They will learn about the concept of land ceilings, the criteria for determining land holdings, and the procedures for land redistribution or redistribution of surplus land. They will also analyze the social and economic impact of ceiling laws.</p> <p>CO4: Analyze legal issues related to land transactions: Students will analyze legal issues related to land transactions, such as sale, purchase, lease, mortgage, and transfer of land. They will learn about the requirements</p>

		<p>for valid land transactions, the rights and responsibilities of parties involved, and the procedures for registration and transfer of land titles. They will also explore the legal remedies available in case of land disputes.</p> <p>CO5: Evaluate the impact of land laws on social and economic development: Students will evaluate the impact of land laws on social and economic development. They will analyze the role of land laws in promoting land reforms, ensuring equitable distribution of land resources, protecting the rights of marginalized communities, and facilitating sustainable land use practices. They will critically assess the effectiveness of land laws in achieving these objectives.</p>
LLB-407	<p><b>ARBITRATION, CONCILIATION AND ALTERNATE DISPLAY AND RESOLUTION SYSTEM</b></p>	<p>CO1: demonstrate the principles and concepts of arbitration: Students will develop an understanding of the principles and concepts of arbitration as an alternative dispute resolution mechanism. They will learn about the legal framework governing arbitration, including the relevant legislation, rules, and procedures. They will also explore the key characteristics of arbitration, such as party autonomy, confidentiality, and enforceability of arbitral awards.</p> <p>CO2: Analyze the process and procedures of arbitration: Students will analyze the process and procedures involved in arbitration. They will study the different stages of arbitration, including the appointment of arbitrators, the submission of claims and defenses, the conduct of hearings,</p>

			<p>and the rendering of arbitral awards. They will also examine the role of evidence, arguments, and legal representation in arbitration proceedings.</p> <p>CO3: Study the role and functions of conciliation: Students will study the role and functions of conciliation as a method of resolving disputes. They will learn about the techniques and strategies used in conciliation, including facilitation, negotiation, and mediation. They will explore the principles of fairness, impartiality, and confidentiality in conciliation processes.</p> <p>CO4: Analyze the benefits and limitations of alternative dispute resolution: Students will analyze the benefits and limitations of alternative dispute resolution mechanisms, including arbitration and conciliation. They will evaluate the advantages of faster resolution, cost-effectiveness, flexibility, and confidentiality offered by these mechanisms. They will also critically assess the limitations, such as limited appeal rights and potential enforcement challenges.</p> <p>CO5: Evaluate the legal and practical aspects of alternative dispute resolution: Students will evaluate the legal and practical aspects of alternative dispute resolution systems. They will examine the legal enforceability of arbitral awards and settlement agreements. They will also consider the ethical considerations, professional responsibilities, and practical considerations involved in the practice of arbitration and conciliation.</p>
--	--	--	--

*Supriya*

		Fifth semester	
	LLB-501	CODE OF CIVIL PROCEDURE	<p>CO1: examine the fundamental principles and concepts of the Code of Civil Procedure: Students will develop an understanding of the fundamental principles and concepts underlying the Code of Civil Procedure. They will learn about the structure and organization of the code, its scope and applicability, and the hierarchy of civil courts.</p> <p>CO2: Analyze the procedural aspects of civil litigation: Students will analyze the procedural aspects of civil litigation governed by the Code of Civil Procedure. They will study the different stages of a civil suit, including the filing of a plaint, issuance of summons, framing of issues, examination and cross-examination of witnesses, presentation of evidence, and arguments.</p> <p>CO3: Study the provisions related to jurisdiction and limitation: Students will study the provisions of the Code of Civil Procedure related to jurisdiction and limitation. They will learn about the different types of jurisdiction, such as territorial jurisdiction, pecuniary jurisdiction, and subject-matter jurisdiction. They will also understand the concept of limitation periods for filing civil suits.</p> <p>CO4: Analyze the provisions related to execution and appeals: Students will analyze the provisions of the Code of Civil Procedure related to the execution of decrees and orders and the process of appeals. They will study the procedures for executing decrees,</p>

*Signature*

			<p>including attachment and sale of property, arrest and detention, and appointment of receivers. They will also learn about the grounds and procedures for filing appeals against civil judgments.</p> <p>CO5: Evaluate the role of the court in civil proceedings: Students will evaluate the role of the court in civil proceedings as outlined in the Code of Civil Procedure. They will understand the powers and functions of the court, including case management, issuance of interim orders, and pronouncement of judgments. They will also critically assess the efficiency and effectiveness of civil procedure in providing access to justice.</p>
	LLB-502	<b>DRAFTING, PLEADING AND CONVEYANCING</b>	<p>CO1: identify the principles and techniques of drafting legal documents: Students will develop an understanding of the principles and techniques involved in drafting legal documents. They will learn about the importance of clarity, precision, and accuracy in drafting, as well as the use of appropriate legal language and structure. They will also explore the specific requirements for drafting different types of legal documents, such as contracts, agreements, pleadings, and conveyancing documents.</p> <p>CO2: Develop skills in drafting legal documents: Students will develop practical skills in drafting various types of legal documents. They will learn how to effectively draft contracts, agreements, pleadings, and conveyancing documents, ensuring that they accurately reflect the intentions and legal requirements of</p>

*Signature*

		<p>the parties involved. They will practice using clear and concise language, proper formatting, and appropriate legal terminology in their drafts.</p> <p>CO3: evaluate the process of pleading in civil and criminal cases: Students will understand the process of pleading in civil and criminal cases. They will learn about the different types of pleadings, including complaints, written statements, counterclaims, written statements of defense, and criminal complaints. They will study the requirements for drafting effective pleadings, including the presentation of facts, legal arguments, and reliefs sought.</p> <p>CO4: Learn the essentials of conveyancing and property documentation: Students will learn the essentials of conveyancing and property documentation. They will understand the process of transferring property rights, including the preparation and execution of sale deeds, lease agreements, mortgage deeds, and other relevant documents. They will study the legal requirements and procedures involved in property transactions.</p> <p>CO5: Apply drafting, pleading, and conveyancing skills in practical scenarios: Students will apply their drafting, pleading, and conveyancing skills in practical scenarios. They will engage in simulated exercises and case studies to draft legal documents, prepare pleadings, and complete conveyancing tasks. They will receive feedback on their work to enhance their drafting skills and improve their understanding of the practical</p>
--	--	---

			application of these concepts.
	<b>LLB-504</b>	<b>INSURANCE LAW AND ACCIDENTAL CLAIM</b>	<p>CO1: evaluate the principles and legal framework of insurance law: Students will develop an understanding of the principles and legal framework governing insurance contracts and the insurance industry. They will learn about the key concepts and components of insurance law, including the formation of insurance contracts, policy terms and conditions, insurance claims, and the rights and obligations of insurers and policyholders.</p> <p>CO2: Analyze the different types of insurance policies and their coverage: Students will analyze the different types of insurance policies and their coverage, including life insurance, health insurance, property insurance, liability insurance, and motor vehicle insurance. They will study the specific provisions, exclusions, and limitations of each type of policy, and understand the scope of coverage and the process of making insurance claims.</p> <p>CO3: Examine the legal aspects of insurance claims and settlement: Students will examine the legal aspects of insurance claims and the settlement process. They will learn about the procedures for filing insurance claims, the documentation required, the investigation process by insurance companies, and the principles governing claim settlement. They will also study the role of insurance regulators and dispute resolution mechanisms in resolving insurance-related disputes.</p> <p>CO4: identify the legal framework for</p>

		<p>accidental claims: Students will understand the legal framework for accidental claims, including claims arising from personal injury, property damage, and other accidental events. They will learn about the principles of negligence, liability, and compensation in accidental claims, and study the relevant statutory provisions, case laws, and legal precedents in this area.</p> <p>CO5: Analyze emerging issues and developments in insurance law: Students will analyze emerging issues and developments in insurance law, including changes in regulatory frameworks, emerging trends in insurance products and services, and the impact of technology on the insurance industry. They will critically evaluate the legal and ethical implications of these developments and their impact on policyholders, insurers, and other stakeholders.</p>
	LLB-506-A	<p><b>WOMEN AND CHILD LAW</b></p> <p>CO1:examine the legal framework for women and child protection: Students will develop an understanding of the legal framework governing the rights and protection of women and children. They will study relevant international conventions, national laws, and policies aimed at promoting and safeguarding the rights of women and children, including laws related to gender equality, child rights, and protection against violence and exploitation.</p> <p>CO2: Analyze the legal issues and challenges faced by women and children: Students will analyze the legal issues and challenges faced by women and children, such as gender</p>

*Supriya*

		<p>discrimination, domestic violence, child abuse, child labor, child marriage, and trafficking. They will examine the social and cultural factors contributing to these issues and explore legal strategies and interventions for addressing them.</p> <p>CO3: Examine laws related to women's rights: Students will examine laws related to women's rights, including laws pertaining to marriage, divorce, inheritance, property rights, employment, and sexual harassment. They will critically analyze the provisions and effectiveness of these laws in protecting and promoting women's rights, and explore the role of the judiciary and other institutions in their implementation.</p> <p>CO4: analyse laws related to child protection and welfare: Students will understand laws related to child protection and welfare, including laws on child custody, adoption, juvenile justice, and education. They will explore the legal provisions for the prevention and rehabilitation of child victims of abuse, exploitation, and neglect. They will also study the role of child welfare agencies and mechanisms for ensuring the best interests of the child.</p> <p>CO5: Analyze emerging issues in women and child law: Students will analyze emerging issues in women and child law, including evolving concepts of gender equality, child rights, and protection. They will examine contemporary challenges such as online child exploitation, cyberbullying, and intersectional issues faced by marginalized women and children. They will critically</p>
--	--	--

			evaluate legal reforms and policy initiatives aimed at addressing these emerging issues.
	LLB-505	<b>PRIVATE INTERNATIONAL LAW</b>	<p>CO1: identify the principles and scope of private international law: Students will develop an understanding of the principles and scope of private international law. They will learn about the legal framework that governs cross-border transactions and disputes, including the rules for determining jurisdiction, choice of law, and recognition and enforcement of foreign judgments.</p> <p>CO2: Analyze conflict of laws issues in private international law: Students will analyze conflict of laws issues that arise in private international law cases. They will study the different approaches to resolving conflicts between the laws of different jurisdictions, including the application of choice of law rules and the determination of the applicable law in various legal matters, such as contracts, torts, and family law.</p> <p>CO3: Examine international commercial transactions and dispute resolution: Students will examine the legal aspects of international commercial transactions and the mechanisms for resolving international commercial disputes. They will study the rules governing international contracts, the use of standard contract terms, and the resolution of disputes through international arbitration and other alternative dispute resolution methods.</p> <p>CO4: determine the recognition and enforcement of foreign judgments:</p>

			<p>Students will understand the principles and procedures for the recognition and enforcement of foreign judgments. They will learn about the conditions for recognition, the grounds for refusal, and the process for enforcing foreign judgments in domestic courts. They will also explore the role of international conventions and treaties in facilitating the recognition and enforcement of foreign judgments.</p> <p>CO5: Analyze emerging issues in private international law: Students will analyze emerging issues in private international law, such as the challenges posed by digital technologies and online transactions, the harmonization of international laws, and the interaction between national legal systems and supranational bodies. They will critically evaluate the implications of these emerging issues for the practice of private international law and explore potential solutions.</p>
	LLB-503	MOOT COURT	<p>CO1: Develop advocacy and legal research skills: Students will develop and enhance their skills in legal research, case analysis, and the preparation of legal arguments. They will learn how to effectively research case law, statutes, and legal precedents, and use this knowledge to construct persuasive arguments for their moot court presentations.</p> <p>CO2: Enhance oral advocacy and presentation skills: Students will enhance their oral advocacy skills through moot court exercises. They will learn how to present their legal arguments in a clear, concise, and persuasive manner. They will also</p>

*[Signature]*

			<p>develop skills in public speaking, courtroom etiquette, and effective communication with judges, opposing counsel, and clients.</p> <p>CO3: Analyze legal issues and apply legal principles: Students will analyze complex legal issues presented in moot court scenarios and apply relevant legal principles and doctrines. They will learn how to identify key legal issues, apply legal rules to factual situations, and develop logical and persuasive arguments based on legal reasoning.</p> <p>CO4: Collaborate effectively in a team setting: Students will learn how to work effectively as part of a team in a moot court setting. They will develop skills in collaboration, coordination, and division of responsibilities within the team. They will also learn how to engage in constructive discussions, provide feedback, and support their teammates in preparing for moot court presentations.</p> <p>CO5: Develop professional ethics and courtroom decorum: Students will develop an understanding of professional ethics and courtroom decorum. They will learn about the ethical responsibilities of lawyers, including the duty of candor, confidentiality, and respect for the court. They will also develop an awareness of the professional standards and behavior expected in a courtroom setting.</p>
	LLB-507	<b>PUBLIC INTEREST LAWYERING LEGAL AID AND PARA LEGAL SERVICES</b>	<p>CO1: identify the concept and principles of public interest lawyering: Students will develop an understanding of the concept and</p>

			<p>principles of public interest lawyering. They will learn about the role of lawyers in promoting social justice, addressing systemic inequalities, and advocating for the rights and interests of marginalized individuals and communities.</p> <p>CO2: Analyze the legal framework and mechanisms for providing legal aid: Students will analyze the legal framework and mechanisms for providing legal aid to those who cannot afford legal representation. They will study the laws, policies, and institutions involved in the provision of legal aid, including the role of government-funded legal aid programs, non-profit organizations, and pro bono services.</p> <p>CO3: Develop skills in providing legal assistance and advocacy: Students will develop practical skills in providing legal assistance and advocacy to disadvantaged individuals and communities. They will learn how to conduct client interviews, assess legal needs, research legal issues, draft legal documents, and represent clients in administrative and judicial proceedings.</p> <p>CO4: evaluate the role of para-legal services in expanding access to justice: Students will understand the role of para-legal services in expanding access to justice. They will learn about the responsibilities and limitations of para-legals in providing legal assistance, including conducting legal research, assisting with case preparation, and supporting lawyers in client representation.</p> <p>CO5: Analyze ethical considerations</p>
--	--	--	---

			in public interest lawyering: Students will analyze the ethical considerations and dilemmas that arise in public interest lawyering and the provision of legal aid. They will explore issues such as conflicts of interest, client confidentiality, professional boundaries, and the lawyer's duty to the court and the public interest.

## LL.B 6<sup>TH</sup> SEMESTER

There will be a six months Internship consisting VIVA VOCE,

Examinations and project submission:

1. CIVIL LAWS
2. CRIMINAL LAWS
3. PROJECT

**NOTE:** Some of the subjects are similar in B.A LL.B AND BBA LL.B COURSE so they have been mentioned for once

*[Handwritten Signature]*

## Course Outcomes of Master of LAW

S.NO	Course Code	Course Title	Course Outcomes
<b>FIRST SEMESTER</b>			
1	LW-302	JURISPRUDENCE	<p>CO1: examine the nature and scope of jurisprudence: Students will develop an understanding of the nature, scope, and significance of jurisprudence as a field of study. They will explore the fundamental questions and theories of law, including the nature of law, its sources, and its relationship with morality and justice.</p> <p>CO2: Analyze major jurisprudential theories: Students will analyze and evaluate major jurisprudential theories and schools of thought, such as natural law, positivism, legal realism, and critical legal studies. They will examine the strengths and weaknesses of these theories and their impact on legal systems and decision-making.</p> <p>CO3: Apply jurisprudential concepts to legal issues: Students will learn how to apply jurisprudential concepts and theories to analyze and interpret legal issues and cases. They will develop skills in critical thinking, legal reasoning, and the application of jurisprudential perspectives to understand and resolve complex legal problems.</p> <p>CO4: Explore interdisciplinary approaches to jurisprudence: Students will explore interdisciplinary approaches to jurisprudence, examining the intersections between law, philosophy, sociology, politics, and other related disciplines. They will develop an appreciation for the multidimensional nature of law and its connections with broader social and cultural contexts.</p> <p>CO5: Reflect on the role of jurisprudence in legal practice and scholarship: Students will reflect on the relevance and significance of jurisprudence in legal practice, scholarship, and social change. They will consider how jurisprudential insights can inform legal reasoning, legal argumentation, and the development of legal principles and policies.</p>

*[Signature]*

2	LW-103	<b>LEGAL AND CONSTITUTIONAL HISTORY OF INDIA</b>	<p>CO1: explore the historical development of legal and constitutional systems in India: Students will develop an understanding of the historical evolution of legal and constitutional systems in India. They will explore the ancient legal traditions, colonial influences, and the process of post-independence constitutional development.</p> <p>CO2: Analyze the impact of key historical events on Indian legal and constitutional history: Students will analyze the impact of key historical events, such as the British colonial rule, the Indian independence movement, and the framing of the Indian Constitution, on the development of legal and constitutional systems in India.</p> <p>CO3: Examine the constitutional provisions and landmark judgments shaping Indian legal history: Students will examine the constitutional provisions and landmark judgments that have played a significant role in shaping Indian legal history. They will explore the interpretation and application of constitutional principles by the judiciary and their impact on the Indian legal system.</p> <p>CO4: Evaluate the role of legal and constitutional history in contemporary legal issues: Students will evaluate the relevance and significance of legal and constitutional history in contemporary legal issues in India. They will analyze how historical developments and legal precedents continue to influence the interpretation and application of laws in present times.</p> <p>CO5: Reflect on the social, cultural, and political context of Indian legal and constitutional history: Students will reflect on the social, cultural, and political context of Indian legal and constitutional history. They will consider the influence of diverse cultural and religious traditions, social movements, and political ideologies on the</p>

*Splix*

			development of legal and constitutional frameworks in India.
3	LW-101	<b>CONSTITUTIONAL LAW OF INDIA</b>	<p>CO1: demonstrate the Constitution of India: Students will develop a comprehensive understanding of the Constitution of India, including its historical background, structure, and basic features. They will become familiar with the Preamble, fundamental rights, directive principles of state policy, and the structure and powers of various branches of the government.</p> <p>CO2: Analyze constitutional principles and provisions: Students will analyze the key constitutional principles, concepts, and provisions enshrined in the Constitution of India. They will examine concepts such as separation of powers, federalism, judicial review, and the fundamental rights and duties of citizens.</p> <p>CO3: Interpret and apply constitutional provisions: Students will develop skills in interpreting and applying constitutional provisions to analyze legal issues and cases. They will learn to apply principles of constitutional interpretation and analyze landmark judgments of the Supreme Court of India to understand the evolving interpretation of the Constitution.</p> <p>CO4: Examine the relationship between constitutional law and other areas of law: Students will explore the relationship between constitutional law and other areas of law, such as administrative law, criminal law, and human rights law. They will analyze how constitutional principles shape the interpretation and application of laws in different contexts.</p> <p>CO5: Critically evaluate constitutional amendments and reforms: Students will critically evaluate constitutional amendments and proposed reforms in the Indian context. They will analyze the impact of constitutional amendments on the balance of power, protection of fundamental rights,</p>

*Signature*

			and the overall functioning of the Indian legal system.
4	LW-303	<b>PRINCIPLES OF LEGISLATION IN INTERPRETATION OF STATUTES</b>	<p>CO1: explore the principles of legislation: Students will develop a comprehensive understanding of the principles underlying legislation, including the legislative process, sources of law, and the hierarchy of laws. They will examine the role of legislation in the legal system and its significance in statutory interpretation.</p> <p>CO2: Analyze the interpretation of statutes: Students will analyze the principles and techniques used in the interpretation of statutes. They will study different approaches to statutory interpretation, including the literal, purposive, and contextual approaches, and understand how legislative intent is determined.</p> <p>CO3: Apply principles of legislation in statutory interpretation: Students will apply the principles of legislation to interpret and analyze statutes. They will learn to identify key provisions, resolve ambiguities, and reconcile conflicts within statutes by considering the legislative intent and the legislative history.</p> <p>CO4: Evaluate the impact of statutory interpretation on legal outcomes: Students will evaluate the impact of different approaches to statutory interpretation on legal outcomes. They will assess the significance of statutory interpretation in shaping legal arguments, influencing judicial decisions, and resolving legal disputes.</p> <p>CO5: Critically analyze judicial precedents related to statutory interpretation: Students will critically analyze landmark judgments and judicial precedents related to the interpretation of statutes. They will examine the reasoning behind judicial decisions and evaluate their impact on legal principles and the development of the law.</p>

*S. P. Singh*

5	LW-203	<b>LEGAL RESEARCH AND METHODOLOGY</b>	<p>CO1: identify the fundamentals of legal research: Students will develop an understanding of the basic concepts, principles, and techniques of legal research. They will learn about different types of legal sources, such as primary sources (statutes, regulations, case law) and secondary sources (treatises, law reviews, legal encyclopedias).</p> <p>CO2: Identify and locate legal sources: Students will develop skills in identifying and locating relevant legal sources for conducting research. They will learn to use legal databases, online resources, and libraries to access statutes, regulations, case law, and scholarly articles.</p> <p>CO3: Evaluate legal sources: Students will learn to critically evaluate legal sources for their reliability, relevance, and authority. They will assess the credibility of legal information and apply criteria to determine the validity and persuasive value of legal arguments.</p> <p>CO4: Conduct comprehensive legal research: Students will acquire the ability to conduct comprehensive legal research on specific legal issues or topics. They will learn to formulate research questions, develop search strategies, and analyze and synthesize the gathered information.</p> <p>CO5: Apply appropriate research methodologies: Students will learn to apply appropriate research methodologies to address legal research questions. They will explore qualitative and quantitative research methods, comparative legal analysis, and interdisciplinary approaches to legal research.</p>
<b>LLM 2<sup>ND</sup> SEMESTER</b>			
9	LW-201	<b>CONSTITUTIONAL POLICY AND LAW</b>	<p>CO1: evaluate the concept of constitutional policy: Students will gain an understanding of the relationship between constitutional</p>

*Signature*

			<p>law and policy-making. They will explore the role of constitutional policy in shaping and interpreting the constitution, and its impact on various aspects of governance and society.</p> <p>CO2: Analyze constitutional policy issues: Students will develop the ability to critically analyze and evaluate constitutional policy issues. They will examine key constitutional principles and provisions in light of social, political, and economic considerations, and assess their implications for public policy.</p> <p>CO3: Interpret constitutional provisions: Students will learn to interpret and apply constitutional provisions in the context of policy-making. They will study constitutional interpretation methods, including textual, historical, and purposive approaches, and apply them to analyze and resolve policy-related constitutional controversies.</p> <p>CO4: Evaluate constitutional policies: Students will learn to evaluate the effectiveness and impact of constitutional policies. They will analyze case studies and real-world examples to assess the outcomes and consequences of specific constitutional policies on individuals, communities, and institutions.</p> <p>CO5: identify constitutional amendments and reform: Students will explore the process of constitutional amendments and the dynamics of constitutional reform. They will examine the challenges and considerations involved in amending constitutions, and evaluate the need for constitutional reforms in response to societal changes and evolving policy priorities.</p>
10	LW-202	<b>LAW AND SOCIAL TRANSFORMATION IN INDIA</b>	<p>CO1: identify the relationship between law and social transformation: Students will develop an understanding of how the legal system influences and is influenced by social change and transformation in India. They will explore the dynamic interaction between law and society and analyze the</p>

*Supriya*

			<p>role of law in shaping social norms, values, and structures.</p> <p>CO2: Analyze key legal and social issues: Students will critically analyze key legal and social issues in India. They will examine issues such as gender equality, caste discrimination, religious freedom, human rights, environmental justice, and access to justice, and evaluate the impact of legal frameworks and policies in addressing these issues.</p> <p>CO3: Study the role of legislation and judicial decisions: Students will study the role of legislation and judicial decisions in driving social transformation. They will analyze landmark legal cases and legislative reforms that have contributed to social change in areas such as women's rights, marginalized communities, and the protection of human rights.</p> <p>CO4: Examine the impact of social movements and activism: Students will explore the role of social movements, activism, and civil society organizations in promoting social transformation in India. They will assess the effectiveness of legal strategies employed by social activists and the impact of their advocacy efforts on legal and social change.</p> <p>CO5: Evaluate the role of legal institutions: Students will evaluate the role of legal institutions, including the judiciary, in facilitating or hindering social transformation. They will examine the strengths and limitations of the legal system in addressing social justice issues and explore alternative dispute resolution mechanisms that promote social inclusivity and equality.</p>
11	LW-203	<b>LEGAL EDUCATION AND RESEARCH METHODOLOGY</b>	<p>CO1: evaluate the objectives and importance of legal education: Students will develop an understanding of the objectives and significance of legal education in shaping competent legal professionals. They will explore the role of legal education in</p>

*Signature*

			<p>promoting critical thinking, ethical values, professionalism, and social responsibility.</p> <p>CO2: Analyze the structure and components of legal education: Students will analyze the structure and components of legal education, including undergraduate and postgraduate programs, curriculum design, teaching methodologies, and assessment methods. They will evaluate the relevance and effectiveness of different approaches to legal education.</p> <p>CO3: Develop research skills and methodologies: Students will develop research skills and methodologies relevant to legal studies. They will learn to identify research questions, gather and analyze legal sources, apply appropriate research methodologies, and present their findings effectively.</p> <p>CO4: Explore interdisciplinary perspectives in legal research: Students will explore interdisciplinary approaches in legal research. They will learn to integrate insights from related fields such as sociology, political science, economics, and philosophy to enhance the depth and breadth of their legal research.</p> <p>CO5: Evaluate legal research ethics: Students will evaluate ethical considerations in legal research. They will understand the importance of integrity, objectivity, confidentiality, and respect for human subjects in conducting legal research, and adhere to ethical guidelines and principles.</p>
<b>LL.M 3<sup>RD</sup> SEMESTER</b>			
16	LW-301	<b>COMPARATIVE AND CO-OPERATIVE FEDERALISM</b>	<p>CO1: identify the concept of comparative federalism: Students will develop an understanding of the concept of federalism and its different models across various countries. They will compare and contrast the features, structures, and dynamics of federal systems to identify similarities and differences.</p>

*Supriya*

			<p>CO2: Analyze the principles and theories of federalism: Students will analyze the principles and theories underlying federalism, such as the distribution of powers, the role of central and regional governments, and the mechanisms for cooperation and coordination. They will critically evaluate the advantages and challenges of federal systems.</p> <p>CO3: Examine the functioning of cooperative federalism: Students will examine the concept and practice of cooperative federalism, where central and regional governments collaborate and share responsibilities in policy-making and implementation. They will analyze case studies and examples to understand the dynamics and effectiveness of cooperative federalism.</p> <p>CO4: Compare federal systems across countries: Students will compare and analyze federal systems in different countries, such as the United States, Canada, Germany, India, and Australia. They will examine the constitutional frameworks, division of powers, fiscal arrangements, and intergovernmental relations in these countries.</p> <p>CO5: Evaluate the impact of federalism on governance and public policy: Students will evaluate the impact of federalism on governance and public policy. They will analyze how federal systems influence decision-making, service delivery, and policy outcomes in areas such as education, healthcare, transportation, and environmental protection.</p>
17	LW-302	JURISPRUDENCE-I	<p>CO1: explore the nature and scope of jurisprudence: Students will gain a comprehensive understanding of jurisprudence as a field of study, its historical development, and its relevance to legal theory and practice.</p> <p>CO2: Analyze the major schools of</p>

*Signature*

			<p>jurisprudential thought: Students will critically analyze and evaluate the major schools of jurisprudential thought, such as natural law, legal positivism, legal realism, and sociological jurisprudence. They will examine the key concepts, arguments, and critiques associated with each school.</p> <p>CO3: Explore the relationship between law and morality: Students will examine the complex relationship between law and morality and explore different perspectives on the moral foundations of law. They will analyze ethical theories and principles and their application to legal decision-making.</p> <p>CO4: Examine the concept of legal rights and obligations: Students will explore the nature and significance of legal rights and obligations. They will analyze different theories of rights, their sources, and their implications for legal systems.</p> <p>CO5: analyse the concept of legal reasoning and interpretation: Students will gain an understanding of legal reasoning and interpretation. They will explore different approaches to legal interpretation, including textualism, intentionalism, and purposivism, and analyze the role of judges in shaping legal outcomes.</p>
18	LW-303	<b>PRINCIPLE OF LEGISLATION AND INTERPRETATION OF STATUTES</b>	<p>CO1: identify the principles of legislation: Students will gain a comprehensive understanding of the principles and processes involved in the creation of legislation. They will explore the role of legislatures, the legislative process, and the key principles that guide legislative drafting.</p> <p>CO2: Analyze the techniques of statutory interpretation: Students will learn and critically analyze the various techniques and approaches used in the interpretation of statutes. They will explore the literal rule, the golden rule, and the mischief rule, as well as other interpretive tools and principles.</p>

*Signature*

			<p>CO3: Apply statutory interpretation principles to legal scenarios: Students will develop the skills to apply statutory interpretation principles to analyze and interpret legal provisions in real-world scenarios. They will learn how to identify and resolve ambiguities, conflicts, and gaps in statutory language.</p> <p>CO4: Evaluate the role of judicial interpretation: Students will examine the role of courts in interpreting statutes and shaping the law through judicial decisions. They will analyze the doctrine of judicial precedent, the hierarchy of courts, and the principles of stare decisis.</p> <p>CO5: explore the relationship between legislation and legal policy: Students will explore the relationship between legislation and legal policy, including the social, economic, and political factors that influence the legislative process. They will analyze the impact of legislative choices on society and assess the role of courts in shaping legal policy through statutory interpretation.</p>
--	--	--	---

#### LL.M 4<sup>th</sup> SEMESTER

20	LW-401	JURISPRUDENCE-II	<p>CO1: Analyze major jurisprudential theories: Students will gain a deep understanding of major jurisprudential theories such as natural law, legal positivism, legal realism, and critical legal studies. They will critically evaluate the strengths, weaknesses, and philosophical foundations of each theory.</p> <p>CO2: Apply jurisprudential theories to legal issues: Students will develop the ability to apply jurisprudential theories to analyze and understand complex legal issues. They will use theoretical frameworks to assess the moral, social, and political dimensions of legal problems and evaluate their implications.</p>
----	--------	------------------	--

			<p>CO3: Critically evaluate the role of law in society: Students will critically evaluate the role of law in society from a jurisprudential perspective. They will explore questions regarding the relationship between law and morality, law and justice, and law and power.</p> <p>CO4: Analyze the intersection of law and other disciplines: Students will explore the interdisciplinary nature of jurisprudence by examining the intersections between law and fields such as philosophy, sociology, economics, and political science. They will analyze how these disciplines contribute to our understanding of law.</p> <p>CO5: Develop a reflective and critical approach to legal analysis: Students will develop a reflective and critical approach to and legal policy, including the social, economic, and political factors that influence the legislative process. They will analyze the impact of legislative choices on society and assess the role of courts in shaping legal policy through statutory interpretation.</p>
		ANALYSIS	<p>CO1: Apply quantitative methods in legal analysis: Students will acquire the skills to apply quantitative methods and statistical techniques to legal data and problems. They will be able to analyze legal issues using quantitative tools and draw meaningful conclusions.</p> <p>CO2: Interpret and evaluate quantitative data: Students will develop the ability to interpret and evaluate quantitative data related to legal issues. They will learn how to analyze statistical information, identify patterns, and make informed judgments based on the data.</p> <p>CO3: Use quantitative models in legal decision-making: Students will learn to use quantitative models, such as regression</p>

*Signature*

			<p>analysis or cost-benefit analysis, to aid in legal decision-making. They will understand how to apply these models to assess the impact of different legal options and make informed choices.</p> <p>CO4: Critically assess quantitative research in law: Students will develop the skills to critically assess quantitative research studies in the field of law. They will evaluate the validity and reliability of research methodologies, identify potential biases, and assess the strength of the evidence presented.</p> <p>CO5: Communicate quantitative findings effectively: Students will enhance their ability to communicate quantitative findings effectively to both legal and non-legal audiences. They will learn to present data visually, explain statistical concepts in a clear manner, and convey the implications of quantitative analysis in a persuasive manner.</p>
	LW-403	<b>CIVIL AND POLITICAL RIGHTS: COMPARATIVE STUDY OF INDIA AND U.K.</b>	<p>CO1: Compare the legal frameworks of civil and political rights in India and the UK: Students will gain knowledge of the legal frameworks and constitutional provisions related to civil and political rights in both India and the UK. They will be able to identify similarities and differences in the legal protection and recognition of these rights.</p> <p>CO2: Analyze the jurisprudence on civil and political rights in India and the UK: Students will examine and analyze landmark judicial decisions and legal interpretations pertaining to civil and political rights in India and the UK. They will understand the evolution of legal principles and doctrines in protecting these rights.</p>

			<p>CO3: Evaluate the effectiveness of legal protections for civil and political rights: Students will critically evaluate the effectiveness of legal protections for civil and political rights in India and the UK. They will assess the impact of legal frameworks on the enjoyment and realization of these rights by individuals and groups.</p> <p>CO4: Assess the role of international human rights standards: Students will examine the influence of international human rights standards on the legal protection of civil and political rights in India and the UK. They will analyze the extent to which these countries have incorporated international obligations into their domestic legal systems.</p> <p>CO5: Compare the enforcement mechanisms for civil and political rights: Students will compare the enforcement mechanisms and remedies available for violations of civil and political rights in India and the UK. They will understand the role of courts, human rights commissions, and other institutions in safeguarding these rights.</p>
	<b>DS-404</b>	<b>DISSERTATION AND PRACTICAL TRAINING</b>	<p>CO1: Identify a research topic and formulate a research question: Students will be able to select a relevant and meaningful topic for their dissertation in the field of law. They will formulate a clear and focused research question that will guide their research process.</p> <p>CO2: Conduct comprehensive literature review: Students will demonstrate the ability to review and critically analyze relevant literature related to their dissertation topic.
